

## MEMORANDUM

**To:** Eric Gertler, Acting Commissioner/President/CEO of the Empire State Development Corporation

**From:** Rossana Rosado, Secretary of State  
Richard Ball, Commissioner, Department of Agriculture & Markets  
Alicia Barton, President & CEO, NYS Energy Research and Development Authority  
RoAnn Destito, Commissioner, Office of General Services  
Matthew Driscoll, Executive Director, NYS Thruway Authority  
Erik Kulleseid, Commissioner, Office of Parks, Recreation and Historic Preservation  
Roberta Reardon, Commissioner, Department of Labor  
Michael Schmidt, Commissioner, Department of Taxation & Finance  
Brian Stratton, Director of Canals, NYS Canal Corporation  
RuthAnne Visnauskas, Commissioner, Homes and Community Renewal  
Senator Neil Breslin, 44<sup>th</sup> District  
Senator Anna Kaplan, 7<sup>th</sup> District  
Assemblywoman Donna Lupardo, 123<sup>rd</sup> District  
Assemblywoman Helene Weinstein, 41<sup>st</sup> District

**Subject:** Review of Progress for the 2019 Regional Economic Development Council Initiative

**Date:** December 18, 2019

---

We are honored to serve as the Strategic Implementation Assessment Team (SIAT) for Governor Cuomo's Regional Economic Development Council (REDC) Initiative. In the past nine years, the REDC initiative has transformed how New York coordinates and invests in economic development. The REDC initiative has been enhanced with a fourth round of the \$100 million Downtown Revitalization Initiative.

In 2011, each Regional Council was charged with developing a Strategic Economic Development Plan that emphasized their region's unique assets and provided strategies to harness local resources, both human and capital, to stimulate regional economic development and create jobs statewide. The Strategic Economic Development Plans continue today with annual updates to address emerging state and regional challenges and opportunities, as well as updates that reflect priorities identified by many regions in Upstate Revitalization Initiative Plans, and in Western NY by the Buffalo Billion Plan.

In 2019, Regional Councils were asked to address state priorities that included working with local businesses and communities to identify childcare needs and develop potential solutions;

developing an economic and environmental justice strategy for the region; supporting the Workforce Development Initiative; tracking the progress of the strategic economic development plan and projects funded through the Consolidated Funding Application (CFA); and supporting community investment in placemaking and downtown revitalization.

Each region has a unique set of strategies to achieve greater economic prosperity and each has identified key regional industry clusters. Regional Councils were also asked to continue advancement of regional strategic economic development plans, and identification of projects that implement related strategies, including key industry clusters, regional business incubators, the regional Opportunity Agenda, veterans' participation in the workforce, and engagement of local government in the Regional Council process.

The Regional Councils again supported the Downtown Revitalization Initiative (DRI), a community planning process where one community in each region receives assistance to identify and develop the key ingredients needed for successful downtown revitalization. Regional Councils solicited interest in the program and chose one community each from among the many applicants. The ten DRI areas selected in 2019 include: Baldwin in the Town of Hempstead, Fulton, Hornell, Niagara Falls, Peekskill, Potsdam, Schenectady, Seneca Falls, Staten Island, and Utica. A local planning committee in each DRI will develop a vision, articulate a plan, and identify projects and other implementation steps with the help of \$10 million per DRI.

Annual reports were submitted by the Regional Councils and in November each presented its progress and plans to implement the region's economic development strategies. Each also reported on the status of DRI plans in the region. Regional Councils continue to build upon regional strengths, focusing on key and emerging industries as they seek new businesses and support incubators that can generate marketable ideas for the next generation of products. Regional Councils are also partnering with educational institutions, employers, and service providers to identify and train prospective employees and match them to jobs that are available in the region.

