

MEMORANDUM

To: Eric Gertler, Acting Commissioner/President/CEO of the Empire State Development Corporation

From: Rossana Rosado, Secretary of State
Richard Ball, Commissioner, Department of Agriculture & Markets
Alicia Barton, President & CEO, NYS Energy Research and Development Authority
RoAnn Destito, Commissioner, Office of General Services
Matthew Driscoll, Executive Director, NYS Thruway Authority
Erik Kulleseid, Commissioner, Office of Parks, Recreation and Historic Preservation
Roberta Reardon, Commissioner, Department of Labor
Michael Schmidt, Commissioner, Department of Taxation & Finance
Brian Stratton, Director of Canals, NYS Canal Corporation
RuthAnne Visnauskas, Commissioner, Homes and Community Renewal
Senator Neil Breslin, 44th District
Senator Anna Kaplan, 7th District
Assemblywoman Donna Lupardo, 123rd District
Assemblywoman Helene Weinstein, 41st District

Subject: Review of Progress for the 2019 Regional Economic Development Council Initiative

Date: December 18, 2019

We are honored to serve as the Strategic Implementation Assessment Team (SIAT) for Governor Cuomo's Regional Economic Development Council (REDC) Initiative. In the past nine years, the REDC initiative has transformed how New York coordinates and invests in economic development. The REDC initiative has been enhanced with a fourth round of the \$100 million Downtown Revitalization Initiative.

In 2011, each Regional Council was charged with developing a Strategic Economic Development Plan that emphasized their region's unique assets and provided strategies to harness local resources, both human and capital, to stimulate regional economic development and create jobs statewide. The Strategic Economic Development Plans continue today with annual updates to address emerging state and regional challenges and opportunities, as well as updates that reflect priorities identified by many regions in Upstate Revitalization Initiative Plans, and in Western NY by the Buffalo Billion Plan.

In 2019, Regional Councils were asked to address state priorities that included working with local businesses and communities to identify childcare needs and develop potential solutions;

developing an economic and environmental justice strategy for the region; supporting the Workforce Development Initiative; tracking the progress of the strategic economic development plan and projects funded through the Consolidated Funding Application (CFA); and supporting community investment in placemaking and downtown revitalization.

Each region has a unique set of strategies to achieve greater economic prosperity and each has identified key regional industry clusters. Regional Councils were also asked to continue advancement of regional strategic economic development plans, and identification of projects that implement related strategies, including key industry clusters, regional business incubators, the regional Opportunity Agenda, veterans' participation in the workforce, and engagement of local government in the Regional Council process.

The Regional Councils again supported the Downtown Revitalization Initiative (DRI), a community planning process where one community in each region receives assistance to identify and develop the key ingredients needed for successful downtown revitalization. Regional Councils solicited interest in the program and chose one community each from among the many applicants. The ten DRI areas selected in 2019 include: Baldwin in the Town of Hempstead, Fulton, Hornell, Niagara Falls, Peekskill, Potsdam, Schenectady, Seneca Falls, Staten Island, and Utica. A local planning committee in each DRI will develop a vision, articulate a plan, and identify projects and other implementation steps with the help of \$10 million per DRI.

Annual reports were submitted by the Regional Councils and in November each presented its progress and plans to implement the region's economic development strategies. Each also reported on the status of DRI plans in the region. Regional Councils continue to build upon regional strengths, focusing on key and emerging industries as they seek new businesses and support incubators that can generate marketable ideas for the next generation of products. Regional Councils are also partnering with educational institutions, employers, and service providers to identify and train prospective employees and match them to jobs that are available in the region.

2019 Annual REDC Competition

Our task was to evaluate all ten regions based on the competition criteria and Regional Council priorities as described in the 2019 REDC Guidebook. Criteria used to evaluate the Annual Reports included but was not limited to:

Performance

- Impact on job creation and retention
- Business growth and leverage of private sector investments
- Economic activity as a result of regional strategies

Progress

- Implementation of regional strategies
- Execution of strategies addressing emerging state and regional challenges and opportunities
- Advancement of prior round priority projects

Planning

- Ability to take the next steps in growing the regional economy
- Collaboration with local governments

Projects

- Identification of projects to advance state and regional priorities
- Identification of projects in the region that would revitalize downtowns

Participation

- Engagement of the public and other stakeholders in the Regional Council process
- Regional unity and support of the progress report

Awards

All ten regions competed for up to \$150 million in capital funds and \$75 million in Excelsior Tax Credits for projects identified by the Regional Councils as priorities in their regions. In addition, each region will receive \$10 million to implement projects identified through the Downtown Revitalization Initiative, and projects from all ten regions submitted through the CFA were eligible for over \$525 million in other state agency funds.

