## 2011 CFA Scoring and Process Memo

## 2011 Regional Council & Consolidated Funding Applications

The Regional Economic Development Councils are a community driven, regional approach to economic development in New York State. Each of the ten Regional Councils was tasked with developing a five-year strategic plan that included a comprehensive vision for economic development for that region, regional strategies to achieve that vision, and specific priority projects that are significant, regionally supported and capable of stimulating economic investment.<sup>1</sup>

To incentivize the planning process, the Regional Councils competed for \$200 million in ESD capital funds and tax credits based on their Strategic Plans. According to the enabling legislation as passed by the New York State legislature and signed into law by the Governor, “funding will be pursuant to a plan developed by the chief executive officer of the New York state urban development corporation and based in part on a competitive selection process among the regional economic development councils and will support initiatives based on anticipated economic development benefits. Such moneys will be awarded by the New York state urban development corporation at its discretion.”<sup>2</sup>

Pursuant to the statute, the Empire State Development Corporation developed a competitive process in which Regional Council Strategic Plans containing recommendations for funding made by the local councils were reviewed by a Strategic Plan Review Committee. The Committee was comprised of nationally recognized experts in planning and economic development and state Commissioners. The Committee reviewed each region’s Strategic Plan based on established criteria that included a clearly articulated regional economic development vision, robust public and stakeholder engagement in the planning process, meaningful strategies and priority projects aligned with regional goals and objectives, an implementation agenda, and performance measures.

The Review Committee provided an assessment of each plan<sup>3</sup> and made recommendations to Kenneth Adams, President & CEO, Empire State Development Corporation of the four plans that most closely aligned with these criteria.<sup>4</sup> President Adams accepted the recommendations of the Committee and pursuant to his statutory powers as head of the Urban Development Corporation awarded four regions with the top Strategic Plans up to \$40 million in funding consisting of \$25 million in capital grants and \$15 million in Excelsior tax credits for priority projects identified in their Strategic Plans. The balance of the incentives were awarded to priority projects in alignment with the Strategic Plans of the Councils.

In addition, project sponsors applied for up to \$800 million in economic development resources available from nine state agencies and 29 existing programs through the new Consolidated Funding Application (CFA). The CFA allows businesses and other entities to apply for multiple agency funding sources through a single, web-based application. Awards for CFA projects were made based

<sup>1</sup> See Attachment A: Regional Council Guidebook: “A New State Government Approach to Economic Growth”, page 4.

<sup>2</sup> See Chapter 54 of the Laws of 2011, Capital Projects Budget, page 595.

<sup>3</sup> See Attachment D: Regional Documents containing materials for each region, including the Strategic Plan, Review Committee Assessment and CFA Projects.

<sup>4</sup> See Attachment C: Memo to Kenneth Adams from members of Strategic Plan Review Committee, December 5, 2011.

on the endorsement of the local Regional Council<sup>5</sup> and the technical program review of the agencies providing resources, subject to interagency team analysis and agency discretion.<sup>6</sup>

The interagency team reviewed projects based on relevant factors including Regional Councils Strategic Plans and designation of priority projects, project alignment with regional goals and objectives, funding availability and regional need.<sup>7</sup> Priority projects are those specifically enumerated in the Regional Council Strategic Plans and identified as significant, regionally supported and capable of stimulating economic investment.

The interagency team consisted of career staff from relevant agencies and authorities' with detailed knowledge of their respective CFA program funding. This group conducted an analytical assessment that provided the basis for project funding recommendations made by individual agencies for final approval by respective agency or authority head. As provided in the budget, the Regional Council capital fund was awarded by ESD in its discretion.

This process resulted in funding of projects that aligned with a long term, regionally generated strategic plan and are capable of stimulating economic growth and investment.