### **2019 Annual REDC Competition**

Our task was to evaluate all ten regions based on the competition criteria and Regional Council priorities as described in the 2019 REDC Guidebook. Criteria used to evaluate the Annual Reports included but was not limited to:

#### **Performance**

- Impact on job creation and retention
- Business growth and leverage of private sector investments
- Economic activity as a result of regional strategies

#### **Progress**

- Implementation of regional strategies
- Execution of strategies addressing emerging state and regional challenges and opportunities
- Advancement of prior round priority projects

### **Planning**

- Ability to take the next steps in growing the regional economy
- Collaboration with local governments

### **Projects**

- Identification of projects to advance state and regional priorities
- Identification of projects in the region that would revitalize downtowns

### **Participation**

- Engagement of the public and other stakeholders in the Regional Council process
- Regional unity and support of the progress report

### **Awards**

All ten regions competed for up to \$150 million in capital funds and \$75 million in Excelsior Tax Credits for projects identified by the Regional Councils as priorities in their regions. In addition, each region will receive \$10 million to implement projects identified through the Downtown Revitalization Initiative, and projects from all ten regions submitted through the CFA were eligible for over \$525 million in other state agency funds.

The Strategic Implementation Assessment Team has identified five regions that merit the designation as Top Performers and a share of \$100 million in ESD Capital Grants. Selection of the Top Performers continues to be a difficult challenge, as the regions are taking a variety of approaches to very different challenges and opportunities and are all making progress implementing their strategic plans. However, after careful consideration we selected as Top Performers the following regions: **Capital Region, Central NY, Long Island, Mohawk Valley, and Southern Tier.**

- The **Capital Region Regional Economic Development Council (CRREDC)** is taking a variety of actions to retain, build, and train a workforce that is prepared for jobs that match the region's focus on life sciences, manufacturing, and computer programming. The Talent strategy for the region continues to be a cradle-to-career approach to workforce development that connects job-seekers and employers with higher education institutions. For example, Hudson Valley Community College's new Haas Center for Advanced Manufacturing Skills and the Albany College of Pharmacology's new Center for Bio-Manufacturing Education and Training are contributing to the creation of training-to-industry pipeline and advancing both the Talent and Next Tech regional strategies. Recent data shows that jobs in the University R&D sector grew by over sixteen percent. Innovate 518, an Innovation Hot Spot, promotes the Lift-Off strategy and the key cluster of R&D to Commercialization by connecting startups with resources available in the Capital Region, including sourcing \$500,000 of funding in 2018. The Capital Region is one of 47 US metro areas that spent more than \$1 billion on R&D last year. Since its initial plan was adopted, placemaking has been the priority for the CRREDC as reflected in its "Metro" strategy. Projects are underway in the Downtown Revitalization Initiative (DRI) communities of Glens Falls, Hudson, and Albany and investments in the Saratoga Performing Arts Center

will benefit Saratoga Springs and nearby communities. Schenectady was chosen as the DRI community for 2019.