The Strategic Implementation Assessment Team has identified five regions that merit the designation as Top Performers and a share of \$100 million in ESD Capital Grants. Selection of the Top Performers continues to be a difficult challenge, as the regions are taking a variety of approaches to very different challenges and opportunities and are all making progress implementing their strategic plans. However, after careful consideration we selected as Top Performers the following regions: **Capital Region, Central NY, Long Island, Mohawk Valley, and Southern Tier.**

- The **Capital Region Regional Economic Development Council (CRREDC)** is taking a variety of actions to retain, build, and train a workforce that is prepared for jobs that match the region's focus on life sciences, manufacturing, and computer programming. The Talent strategy for the region continues to be a cradle-to-career approach to workforce development that connects job-seekers and employers with higher education institutions. For example, Hudson Valley Community College's new Haas Center for Advanced Manufacturing Skills and the Albany College of Pharmacology's new Center for Bio-Manufacturing Education and Training are contributing to the creation of training-to-industry pipeline and advancing both the Talent and Next Tech regional strategies. Recent data shows that jobs in the University R&D sector grew by over sixteen percent. Innovate 518, an Innovation Hot Spot, promotes the Lift-Off strategy and the key cluster of R&D to Commercialization by connecting startups with resources available in the Capital Region, including sourcing \$500,000 of funding in 2018. The Capital Region is one of 47 US metro areas that spent more than \$1 billion on R&D last year. Since its initial plan was adopted, placemaking has been the priority for the CRREDC as reflected in its "Metro" strategy. Projects are underway in the Downtown Revitalization Initiative (DRI) communities of Glens Falls, Hudson, and Albany and investments in the Saratoga Performing Arts Center

will benefit Saratoga Springs and nearby communities. Schenectady was chosen as the DRI community for 2019.

- The **Central New York Regional Economic Development Council (CNYREDC)** continues to adhere to winning strategies from its Upstate Revitalization Initiative plan, as well as its original strategic economic investment plan. The region continues to support entrepreneurs in the tech sector and agriculture through programs and incubators including Genius NY, the Grow-NY Food Innovation and Agriculture Technology Business Challenge, and Syracuse Center of Excellence for Environmental and Energy Systems. Over the past year, investments in SyracuseCoE have allowed collaborators to secure more than \$17 million in additional funding to support industry-university collaborations. Career exploration programs starting no later than middle school are being advocated to encourage youth to consider agriculture as well as other career paths. CNYREDC continues to support projects and programs that are enablers of prosperity, such as scholarships and job training for underserved youth provided by anti-poverty initiatives like the Alliance For Economic Inclusion and Say Yes Syracuse, and pre-apprenticeship programs in agriculture and film. The region, in partnership with the Mohawk Valley, has demonstrated significant progress towards its goal of becoming a global hub for unmanned systems. Syracuse University also established an unmanned system policy institute. Central NY is positioning itself as a logistics hub, particularly for agribusiness, with upgrades to ports, airport, and a new USDA export office. The DRI strategic investment plan was completed for the City of Auburn and Fulton was selected as the DRI community for 2019.
- The **Long Island Regional Economic Development Council (LIREDC)** has a diverse approach to workforce development, with strong academic partnerships that support its focus on the commercialization of discovery. An artificial intelligence (AI) cluster has emerged, and Stony Brook University's new AI Institute for Discovery and Innovation will become a regional HUB. Long Island's workforce grew by nearly 12,000 jobs in the past year, with the region investing in training workers to fill jobs in biotech industries. To help maintain the workforce and combat the outmigration of young workers, the LIREDC supports place-making and is encouraging mixed-use development near transportation hubs and the transformation of former big box stores/malls to mixed-use places. The LIREDC is supporting mixed-use and affordable housing with funds for improved sewers in the 2018 DRI community of Central Islip and other downtown areas. Potential revitalization projects in Baldwin in the Town of Hempstead will be identified in Round Four of the DRI. The LIREDC recognizes the need to address a range of job opportunities, such as agritourism and jobs associated with offshore wind power. A new work group will seek opportunities to develop a supply chain to support the construction, installation and operation of offshore wind projects, while other regional leaders will work with labor to prepare the workforce for wind industry-related careers.
- The **Mohawk Valley Regional Economic Development Council (MVREDC)** is encouraging placemaking investments and daycare centers in downtowns to attract and retain a young and growing workforce. Providing transportation alternatives for the

