

2012 Regional Council Process & Consolidated Funding Applications

Background:

The Regional Economic Development Councils are a community driven, regional approach to economic development in New York State. Each Council is made up of 20 to 30 business, academic and government leaders from throughout the Region. In 2012, the Senate and Assembly majority committees selected one member from each region to be a voting Regional Council member.

In 2011, each of the ten Regional Councils were tasked with developing a five-year strategic plan that included a comprehensive vision for economic development for that region, regional strategies to achieve that vision, and specific priority projects that are significant, regionally supported and capable of stimulating economic investment.¹ Empire State Development Corporation developed a competitive process in which Regional Council Strategic Plans containing recommendations for funding made by each Regional Council were reviewed by a Strategic Plan Review Committee consisting of two State Agency Commissioners and three economic development experts. Members of the 2011 Review Team included: Dall W. Forsythe, Senior Fellow at the Wagner School of Public Service at New York University and former Vice President for Finance and Operations at The Atlantic Philanthropies; Walter D. Broadnax, Professor of Public Administration at The Maxwell School of Syracuse University; Bruce J. Katz, Vice President at the Brookings Institution and founding Director of the Brookings Metropolitan Policy Program; Joan McDonald, Commissioner of the New York State Department of Transportation; and Cesar Perales, New York State Secretary of State. On December 8, 2011, the Governor and Legislative Leaders announced the winners of the first round of competition and one year later 97% of Round One projects were under contract and/or progressing.

In 2012, the Councils went a step further and produced Strategic Implementation Agendas that built upon the progress from the first round and further developed and refined their Regional Five Year Strategic Plans by undertaking four primary activities: Establishing a framework to advance the Regional Strategic Plan; Implementing the strategies laid out in the Strategic Plan; Creating a project pipeline; and providing a progress report documenting the success the Council has had in implementing its Strategic Plan. These actions were designed to encourage and accelerate implementation, performance, and collaboration within the regions. Priority projects that aligned with each region's agenda were chosen by the Councils from the applications submitted to the Consolidated Funding Application portal. These projects were published in the regions' Implementation Agendas, which are publically available online at www.regionalcouncils.ny.gov. Projects were scored by both the state agencies and the Regional Councils. The agencies scored their projects based on a technical evaluation in adherence with existing funding program guidelines and awarded a project up to 80 points. The remaining 20 points were awarded by the Regional Councils, and were based off the following endorsement standards:

¹ See Attachment A: Regional Council Guidebook: "A New State Government Approach to Economic Growth", page 4.

Statewide Endorsement Standards

Regional Council members will determine the degree to which the application implements the regional strategic plan and assign the corresponding number of points as a score.

IMPLEMENTATION OF THE PLAN	DEGREE	POINTS
The proposal is identified as a priority project by the Regional Council.	Priority	20
The proposal is identified in the plan and has regional benefits.	Very Strong	15
The proposal advances the plan and has local benefits.	Strong	10
The proposal is consistent with the plan and has project level benefits.	Moderate	5
The proposal has limited relationship to the plan	Weak	0

2012 Competition:

To incentivize the implementation process, the Regional Councils competed for \$220 million in ESD capital funds and tax credits based on their Implementation Agendas. In 2012, five awards of \$25 million were made. The competition was split into two parts:

- First, the four regions with the 2011 Best Plans competed for two awards of up to \$25 million each in capital funds. Awards were made based on the progress the Regional Councils have made implementing their strategies and evolution of their strategic plans as outlined in their submitted Implementation Agendas including any revisions or updates.
- Second, the remaining six regions competed for three awards of up to \$25 million each in capital funds. Awards were made based on the progress the Regional Councils have made implementing their strategies and evolution of their strategic plans as outlined in their submitted Implementation Agendas including any revisions or updates.

The balance of the \$25 million in capital funds was divided among the five remaining regions. Each region will also be eligible for up to \$10 million in Excelsior Tax Credits to help attract and grow business in the region.²

According to the enabling legislation as passed by the New York State legislature and signed into law by the Governor, “funding will be pursuant to a plan developed by the chief executive officer of the New York state Urban Development Corporation and based in part on a competitive selection process among the Regional Economic Development Councils and will support initiatives based on anticipated economic development benefits. Such moneys will be awarded by the New York State Urban Development Corporation at its discretion.”³

To reflect the changing nature of the competition, the 2012 Strategic Implementation Assessment Team was led by Secretary of State Cesar Peralas and included Office of General Services Commissioner Roann Destito, Tax and Finance Commissioner Thomas Mattox, Environmental Facilities Corporation CEO Matthew Driscoll and Agriculture and Markets Commissioner Darrel Aubertine with support from the Brookings Institution, vis a vis Bruce Katz and Amy Liu. The SIAT reviewed each region’s Implementation Agendas based on established criteria and also traveled to each Region to view and tour the progress first hand. Each tour included a panel presentation that allowed for ample question and answer opportunities between the SIAT and Regional Council members. Each of the ten Regional Council visits included a tour of projects funded in the 2011 CFA which demonstrated Regional Council progress and accomplishments.