- The **Central New York Regional Economic Development Council (CNYREDC)** continues to adhere to winning strategies from its Upstate Revitalization Initiative plan, as well as its original strategic economic investment plan. The region continues to support entrepreneurs in the tech sector and agriculture through programs and incubators including Genius NY, the Grow-NY Food Innovation and Agriculture Technology Business Challenge, and Syracuse Center of Excellence for Environmental and Energy Systems. Over the past year, investments in SyracuseCoE have allowed collaborators to secure more than \$17 million in additional funding to support industry-university collaborations. Career exploration programs starting no later than middle school are being advocated to encourage youth to consider agriculture as well as other career paths. CNYREDC continues to support projects and programs that are enablers of prosperity, such as scholarships and job training for underserved youth provided by anti-poverty initiatives like the Alliance For Economic Inclusion and Say Yes Syracuse, and pre-apprenticeship programs in agriculture and film. The region, in partnership with the Mohawk Valley, has demonstrated significant progress towards its goal of becoming a global hub for unmanned systems. Syracuse University also established an unmanned system policy institute. Central NY is positioning itself as a logistics hub, particularly for agribusiness, with upgrades to ports, airport, and a new USDA export office. The DRI strategic investment plan was completed for the City of Auburn and Fulton was selected as the DRI community for 2019.
- The **Long Island Regional Economic Development Council (LIREDC)** has a diverse approach to workforce development, with strong academic partnerships that support its focus on the commercialization of discovery. An artificial intelligence (AI) cluster has emerged, and Stony Brook University's new AI Institute for Discovery and Innovation will become a regional HUB. Long Island's workforce grew by nearly 12,000 jobs in the past year, with the region investing in training workers to fill jobs in biotech industries. To help maintain the workforce and combat the outmigration of young workers, the LIREDC supports place-making and is encouraging mixed-use development near transportation hubs and the transformation of former big box stores/malls to mixed-use places. The LIREDC is supporting mixed-use and affordable housing with funds for improved sewers in the 2018 DRI community of Central Islip and other downtown areas. Potential revitalization projects in Baldwin in the Town of Hempstead will be identified in Round Four of the DRI. The LIREDC recognizes the need to address a range of job opportunities, such as agritourism and jobs associated with offshore wind power. A new work group will seek opportunities to develop a supply chain to support the construction, installation and operation of offshore wind projects, while other regional leaders will work with labor to prepare the workforce for wind industry-related careers.
- The **Mohawk Valley Regional Economic Development Council (MVREDC)** is encouraging placemaking investments and daycare centers in downtowns to attract and retain a young and growing workforce. Providing transportation alternatives for the

workforce is on the front burner, including efforts to bring jobs closer to where people live, provide a more walkable environment with pedestrian trails and bike paths, develop sites on bus routes, invest in Centro stations, and invest in downtown centers. More than 500 market rate and affordable housing units are planned or under construction in community centers. The 2019 DRI community of Utica also proposed a people-centric placemaking approach to leverage DRI investments. The region is taking a holistic approach to economic development and workforce development. For example, to develop a workforce for food systems MVREDC stressed creating a network of colleges serving rural areas to identify pathways to age-related jobs and working with middle schools using mobile classrooms. The MVREDC is relating STEM to agriculture, has the only PTECH agriculture program in the state, and is working with local schools to realign local curricula to prepare students for future jobs, including those in agriculture. To address a recurring concern over the lack of workers appropriate for open jobs, colleges are providing credit for apprenticeship programs and offering micro credentials that support middle-skills jobs in advanced manufacturing. In 2017 more than 100 advanced manufacturing jobs were added with wages 28% higher than the regional average wage.

- The **Southern Tier Regional Economic Development Council (STREDC)** is clearly committed to the strategies in its winning Upstate Revitalization Initiative plan, making large investments into high profile anchor projects in Binghamton, Johnson City and Endicott and using the CFA process to support jobs in manufacturing and agriculture, the region's downtowns, and drivers of innovation. \$1.5 billion in private funds have been leveraged for projects throughout the region for a total investment of over \$1.8 billion and the creation/retention of more than 25,000 jobs. The STREDC seeks to make greater Binghamton a destination for talent and has broken a long trend of work force decline with an increase in both the numbers of people in the labor force and the number employed in 2018. It continues to strengthen its entrepreneurial ecosystem through innovation hot spots and business incubators. The region has experienced great growth in attracting venture capital funding, and it continues to have positive job growth in key sectors such as advanced manufacturing, transportation equipment manufacturing, food processing, and healthcare. In the past year, construction began on the new Lake Erie College of Osteopathic Medicine in Elmira. STREDC is working to increase its market share of the food and agriculture industry by addressing workforce and growing season challenges. This year it joined with two other regions to launch Grow-NY, a food and agricultural business competition to advance tech and innovation, receiving nearly 200 applications for prizes for new businesses. Hornell was selected as the region's fourth round DRI community.