workforce is on the front burner, including efforts to bring jobs closer to where people live, provide a more walkable environment with pedestrian trails and bike paths, develop sites on bus routes, invest in Centro stations, and invest in downtown centers. More than 500 market rate and affordable housing units are planned or under construction in community centers. The 2019 DRI community of Utica also proposed a people-centric placemaking approach to leverage DRI investments. The region is taking a holistic approach to economic development and workforce development. For example, to develop a workforce for food systems MVREDC stressed creating a network of colleges serving rural areas to identify pathways to age-related jobs and working with middle schools using mobile classrooms. The MVREDC is relating STEM to agriculture, has the only PTECH agriculture program in the state, and is working with local schools to realign local curricula to prepare students for future jobs, including those in agriculture. To address a recurring concern over the lack of workers appropriate for open jobs, colleges are providing credit for apprenticeship programs and offering micro credentials that support middle-skills jobs in advanced manufacturing. In 2017 more than 100 advanced manufacturing jobs were added with wages 28% higher than the regional average wage.

- The **Southern Tier Regional Economic Development Council (STREDC)** is clearly committed to the strategies in its winning Upstate Revitalization Initiative plan, making large investments into high profile anchor projects in Binghamton, Johnson City and Endicott and using the CFA process to support jobs in manufacturing and agriculture, the region's downtowns, and drivers of innovation. \$1.5 billion in private funds have been leveraged for projects throughout the region for a total investment of over \$1.8 billion and the creation/retention of more than 25,000 jobs. The STREDC seeks to make greater Binghamton a destination for talent and has broken a long trend of work force decline with an increase in both the numbers of people in the labor force and the number employed in 2018. It continues to strengthen its entrepreneurial ecosystem through innovation hot spots and business incubators. The region has experienced great growth in attracting venture capital funding, and it continues to have positive job growth in key sectors such as advanced manufacturing, transportation equipment manufacturing, food processing, and healthcare. In the past year, construction began on the new Lake Erie College of Osteopathic Medicine in Elmira. STREDC is working to increase its market share of the food and agriculture industry by addressing workforce and growing season challenges. This year it joined with two other regions to launch Grow-NY, a food and agricultural business competition to advance tech and innovation, receiving nearly 200 applications for prizes for new businesses. Hornell was selected as the region's fourth round DRI community.

Five regions should receive a share of \$50 million in ESD Capital Grants to help attract and grow business in their regions. The following regions are designated as Regional Awardees: **Finger Lakes, Mid-Hudson, New York City, North Country, and Western NY.**

- The **Finger Lakes Regional Economic Development Council (FLREDC)** is maintaining its momentum with its clear focus on reducing poverty, growing jobs, increasing regional

wealth, and driving private sector investment. The region also established new priority areas based on its current strengths and opportunities, such as growing incumbent firms, proactive outreach to targeted clusters, development of a regional brand, focusing on immediate and long-term talent needs, and investment in the urban core. Two new key industries were identified - Healthcare & Life Sciences and Software & Internet Technology - and support continues for the key cluster of Optics/Photonics/Imaging through industry attraction and the \$10 million Luminate NY accelerator program. Investments from the Upstate Revitalization Initiative like AIM Photonics and ROC the Riverway are facilitating an ecosystem of economic development and public-private partnerships, and Eastman Business Park is gaining vibrancy as a place to work, live, learn, and play. Through the DRI, the FLREDC is supporting placemaking efforts outside of Rochester, such as in the DRI community of Seneca Falls. Efforts to attract and retain young people to the region have been successful, in part due to the attraction of vital, dense, and culture-and entertainment-rich urban areas. The challenges of poverty and environmental justice are being addressed through a comprehensive approach led by the Rochester-Monroe Anti-Poverty Initiative which engages institutions large and small to work together on multiple issues, including education, healthcare, transit, child care and more.