The SIAT provided an assessment of each plan⁴ and made recommendations to Kenneth Adams, President & CEO, Empire State Development Corporation of the five reports that most closely aligned with these criteria.⁵ President Adams accepted the recommendations of the Committee and, pursuant to his statutory powers as head of the Urban Development Corporation, awarded five regions with the top Implementation Agenda up to \$40 million in funding consisting of \$25 million in capital grants and \$15 million in Excelsior tax credits for priority projects identified in their Strategic Plans. The balance of the incentives was awarded to projects identified by the Councils as in alignment with their strategies and priorities.

In addition, project sponsors applied for up to \$600 million in economic development resources available from ten state agencies through the Consolidated Funding Application (CFA). The CFA allows businesses and other entities to apply for multiple agency funding sources through a single, web-based application. Awards for CFA projects were made based on the endorsement of the local Regional Council⁶ and the technical program review of the agencies providing resources, subject to interagency team analysis and agency discretion.⁷

⁵ See Attachment C: Memo to Kenneth Adams from members of Strategic Plan Review Committee, December 5, 2011.

⁶ See Attachment A: Regional Council Guidebook: “A New State Government Approach to Economic Growth,” page 11.

⁷ See Attachment A: Regional Council Guidebook: “A New State Government Approach to Economic Growth,” page 11.

In 2012, the CFA opened for applications on May 3 and closed on July 14. Prior to that, all details about CFA resources were made available online via the 2012 CFA Resources Available Document, the State Register and the New York State Contract Reporter. When the portal closed on July 14, agencies immediately began marking projects eligible or ineligible. All eligible projects were then made available to the Regional Councils for their scoring process and the agencies for their technical evaluation. Scores had to be finalized by September 15. After the SIAT Tours concluded, the Inter-agency team met to review the projects and make final funding decisions.

The interagency team reviewed projects based on relevant factors including Regional Councils Implementation Agendas and designation of priority projects, project alignment with regional goals and objectives, funding availability and regional need.⁸ Priority projects are those specifically enumerated in the Regional Council Reports, receiving a score of 20 from the Regional Council, and identified as significant, regionally supported and capable of stimulating economic investment.

The interagency team once again consisted of professional staff from relevant agencies and authorities' with detailed knowledge of their respective CFA program funding. This group conducted an analytical assessment that provided the basis for project funding recommendations made by individual agencies for final approval by respective agency or authority head. As provided in the budget, the Regional Council capital fund was awarded by ESD in its discretion.

This process resulted in funding of projects that aligned with a long term, regionally generated implementation agendas and are capable of stimulating economic growth and investment.

On December 19, 2012, the Governor announced that 725 projects totaling \$738 million had been awarded through Round Two of the Regional Economic Development Council initiative. Best Plan awards were given to Central New York, Mid Hudson, Southern Tier, North Country and Finger Lakes in adherence to the competition guidelines detailed above.

LONG ISLAND REGIONAL ECONOMIC DEVELOPMENT COUNCIL

Assessment of the 2012 Progress Report

Part One: Strategic Plan Update

Building on the 2011 Strategic Plan

A. Addressing weaknesses identified in the 2011 assessments

The Long Island Regional Economic Development Council (LIREDC) addressed all four weaknesses identified in the 2011 strategic plan. They provided a detailed implementation agenda that included a section on milestones and progress to date, and showed progress on core infrastructure projects that are part of complex community revitalization projects. They provided information about non-state funding sources for projects, although some very large projects do not have full funding identified.

B. Building upon strengths identified in the 2011 assessment

The LIREDC built upon the strengths of the 2011 plan by continuing an intense focus on four areas, with transformative projects that are geographically and demographically diverse and directly linked to identified strategies, such as efforts to grow the skilled workforce. The LIREDC continues to shape strategies to address the region's weaknesses, such as the need to provide economic opportunities to a wide and disparate socio-economic group. The updated plan also expands on previous efforts to leverage additional public and private resources. Finally, they expanded their outreach efforts to include the use of social media.

Strategies

The updated plan clearly describes the year-long effort to organize, coordinate, focus and refocus local, State and private resources. The regional strategies, which are geared towards fully developing the region's highly educated workforce, natural assets, high tech businesses and world renowned research centers were reviewed and reworked to better reflect the difficulties of managing this complex agenda. At the same time, the updated plan continues to address challenges of a stressed infrastructure, loss of young workers and the economic disparities, especially in some of the region's lower socio-economic areas.