Five regions should receive a share of \$50 million in ESD Capital Grants to help attract and grow business in their regions. The following regions are designated as Regional Awardees: **Finger Lakes, Mid-Hudson, New York City, North Country, and Western NY.**

- The **Finger Lakes Regional Economic Development Council (FLREDC)** is maintaining its momentum with its clear focus on reducing poverty, growing jobs, increasing regional

wealth, and driving private sector investment. The region also established new priority areas based on its current strengths and opportunities, such as growing incumbent firms, proactive outreach to targeted clusters, development of a regional brand, focusing on immediate and long-term talent needs, and investment in the urban core. Two new key industries were identified - Healthcare & Life Sciences and Software & Internet Technology - and support continues for the key cluster of Optics/Photonics/Imaging through industry attraction and the \$10 million Luminare NY accelerator program. Investments from the Upstate Revitalization Initiative like AIM Photonics and ROC the Riverway are facilitating an ecosystem of economic development and public-private partnerships, and Eastman Business Park is gaining vibrancy as a place to work, live, learn, and play. Through the DRI, the FLREDC is supporting placemaking efforts outside of Rochester, such as in the DRI community of Seneca Falls. Efforts to attract and retain young people to the region have been successful, in part due to the attraction of vital, dense, and culture-and entertainment-rich urban areas. The challenges of poverty and environmental justice are being addressed through a comprehensive approach led by the Rochester-Monroe Anti-Poverty Initiative which engages institutions large and small to work together on multiple issues, including education, healthcare, transit, child care and more.

- The **Mid-Hudson Regional Economic Development Council (MHREDC)** is building on its success by encouraging existing businesses to grow creating new jobs and an environment that brings in new businesses to the region. Several incubation programs are contributing to the future pipeline of talent as evidenced through the growth of regional cluster jobs which support the region's broader strategy of WORK and PLAY. MHREDC has adjusted its LIVE initiative to include retaining and attracting residents to the region, which is complemented by efforts to strengthen the region's identity as a premier tourist destination. Efforts have focused on increasing visitor spending and stimulating growth across related industries (food/beverage, accommodations, arts and recreation). Peekskill's selection as a DRI community will allow the city to link existing community assets and increase offerings in tourism, the arts, media, and light manufacturing. Regional strategies have evolved to include support for the manufacture of local products like grape juice and cider, and the expansion of the film and television production industry. MHREDC has developed strategies to address long-term unemployed in the healthcare field, recruiting people to re-enter the workforce through basic skills training. MHREDC also identified childcare projects targeted around extended hours for the hospitality industry and is currently working with corporate park owners and other major employers to identify locations for childcare facilities convenient to multiple employers.
- The **New York City Regional Economic Development Council (NYCREDC)** is focused on long-term planning to retain young people and support the economic growth of underserved populations and all neighborhoods across New York City. Priority projects receiving NYCREDC support must indicate long-term economic sustainability and projections for economic growth in terms of job creation, investment, and community benefits. Unemployment is at an all-time low of 4.2%, but it does not account for people

who stopped looking for jobs or who are underemployed. Multiple efforts target inclusion of various special populations in the workforce, such as high-risk court-involved youth, veterans, underemployed women, and low-income girls and women. City-wide pre-K for all 4-year-olds and care for 3-year-olds in high-need school districts helps parents return to the workforce, but gaps remain that the NYCREDC recommends for further study. There has been an influx of pharmaceutical, healthcare, and bio-IT companies to the region, and NYCREDC supports both new projects in its key cluster of Life Sciences, as well as upgrades and expansion of previously supported life sciences projects like the BioLabs@NYU Langone incubator which provides startups with collaborative space, research equipment, and business support. Support is also provided for small and mid-size local manufacturers and artisans at the Greenpoint Manufacturing and Design Center where average salaries are \$51,000. To connect youth to tech jobs, the NYCREDC described an approach that would begin preparing students early in the education process, train teachers to overcome their own technology skill gaps, and expand use of community colleges.