Dall Forsythe, Senior Fellow, Wagner School of Public Service, New York University  
Walter Broadnax, Professor of Public Administration, Maxwell School, Syracuse University

RE: Strategic Plan Review

Date: December 5, 2011

---

Thank you for inviting us to serve on the Strategic Plan Review Committee for New York State's Regional Economic Development Councils. We are honored to be a part of Governor Cuomo's effort to transform how New York coordinates and invests in economic development. In a matter of months, New York State has changed course from a top-down development model to a community-based approach that emphasizes each region's unique assets, harnesses local expertise, and empowers communities to stimulate regional economic development and create jobs statewide.

In launching the Regional Economic Development Councils, Governor Cuomo noted that "[n]o one knows their regions better than the people who live there. Yet for too long, the State has imposed economic development plans that haven't offered the flexibility for regions to make their own decisions about their future." The Councils, comprised of local experts and stakeholders from business, academia, local government, and non-governmental organizations, were challenged to develop strategic plans that emphasize each region's unique assets.

Over the past three weeks, we have had the privilege and responsibility of assessing the work of the Councils, both in their written plans and their oral presentations. We were impressed and inspired by the results of the collaborative strategic planning process. In our review of the plans, several things became apparent.

First, this is a truly galvanizing initiative. It has stimulated cooperation in every part of the state – across sectors, across jurisdictions, and even across historically competitive institutions.

Second, all of the Councils undertook this effort with a tremendous sincerity of purpose, serious focus and tireless dedication. The obvious commitment of all those who lent their voices and talents to the deliberations should be commended.

Third, the Councils and the people they represent are passionate about their regions and about the potential to grow a vibrant economy.

Fourth, every region of the State is rich with talent, resources, innovation and promise, and the work of the Councils will enable New York to capitalize on these strengths.

And perhaps the most important and obvious of all conclusions: there were no clear winners and losers in this process. Each Plan was a powerful blueprint for growth and job creation in the region.

Development of the strategic plans united regional leaders who were not accustomed to working together on economic development issues and reflected the participation of thousands of residents who enthusiastically embraced the process. Each Plan sought to exploit the region's strengths, while honestly assessing and addressing weaknesses, and offered a realistic vision for the region that could only be developed by those who know the region best.

While all of the plans were of high quality, demonstrating a passion for improving the economic vitality of the region and the state, our task was to use the Strategic Plan Scoring Criteria identified in the Regional Plan Guidebook to identify the four plans with the greatest potential to bring transformational change. The criteria, as outlined below, required a bold regional economic development vision, a robust process for stakeholder participation, meaningful strategies for achieving their goals, an implementation process committed to outcomes, significant leverage of public resources and performance measures:

1. Regional Economic Development Vision (5%)
2. Process (10%)
3. Strategies (35%)
4. Implementation (15%)
5. Leverage Resources (15%)
6. Performance Measures (20%)

The Committee has identified the following Strategic Plans as most closely aligning with these criteria:

- North Country
- Central New York<sup>i</sup>
- Long Island
- Western New York

Identifying the most exemplary plans was a daunting task given the strength of each of the proposals. Each of the 10 regions offered an energetic plan of action, worthy of mention.

The New York City Regional Plan advances bold projects that will bring jobs and revitalization to each of its boroughs, while promoting interregional cooperation and growth. Many of the City's projects can be furthered with economic development funds available to the State through the New York New Jersey Port Authority, and the Committee recommends that New York City's plan receive funding from the Port as well as from the Regional Council process. The Committee also encourages the State and the Chairman's Committee to work with the City to address regulatory hurdles that may impede the Plan's transformational initiatives.

The Finger Lakes Region provides a high quality blueprint with a plan to accelerate its transformation to a diverse, knowledge-based economy by building on strengths, as well as its successful history of collaboration between public and private institutions, to become a national leader in innovation and commercialization. The Region presents focused projects in areas such as renewable energy and technology innovation, which directly connect to their strategic goals.

The Southern Tier's plan presents a bold vision that strikes a balance between a high tech economy - grounded in higher education and larger employers – and the appeals of small-town life. The plan provided a comprehensive review of their strengths and weaknesses and identifies strategies that

advance recovery, economic growth and uniquely thriving down towns.