- The **Mid-Hudson Regional Economic Development Council (MHREDC)** is building on its success by encouraging existing businesses to grow creating new jobs and an environment that brings in new businesses to the region. Several incubation programs are contributing to the future pipeline of talent as evidenced through the growth of regional cluster jobs which support the region's broader strategy of WORK and PLAY. MHREDC has adjusted its LIVE initiative to include retaining and attracting residents to the region, which is complemented by efforts to strengthen the region's identity as a premier tourist destination. Efforts have focused on increasing visitor spending and stimulating growth across related industries (food/beverage, accommodations, arts and recreation). Peekskill's selection as a DRI community will allow the city to link existing community assets and increase offerings in tourism, the arts, media, and light manufacturing. Regional strategies have evolved to include support for the manufacture of local products like grape juice and cider, and the expansion of the film and television production industry. MHREDC has developed strategies to address long-term unemployed in the healthcare field, recruiting people to re-enter the workforce through basic skills training. MHREDC also identified childcare projects targeted around extended hours for the hospitality industry and is currently working with corporate park owners and other major employers to identify locations for childcare facilities convenient to multiple employers.
- The **New York City Regional Economic Development Council (NYCREDC)** is focused on long-term planning to retain young people and support the economic growth of underserved populations and all neighborhoods across New York City. Priority projects receiving NYCREDC support must indicate long-term economic sustainability and projections for economic growth in terms of job creation, investment, and community benefits. Unemployment is at an all-time low of 4.2%, but it does not account for people

who stopped looking for jobs or who are underemployed. Multiple efforts target inclusion of various special populations in the workforce, such as high-risk court-involved youth, veterans, underemployed women, and low-income girls and women. City-wide pre-K for all 4-year-olds and care for 3-year-olds in high-need school districts helps parents return to the workforce, but gaps remain that the NYCREDC recommends for further study. There has been an influx of pharmaceutical, healthcare, and bio-IT companies to the region, and NYCREDC supports both new projects in its key cluster of Life Sciences, as well as upgrades and expansion of previously supported life sciences projects like the BioLabs@NYU Langone incubator which provides startups with collaborative space, research equipment, and business support. Support is also provided for small and mid-size local manufacturers and artisans at the Greenpoint Manufacturing and Design Center where average salaries are \$51,000. To connect youth to tech jobs, the NYCREDC described an approach that would begin preparing students early in the education process, train teachers to overcome their own technology skill gaps, and expand use of community colleges.

- The **North Country Regional Economic Development Council (NCREDC)** identified several priorities for 2019, including building a regional identity, encouraging wise use of outdoor recreational assets, addressing the impacts of extreme weather on the tourism and agriculture industry, unlocking the economic potential of Fort Drum soldiers transitioning out of the Army, and seeking reliable cellular service. It is working successfully to implement a 2018 goal of hosting international sporting events, supported by investments in lodging and tourism facilities, such as the \$17 million Saranac Lake Resort, a children's museum in Potsdam, the region's 2019 DRI community. The NCREDC continues support for the Transportation Equipment cluster, working with Canadian and Norwegian industries that have invested in projects like a second Norsk Titanium facility that will open early in 2020. Fostering relationships with Canadian industries have bolstered job growth, exports, and diversified the types of manufacturing in the region. Agriculture is an important sector of the regional economy and is being supported by investment in high-tech year-round food production, such as expanded greenhouse space and robotic technology at Agbotics. The region's young adult population remained steady, but labor force numbers are dropped 3.6 percent from 2016-2017. To tackle that issue the NCREDC is taking multi-faceted approaches which include co-working facilities and business incubators to aid small businesses and attract entrepreneurs to the region, job training for low-income residents, new programs at regional colleges, and identification of solutions to childcare issues.
- The **Western NY Regional Economic Development Council (WNYREDC)** continues its focus on creating job opportunities and building the quality of life that will attract and retain young adults. With unemployment at the lowest since 1990, the region is faced with the challenge of ensuring employers have access to talent to fill job openings and grow businesses. Programs that showcase training in the region include the Alfred State College Burgard Advanced Manufacturing Program that prepares high school students for a career in advanced manufacturing, Gerard Place on Buffalo's East Side where students receive both vocational and life skills training, and Buffalo Manufacturing Works in the Northland

Corridor which has secured more than \$1 million in federal funding through global partnership models with NASA, MTC of the UK, NAMIC in Singapore, and others. REDC has made the East Side Corridor a priority to improve quality of life in Buffalo. WNYREDC has invested both CFA projects and Buffalo Billion funds in multiple projects to help provide housing, infrastructure, and assets to help build the community. Investments in smart growth have resulted in brownfield remediation, preservation of agricultural land and expansion of cropland; and protection of waterfront. WNYREDC is implementing a strategy to increase tourism and extend visitor stays, supporting tourism projects like the Aquarium of Niagara and the National Comedy Center in Jamestown. DRI funds for 2019 invested in the Niagara Fall's Bridge District will build on recent state investments in the aquarium and train station, as well as commitments to remove the parkway along the along the Niagara Gorge Corridor.