- The **North Country Regional Economic Development Council (NCREDC)** identified several priorities for 2019, including building a regional identity, encouraging wise use of outdoor recreational assets, addressing the impacts of extreme weather on the tourism and agriculture industry, unlocking the economic potential of Fort Drum soldiers transitioning out of the Army, and seeking reliable cellular service. It is working successfully to implement a 2018 goal of hosting international sporting events, supported by investments in lodging and tourism facilities, such as the \$17 million Saranac Lake Resort, a children's museum in Potsdam, the region's 2019 DRI community. The NCREDC continues support for the Transportation Equipment cluster, working with Canadian and Norwegian industries that have invested in projects like a second Norsk Titanium facility that will open early in 2020. Fostering relationships with Canadian industries have bolstered job growth, exports, and diversified the types of manufacturing in the region. Agriculture is an important sector of the regional economy and is being supported by investment in high-tech year-round food production, such as expanded greenhouse space and robotic technology at Agbotics. The region's young adult population remained steady, but labor force numbers are dropped 3.6 percent from 2016-2017. To tackle that issue the NCREDC is taking multi-faceted approaches which include co-working facilities and business incubators to aid small businesses and attract entrepreneurs to the region, job training for low-income residents, new programs at regional colleges, and identification of solutions to childcare issues.
- The **Western NY Regional Economic Development Council (WNYREDC)** continues its focus on creating job opportunities and building the quality of life that will attract and retain young adults. With unemployment at the lowest since 1990, the region is faced with the challenge of ensuring employers have access to talent to fill job openings and grow businesses. Programs that showcase training in the region include the Alfred State College Burgard Advanced Manufacturing Program that prepares high school students for a career in advanced manufacturing, Gerard Place on Buffalo's East Side where students receive both vocational and life skills training, and Buffalo Manufacturing Works in the Northland

Corridor which has secured more than \$1 million in federal funding through global partnership models with NASA, MTC of the UK, NAMIC in Singapore, and others. REDC has made the East Side Corridor a priority to improve quality of life in Buffalo. WNYREDC has invested both CFA projects and Buffalo Billion funds in multiple projects to help provide housing, infrastructure, and assets to help build the community. Investments in smart growth have resulted in brownfield remediation, preservation of agricultural land and expansion of cropland; and protection of waterfront. WNYREDC is implementing a strategy to increase tourism and extend visitor stays, supporting tourism projects like the Aquarium of Niagara and the National Comedy Center in Jamestown. DRI funds for 2019 invested in the Niagara Fall's Bridge District will build on recent state investments in the aquarium and train station, as well as commitments to remove the parkway along the along the Niagara Gorge Corridor.

### **Conclusion**

In each of the regions, the Assessment Team was impressed by the continued dedication of the Regional Council members and their selection of strategic and realistic projects. We were also impressed by the work group volunteers, and staff of the Regional Empire State Development offices who serve the Regional Councils. We continue to believe that the REDC process is a recipe for success, bringing together the key ingredients of economic development, academic advancement of new ideas and products, and development of a workforce across all age groups and socioeconomic strata. While we may only recommend five regions as top performers, we believe all of the regions are winners. We extend our thanks and our congratulations to all Region Council members for the outstanding work they are doing to strengthen New York's economy.

# Mid-Hudson Regional Economic Development Council

## 2019 Annual Report Assessment

### I. Performance

#### a. Impact on job creation and retention

##### Strengths

- From 2017-2018, average annual private employment increased 1 percent.
- From 2017-2018, direct tourism employment increased 6.5 percent.
- From 2011-2018, annual unemployment rates dropped significantly (from 7.4 percent in 2011 to 3.8 percent in 2018).
- From 2011-2018, average annual employment increased in the Food and Beverage Manufacturing industry cluster (43.3 percent), Arts/Entertainment/Recreation (21.2 percent), Film and Television Production (30.8 percent), Transportation and Warehousing (19.2 percent), and Healthcare and Social Assistance (16.6 percent).
- From 2011-2018, wage growth has been strong in the Biotech and Biomedical cluster (30.3 percent) and Finance and Insurance cluster (28.9 percent).