Mohawk Valley's strategies are based on leveraging its strengths to build new products and new growth opportunities. Mohawk Valley's emergence as a nanotechnology leader will complement its increasingly diverse economic base.

The Capital Region's Plan identifies broad goals that focus on leveraging the area's robust research capacity and revitalizing urban centers. The plan promotes success by maximizing the region's existing strengths – especially in high-tech industry and research.

The Mid-Hudson's Plan, which stresses its unique location north of New York City and south and east of New York's upstate counties, recognizes the skills of its citizens and high quality of life are all assets for future economic development. The plan establishes a cogent strategy for expanding the region's biomedical capacity.

In each of the winning plans, the Committee was impressed by the intensity of the region's collaborative spirit, mission and purpose, forged by challenging economic circumstances. The projects that were identified by the regions were both strategic and realistic, reflecting a sober, judicious and multi-dimensional approach to economic growth. The Committee would like to make special note of the inclusive nature that these four regions brought to the process. The plans were owned and produced by multiple stakeholders, setting the stage for sustained attention and collective action over time.

The North Country's plan represents the first-ever coordinated and collaborative regional economic development effort in the largest geographic area in the competition. We are impressed by the sophisticated explication of the integrated nature of the Canadian and North Country economies, and by the region's powerful statement of support for broadband access as a key to growing small business throughout the region.

In Central New York, our panel is pleased to see that the Plan embraces the region's socio-economic diversity and specific measures (i.e. Say Yes to Education) to enhance the quality of life and the economic potential of those living in the region's urban core. The Central New York Plan also places a special focus on improving competitiveness in and connections to the regional, national and global economies by strengthening targeted industry concentrations that leverage its unique economic assets.

In Long Island, the Committee applauds the Regional Council's honest appraisal of its condition and its commitment to transforming low-income minority communities. The Council's focus on using the smart growth principle of transit oriented development (TOD) to shift from a sprawling development pattern to one that focuses on downtown revitalization positions the region well for sustainable development. Simultaneously it offers Long Island's existing downtowns a much-needed facelift that will provide a significant economic stimulus across the region. While addressing the region's challenges, Long Island's plan also seeks to build on successful cluster strategies from other parts of the United States.

In Western New York, the Committee is encouraged by the Regional Council's enthusiastic commitment to inclusiveness in the Region's economic resurgence. The Plan draws a compelling connection between a sound education, targeted training and job opportunities for minority youth. The Plan also advances a solid strategy for smart growth investment that will help to revitalize urban cores and attract private investment. The Region's commitment to a holistic approach to downtown revitalization is a

central and distinctive element of its plan. And as with the North Country, Western New York recognizes and seeks to exploit the inextricable linkage between the Canadian economy and its own.

In this exciting process, all of the regions are winners – partnerships and cooperative strategies have developed, many for the first time, and these plans will serve as a living document which will guide economic development in the regions and the state for many years to come.

We would like to extend congratulations to all of the Regional Councils for their outstanding work. Thank you again for inviting us to be a part of this truly transformative initiative. State agencies will continue to make all final decisions about how resources are allocated. For the initial competition, however, a Strategic Plan Review Committee will analyze and compare each region's Strategic Plan.

---

<sup>i</sup> Dr. Walter Broadnax, Professor of Public Administration at The Maxwell School of Syracuse University, recused himself from assessing Central New York's regional plan, given Syracuse University's role in developing the plan.

## Strategic Plan Review Committee Assessment

## CAPITAL REGION REGIONAL COUNCIL

### Strategic Plan Scoring Criteria

#### 1. REGIONAL ECONOMIC DEVELOPMENT VISION – MAXIMUM 5 %

##### Discussion/Comments:

The Plan's vision lays out a collaborative process to build off the strengths and assets of the region to support a broad range of goals including small business development, entrepreneurship, workforce development and tourism.

##### Strength:

- At the core of the vision is collaboration and this theme is consistent throughout the Plan.