The 2012 update maintains nearly all of the 2011 focus, with no major changes to the four strategy areas. However, the LIREDC updated the certain goals or objectives to reflect changing priorities, additional community input, and recognition of funding limitations. For example, the LIREDC revised its SEQR recommendation following additional stakeholder input; it added a project to extend the reach of Long Island farms and vineyards by providing services (e.g. storage, processing and marketing) to take advantage of an unforeseen opportunity; expanded workforce training efforts to address a continuing need; and incorporated tourism and history-based tourism opportunities into the plan.

Implementation Agenda

The LIREDC implementation agenda for 2012-13 includes the anticipated completion date and future plans or milestones for each Round 1 CFA transformative project, as well as its funding source, progress, and partners. However, the implementation agenda is silent regarding CFA projects not considered transformative, as well as other strategies and actions not funded through the CFA.

An example where the implementation agenda is silent is how to implement the general strategies for workforce and education, such as “promoting arts organizations” and “developing in-service training or professional development opportunities for high school guidance/career counselors.” Also, by not including non-state funded activities in the implementation agenda it was difficult to understand the contribution of collaborative work groups or the impact of LIREDC partnerships.

The priority projects recommended for funding in 2012-13 are closely related to the strategies in the plan. For example, the State partnership with Stony Brook University and Brookhaven National Laboratory to establish Long Island as a national center for energy research, development and manufacturing is directly linked to the overarching regional strategy “Inventing in Innovation.” The project is also linked to investing in natural resources via its likelihood of reducing energy consumption and investing in workforce due to the expected number of new technology jobs.

Part Two: Progress Made Implementing Strategies

Progress

A. Organizational progress

The LIREDC formed 5 key work groups with consisting of REDC members and stakeholders: Writers, Workforce & Education, Natural Assets, Innovation & Industry, and Infrastructure, as well as a Path Through History work group. LIREDC attributed its success in establishing itself as the “pre-eminent economic development authority for the region” to empowering more than 200 leaders in academia, business, labor and community organizations through the collaborative work group process. In 2012 they built on the collaborative process by reaching out to more partners, such a Native American tribe, and fostering a sense of cooperation amongst previously divisive groups and governmental units.

It is difficult to link the LIREDC with direct, hands on work on each project. However, it appears that the LIREDC has taken a strong and important role in bring the disparate groups together to work towards common goals.

The LIREDC indicated an awareness of the need for a project pipeline, and described working groups as being involved in reviewing proposals and identifying worthy projects. However, neither the process for getting a project noticed by a working group nor the criteria by which projects were selected or endorsed was described.

B. Examples of progress

The LIREDC has advanced all of its major projects as well as a significant number of CFA funded efforts. All projects, totaling over \$57 million in State funding, are under contract. Included in the report is information on job creation, cost estimates including leveraging amounts and implementation timeframes for each of the 13 Transformative Projects identified last year.

An example of progress is the *Accelerate Long Island* project which unites several major research institutions and other institutions to encourage entrepreneurs to create and manufacture products on Long Island. The State's \$500,000 contribution leveraged an additional \$700,000 to create an emerging technologies fund which is now reviewing four high tech initiatives.

The 2011 State award of \$500,000 was matched with a like amount of private funding to renovate an agricultural processing plant in Riverhead, Suffolk County. A ribbon cutting was held in July 2012 for the new Grapes and Greens agricultural processing plant located in an agricultural enterprise park. The agricultural enterprise park is expected to transform East End agriculture by providing local farmers with a chilled storage and distribution center to move locally grown goods outside the region.

The LIREDC has embarked on long term employment training efforts ("Investments in our Workforce"), particularly in targeted areas. Six separate contracts help fund a STEM workforce innovation network. However, it is not clear whether other workforce development efforts are underway to address the needs of people who are not college educated or destined for college, or who are not part of the innovation economy.

Finally, it is not clear what, if any, non-state funded actions were taken to advance the LIREDC strategies.

Leveraging of Resources

The updated plan notes that over \$81 million of non-state funds have been leveraged based on a state funds commitment of \$57 million. Moreover, nearly \$205 million of non-state funds – some from the private sector - are expected to be secured in the future for 2011 projects. For 2012, the LIREDC has endorsed \$30 million funding to be leveraged against over \$1 billion in private and other investment.

The LIREDC is clearly not alone in its endeavors, with major partners being local governments, business, not-for-profits and major research institutions. Extensive partnerships are, and have been, an integral part of the LIREDC strategic plan. An integral part of these partnerships is financial support, but it is not clear whether support is being provided for activities or projects not receiving state funding.

Performance Measures

The LIREDC's performance measurement plan measures investments, jobs retained, jobs created, as well as other critical data. The performance measurement plan also has a component that will reflect data movements which are purported to be a significant measurement of more long term economic impacts.

The updated report includes a macro-performance analysis performed by the chief economist for the Long Island Association.

Process

The LIREDC reached out to many public and private groups, businesses and educational through public forums, CFA training sessions and speaking engagements. In addition, the Council has made extensive use of social media, with Facebook and Twitter accounts. Stakeholders were engaged in five work groups.