##### Weaknesses

- Since 2011, labor force participation has remained stagnant at about 64 percent, an indication that a portion of the population is not engaged in the labor force.
- Employment numbers have fallen in Biotech, Finance and Manufacturing since 2011. Consistent with past reports, employers say they have open positions but can't find the right talent with the right skills. These three sectors have the highest average annual wages across all the industry clusters in the region.
- The number of higher paying jobs have declined and have been replaced with lower wage jobs such as those supporting tourism.

#### b. Business growth and leverage of private sector investments

##### Strengths

- From 2017-2018, the number of Food and Beverage Manufacturing establishments grew over 23 percent, and the number of Accommodation and Food Services establishments grew 13 percent.
- From 2011-2018, the ratio of total project cost to total ESD Capital Fund awards for all priority projects over the past 8 rounds was 14 to 1, and 7 to 1 for all CFA projects.

##### Weaknesses

- From 2011-2018, the number of establishments in the following industry clusters declined: Finance and Insurance (8.7 percent), Information Technology (6.7 percent), and Manufacturing (11 percent).

#### c. Economic activity as a result of regional strategies

##### Strengths

- A major contributor to growth in the region is tourism. In 2018, visitor spending exceeded \$5.3 billion with 52,675 direct jobs in the tourism industry (an increase of 6.5 percent in one year).

#### Weaknesses

- None noted.

## **II. Progress**

### **a. Implementation of regional strategies**

#### Strengths

- Projects aligned with placemaking and smart growth concepts that improve housing, public infrastructure, and public spaces. For example, the just-completed Queen City Lofts in Poughkeepsie which created a mix of 69 affordable and market rate apartments, as well as Energy Square in Kingston which replaced a vacant bowling alley with affordable housing and community space.
- Efforts to advance the MHREDC PLAY strategy have focused on strengthening the region's identity as a premier tourist destination, increasing visitor spending, and stimulating growth across related industries (food, beverage establishments, accommodations, arts and recreation).
- The MHREDC described several placemaking efforts that are ongoing in the region, and how prior projects funded through the Consolidated Funding Applications (CFA) are contributing to revitalization.

#### Weaknesses

- The region has identified several challenges that limit residents of the region to participate in the labor force. Public transportation for workers was cited as a top regional issue but no plans were outlined in to address those needs.

### **b. Execution of strategies that address emerging state and regional challenges and opportunities**

#### Strengths

- The MHREDC is seeking to increase awareness and understanding of environmental justice, with ongoing data collection to inform the MHREDC about challenges and opportunities. It is encouraging project sponsors to actively engage all groups affected by a project.
- The MHREDC is working with the Child Care Council of Westchester to develop a baseline analysis of child care supply and demand in the region. In reviewing proposed CFA projects, they looked for applications that identified strategies for addressing the child care needs of the applicant's workforce.

#### Weaknesses

- None noted.

### **c. Advancement of prior round priority projects**

#### Strengths

- 83 percent of past priority projects and 89 percent of other CFA projects are completed or on schedule.

- LEGOLAND New York Resort is on track to open in 2020. When it opens, it will be the biggest LEGOLAND Resort ever developed with more than 50 rides/attractions and a 250-room hotel.
- Xin Shi Ji, a film and production company, completed construction of a former equestrian facility in Orange County and opened in the spring of 2019.
- Training and research staff are now operating at the Research Institute at the Center for Discovery in Sullivan County, and renovation and redevelopment of associated buildings are underway.

#### Weaknesses

- None noted.

## III. Planning

### a. Ability to take the next steps in growing the regional economy

#### Strengths

- Positive trends in the region generally relate to the future labor force, such as maintenance of a steady young adult population (ages 20-34), strong high school graduation rates (88.7 percent), and increasing immigration rates (10 percent growth over the past five years). To maintain or accelerate this trend, MHREDC efforts have been focused on improving quality of life for residents by expanding housing, healthcare, parks, recreational and open spaces.