##### Weakness:

- The *Assessment of Existing Conditions and Economic Opportunities* is light on critical issues, challenges and opportunities impeding growth. It reads more as an inventory of resources and assets.

#### 2. PROCESS – MAXIMUM 10 %

##### Discussion/Comments:

The Council established five workgroups to focus on various deliverables of the Council, and another six subgroups under the Key Issues and Opportunities workgroup to dig deeper into topics such as resources, specialty areas, technologies, etc. The workgroups and subgroups comprised of Council members and eighty experts from within the region.

##### Strength:

- The Council developed a strong public outreach process.

##### Weakness:

- None noted.

### 3. STRATEGIES – MAXIMUM 35 %

#### Discussion/Comments:

The Council presents strategies to achieve each of its identified goals, along with expected outcomes to define and measure the success of the strategies. Within these strategies, 9 priority projects and 13 locally and economically significant projects are put forward, involving such ideas as developing a biomedical science and nano-medicine research alliance, establishing the region as a high performance computing capability hub, establishing a regional business resource center with loan fund.

#### Strengths:

- Strategies are comprehensive in scope.
- Strategies and projects acknowledge that the region's natural assets must play a key role in certain parts of the region.

#### Weaknesses:

- Despite the Plan's emphasis on collaborative strategies particularly with respect to advanced research, several of the proposed projects appear to focus on a small number of partners in the region.
- The Plan is silent as to the challenges, if any, that downsizing of the State workforce might have on the Region.
- Because the regional assessment did not identify weaknesses or threats, the strategies don't build from the challenges of the region.
- Specific economic development metrics (jobs, revenues, etc.) for many of the strategies and transformational projects are not provided.

#### 4. IMPLEMENTATION – MAXIMUM 15 %

##### Discussion/Comments:

The Plan includes an implementation agenda which identifies an operational structure for tracking implementation of the plan, supported by evaluation, monitoring, operations, and outcomes teams with distinct roles and responsibilities. A table provided a listing of transformational projects undertaken by the Council, transformational projects supported by the Council, and locally and economically significant projects.

##### Strength:

- The Plan provides an operational structure for tracking implementation of priority projects.

##### Weaknesses:

- Specifics for collaboration and public engagement going forward were not provided.
- The implementation table does not identify the project's current status or the source of non-state funding.

#### 5. LEVERAGE RESOURCES – MAXIMUM 15 %

##### Discussion/Comments:

For projects included in the implementation agenda table, most have total project cost and funding request identified. The Council suggests an overall leveraging of all projects identified of 11:1; one project suggested leveraging of 64:1, while some projects requested full project funding by the State.

##### Strengths:

- Some of the transformational projects reflect high levels of leveraged support.
- The plan clearly seeks to leverage the intellectual and financial resources of some of the Region's academic and business anchors.

##### Weaknesses:

- The source and firmness of the commitment of the non-State portion of funding for strategies and transformational projects are not identified.
- It is difficult to assess the status of leveraged dollars.

## 6. EVALUATION/PERFORMANCE MEASURES – MAXIMUM 20 %

### Discussion/Comments:

For each strategy identified in the Plan, expected outcomes are provided to define and measure success of the strategies. Many of the outcomes are defined quantitatively, in counts – often of jobs, businesses, programs, and students – and percentages (increase or decrease from current levels of funding, schools, businesses, jobs, degrees, etc.); some outcomes are defined more qualitatively. The Council also commits to measure project specific performance through such metrics as jobs created, cost per job, average wage per job.

### Strengths:

- The Council commits to measuring progress broadly (i.e. number of new collaborations) as well as for the specific transformational projects (i.e. job creation).
- The plan includes outcomes for each strategy with a timeline.
- The defined metrics for the strategies are appropriate.

### Weakness:

- Baseline data against which to gauge expected outcomes (i.e. expand broadband coverage by 10%) is not routinely provided; therefore it is difficult to determine how aggressive/realistic the outcome is.