Conclusion

In each of the regions, the Assessment Team was impressed by the continued dedication of the Regional Council members and their selection of strategic and realistic projects. We were also impressed by the work group volunteers, and staff of the Regional Empire State Development offices who serve the Regional Councils. We continue to believe that the REDC process is a recipe for success, bringing together the key ingredients of economic development, academic advancement of new ideas and products, and development of a workforce across all age groups and socioeconomic strata. While we may only recommend five regions as top performers, we believe all of the regions are winners. We extend our thanks and our congratulations to all Region Council members for the outstanding work they are doing to strengthen New York's economy.

Long Island Regional Economic Development Council

2019 Annual Report Assessment

I. Performance

a. Impact on job creation and retention

Strengths

- The regional unemployment rate was 3.2 percent, the lowest in two decades.
- Long Island's workforce was nearly 12,000 jobs more than a year ago.
- The largest year-over-year jobs gains in June 2019 were in education and health services (+11,400), natural resources, mining and construction (+4,300), and manufacturing (+1,500).

Weaknesses

- Unemployment rates for the general population are 3.5 percent, veterans at 3.6 percent, people with disabilities 10 percent, and people with cognitive disabilities at 16.3 percent.

b. Business growth and leverage of private sector investments

Strengths

- From 2016 to 2018, there was an 8.65 percent increase in tourism spending to a record \$6.1 billion.
- Tech has seen 20 percent growth since 2013, with average salaries of \$94,000.
- The leverage of private investment to NYS investment in all CFA projects from 2011-2018 is 12:1.
- Between 2011 and 2018, pharmaceutical manufacturing saw a 20 percent growth in employment with pharmaceutical manufacturing producing an estimated 10,350 employees.

Weaknesses

- None noted.

c. Economic activity as a result of regional strategies

Strengths

- Venture capital funding for Long Island startups during the first half of 2019 was more than \$100 million, almost as much as all of last year.
- More than half of Long Island supply chain executives reported in Purolator's Supply Chain Index that their exports increased by 17 percent in the past year, and over a third expect increases in 2019.
- An artificial intelligence (AI) cluster has emerged and is being supported outside the REDC process. For example, Stony Brook University recently established the AI Institute for Discovery and Innovation that will become a regional HUB to explore how artificial intelligence and machine language can enhance human intelligence instead of replacing it.
- From 2016 to 2018 tourism spending increased in Nassau County 8.79 percent and Suffolk County by 8.53 percent. The tourism economy exceeded \$6 billion for the first time.

Weaknesses

- None noted.

II. Progress

a. Implementation of regional strategies

Strengths

- Biotechnology continues to be a growing cluster with the LIREDC supporting ongoing investment in training for new workers through industry-academic partnerships such as the IDEA Hub. The IDEA project will connect students to companies in leading sectors in order to support, recruit, and retain Long Island's talent
- Regarding placemaking, Long Island has had success with transit-oriented development and is continuing this strategy to create housing that is attractive to young workers.
- The LIREDC continues its focus on 'the commercialization of discovery' and provides continued support of biotech and academic growth.

Weaknesses

- A more detailed approach is needed to address the needs of entry level workers.

b. Execution of strategies that address emerging state and regional challenges and opportunities

Strengths

- The LIREDC has intentionally focused on development in underserved areas such as Westbury, Hicksville, and Central Islip.
- The Rebuild strategy seeks to improve communities in ways that will attract a skilled workforce. Previous state-funded sewer projects were the foundation for new mixed-use building developments that attract millennial workers.

Weaknesses

- None noted.

c. Advancement of prior round priority projects

Strengths

- 81 percent of all projects are completed or on schedule.
- Several priority projects were completed in late 2018, such as Cold Spring Harbor Laboratory's Structural Biology Share Screening Facility; Hofstra University's Consumer Behavior Market Research Lab; and new facilities and programming at Sunrise Association STEAM Shack.

Weaknesses

- None noted.