#### Weaknesses

- The region has seen significant demographic shifts in the past few years. Since 2010, there's been a significant domestic out-migration in all seven counties while international migration into the region has kept population rates steady. The immigrant community now accounts for 18 percent of the total population in the region. The current education and training system are not well positioned to integrate such new residents into the local labor market.
- The availability of child care is limited with only 72,919 child care slots available for approximately 128,705 children under age 6 in the Mid-Hudson region. Child care is one of the top reasons many residents completely opt out of the labor force.
- There is little indication in the report that the Council is actively engaged with the region's higher educational institutions on workforce development, commercialization of research, or business support through Innovation Hot Spots and Incubators.

### b. Collaboration with local governments

#### Strengths

- The MHREDC actively engages with businesses, not-for-profits, and municipal leaders throughout the region to better understand which investments will generate the best return on investment.
- This past year, the MHREDC facilitated several events to highlight the federal Opportunity Zone program to more than 340 municipal leaders, businesses, developers, non-profits, and local government agencies. As of 2019, the four winning municipalities from the Mid-Hudson's Opportunity agenda all fall within the Opportunity Agenda.

#### Weaknesses

- None noted.

## IV. Projects

### a. Identification of projects to advance state and regional priorities

#### Strengths

- Five of the proposed 21 projects address childcare needs in the region, such as Healthy Kids Extended Monticello Daycare in Sullivan County, which will convert a vacant VFW building into an affordable licensed daycare providing extended hours and weekend services to support the emerging 24-hour casino community.
- MHREDC is supporting the food and beverage cluster, as well as the state's craft beverage program, with projects like a new grape juice bottling facility in the Town of East Fishkill, and adaptive reuse of an old factory building for new facilities for Graft Cider, LLC in the City of Newburgh.
- To address skills gaps in the workforce, the MHREDC supported projects like equipment purchases for Manhattanville College's Clinical Learning Laboratory for School of Nursing and Health Sciences that will create a pipeline of newly qualified nurses. It also supported an expansion at Instrumentation Laboratory where one of the results will be re-establishment of the internship program.
- A new priority industry for the region is Film and Television Production, leading the MHREDC to support a one-stop-shop film/TV facility in Newburgh that will employ residents and host a job training and mentorship program.
- Several projects were identified to advance the MHREDC PLAY strategy, such as additional visitor facilities in the Village of Highland Falls outside the gate to West Point, and a new hotel on the grounds of the Culinary Institute of America in Hyde Park.

#### Weaknesses

- There's opportunity to broaden the number of initiatives that support the region's broader strategy of LIVE since currently only 4 of the 21 proposed priority projects are linked to this strategy.
- There did not seem to be priority projects that strongly aligned with environmental justice priorities, though the region has raised awareness of potential environmental justice impacts.

### b. Identification of projects in the region that would revitalize downtowns needs

#### Strengths

- Ten of the priority projects have a downtown revitalization component. For example, Edge-On-Hudson Waterfront Open Space in Sleepy Hollow will provide pedestrian paths, bike trails, and river sport opportunities.

#### Weakness

- None noted.

## V. Participation

### a. Engagement of the public and other stakeholders in the Regional Council process

#### Strengths

- To streamline the implementation of the regional strategy, the MHREDC reduced the number of work groups from eight to four, which align with the LIVE, WORK, PLAY strategy and focuses specific attention on workforce development.
- In collaboration with not-for-profit organizations, county elected officials and regional economic development partners, the MHREDC hosted 36 meetings, presentations, workshops and interviews throughout the seven-county region this year, with a total attendance of 3,100 stakeholders.
- In 2019, the MHREDC received more CFA applications than any other region (404), and the largest number of Downtown Revitalization applications (23) statewide.

Weaknesses

- None noted.

**b. Regional unity and support of the progress report**

Strengths

- None noted.

Weaknesses

- While there were no priority projects proposed in Ulster in 2019, the majority of projects proposed in 2018 were in Ulster and Orange Counties.