III. Planning

a. Ability to take the next steps in growing the regional economy

Strengths

- From 2011 to 2018 there was a 247 percent increase in the number of engineering enrollments at four local institutions.

- There is a new focus on transforming former single use developments (box stores/malls) to mixed-use places (housing/entertainment/commercial), which would provide space for economic development on Long Island and encourage development that better supports transit.
- The region may move to the forefront of generating solutions to energy and environmental issues with the creation of the Institute for Electrochemically Stored Energy at the Stony Brook University Advanced Power Sources Laboratory.
- The LIREDC is seeking ways to capitalize on the nation’s largest off-shore wind farm. It created a new Offshore Wind Work Group with an initial goal of identifying opportunities to be part of the industry supply chain.
- A panel of experts created an Environmental Justice Matrix to identify EJ communities. The strategy is a work in progress, and the panel has recognized the need to engage EJ communities and local policy-makers.

Weaknesses

- The region has a rising poverty rate in some communities despite a rise in overall prosperity.
- There is a supply gap of 65,563 childcare slots.
- Manufacturing costs are higher on Long Island compared to Asia, Mexico and other parts of the United States, and the LIREDC recognizes a need to attract and retain high-yielding manufacturers that generate strong revenues.
- High taxes were the key business challenge identified in a survey of manufacturers.

b. Collaboration with local governments

Strengths

- The LIREDC held 14 meetings with local elected officials.
- The Workforce and Education Group has explored partnerships to address challenges to entering the job market by such as those facing the formerly incarcerated. There is increased coordination among sheriffs, BOCES, DSS, and local educational institutions for job preparation and college credit initiatives.

Weaknesses

- There is a lack of affordable housing, with 67 percent of 18- to 34-year-olds planning to leave the region in order to obtain affordable housing. The LIREDC continues to advocate for affordable downtown apartments near transportation hubs.

IV. Projects

a. Identification of projects to advance state and regional priorities

Strengths

- The LIREDC calls for action on “child care deserts” to begin to fill the gap of needed daycare slots. It supported projects with childcare components like the Harbor Day Care and Lake Success YMCA.
- Workforce development: Pal-O-Mine Restore to Balance (CFA 91613), which is an equine therapy provider, proposes to expand its program for high risk youth and adults with disabilities, to receive job training, workforce preparedness and internships. Also, the Long Island Cares Expansion (CFA 91673) would increase its services, including career development programs for veterans and low-income individuals.

- Environmental Justice: the council mentioned focusing and incorporating an environmental justice component to all projects.
- Supporting Tradeable Sectors/Natural Assets: East End Food Hub (CFA 90116) provides training and support for restaurant startups and a centralized point of aggregation, processing, and distribution for products from regional farms and food businesses.
- The Produce strategy supports jobs in legacy sectors like aquaculture and fisheries. To decrease travel distance for fish processing, which reduces costs and supports a local workforce, the LIREDC supported the repair of the Shinnecock Commercial fishing Dock.
- In support of the Rebuild strategy, the LIREDC recommended funding for the East End Food Hub that will establish a commercial kitchen for early stage food companies and provide a centralized point of aggregation, processing, and distribution for products from regional farms and food businesses.
- The focus is on ‘the commercialization of discovery’ and the LIREDC continues to support biotech and academic growth, such as expansion of Biogent, a Stony Brook University incubator company.

Weaknesses

- None noted.

b. Identification of projects in the region that would revitalize downtowns needs

Strengths

- Community Development Corporation of LI is following a transit oriented mixed-use building development at Port Jefferson Crossing (CFA 92657) to further support revitalization in the area.
- Recognizing the importance of resilient infrastructure, the Village of Greenport Municipal Sewer Expansion (CFA 93484) will provide increased support and reduce current nitrogen pollution input into the Peconic Estuary.
- The Round 9 DRI winner Baldwin was selected because of factors including: new zoning guidelines to encourage development of residential, multi-family, and commercial space and its economic and ethnic diversity.

Weakness

- None noted.

V. Participation

a. Engagement of the public and other stakeholders in the Regional Council process

Strengths

- The Placemaking Workgroup held stakeholder meetings to evaluate commonalities among downtown revitalizations.
- The LIREDC held 12 town meetings with over 400 attendees.

Weaknesses

- The report lacked detailed information about social media and email engagement outcomes.

b. Regional unity and support of the progress report

Strengths

- 2019 proposed projects are geographically dispersed throughout Long Island.

Weaknesses

- None noted.
