

2015 Regional Council Process & Consolidated Funding Applications

Background:

The Regional Economic Development Councils (REDCs) are a community driven, regional approach to economic development in New York State. Each Council consists of up to 30 business, academic and government leaders from throughout the Region.

In 2011, each of the ten Regional Councils were tasked with developing a five-year strategic plan that included a comprehensive vision for economic development for that region, regional strategies to achieve that vision, and specific priority projects that are significant, regionally supported and capable of stimulating economic investment. Empire State Development Corporation developed a competitive process in which Regional Council Strategic Plans containing recommendations for funding made by each Regional Council were reviewed by a Strategic Plan Review Committee consisting of two State Agency Commissioners and three economic development experts. Members of the 2011 Review Team included: Dall W. Forsythe, Senior Fellow at the Wagner School of Public Service at New York University and former Vice President for Finance and Operations at The Atlantic Philanthropies; Walter D. Broadnax, Professor of Public Administration at The Maxwell School of Syracuse University; Bruce J. Katz, Vice President at the Brookings Institution and founding Director of the Brookings Metropolitan Policy Program; Joan McDonald, Commissioner of the New York State Department of Transportation; and Cesar Perales, New York State Secretary of State. On December 8, 2011, the Governor and Legislative Leaders announced the winners of the first round of competition and one year later 97% of Round One projects were under contract and/or progressing.

In 2012, the Councils went a step further and produced Strategic Implementation Agendas that built upon the progress from the first round and further developed and refined their Regional Five Year Strategic Plans by undertaking four primary activities: Establishing a framework to advance the Regional Strategic Plan; Implementing the strategies laid out in the Strategic Plan; Creating a project pipeline; and providing a progress report documenting the success the Council has had in implementing its Strategic Plan.

In 2013, all ten of the Regional Councils competed against each other to be designated as a "Top Performer". The 2013 Council competition was designed with a similar framework as 2012 but added several new activities for the council to focus on that would continue to help develop and advance the original strategic plans. Regional Councils were asked to develop an Opportunity Agenda, identify Innovation Hot Spots, and advance regional Cleaner, Greener Community Sustainability Plans.

In 2014, the regional councils developed strategies for several new initiatives including a Global NY Plan to identify import/export and foreign direct investment (FDI) opportunities. Councils also created a Veteran's Work Group to address the unemployment of returning Veteran's in New York. The REDC's were asked to identify projects as part of NY Rising to assist in the rebuilding of areas devastated by natural disasters. The Councils also provided an update on their Opportunity Agenda, workforce development challenges, and their project pipeline.

This year, the REDCs launched the Regional Economic Cluster Program to ensure continued focus on the importance of industry cluster growth in statewide economic development efforts through partnerships between business, academia, and venture capital. As part of this year's competition, all the regional councils focused on initiatives that will drive implementation of their regional strategic plans, and to continue support for various State initiatives. Regional Council priorities include: development of strategies and projects that focus on the growth of regional economic clusters; advancement of plans and projects that strengthen the Global NY agenda; implementing additional strategies in their strategic plan; maintaining a pipeline of projects; training the workforce for today and tomorrow; and measuring the performance and progress of the strategic plan and CFA projects.

These actions were designed to encourage and accelerate implementation, performance, and collaboration within the regions. Priority projects that aligned with each region's plan were chosen by the Councils from the applications submitted to the Consolidated Funding Application portal. These projects were published in the regions' Progress Report, which are publically available online at www.regionalcouncils.ny.gov. Projects were scored by both the state agencies and the Regional Councils. The agencies scored their projects based on a technical evaluation in adherence with existing funding program guidelines and awarded a project up to 80%. The remaining 20% is awarded by the Regional Councils, and were based off the following endorsement standards:

Statewide Endorsement Standards

Regional Council members will determine the degree to which the application implements the regional strategic plan and assign the corresponding number of points as a score.

IMPLEMENTATION OF THE PLAN	DEGREE	POINTS
The proposal is identified as a priority project by the Regional Council.	Priority	20
The proposal is identified in the plan and has regional benefits.	Very Strong	15
The proposal advances the plan and has local benefits.	Strong	10
The proposal is consistent with the plan and has project level benefits.	Moderate	5
The proposal has limited relationship to the plan	Weak	0

2015 Competition:

To encourage the implementation of the Regional Economic Development Councils' strategic plans and to continue to motivate investment opportunities and job creation, the Regional Councils competed in 2015 for up to \$150 million in capital funds and \$70 million in Excelsior

Tax Credits for projects identified by the Regional Councils in their regions. Round 5 of the REDC initiative also includes the creation of the Upstate Revitalization Initiative, in which 7 regions will compete for \$1.5B. This new initiative requires each council to develop regional investment plans that identify existing assets, highlight needs, and recommend areas of opportunity. Seven regions will be eligible to compete for a \$500 million revitalization awards: Mid-Hudson, Capital Region, Mohawk Valley, Central New York, North Country, Southern Tier and Finger Lakes. This initiative will help to transform local economies by providing three regions \$500 million over the next five years to support projects and strategies that create jobs, strengthen and diversify economies, and generate economic opportunity within the region.

As part of this year's competition, all the regional councils focused on initiatives that will drive implementation of their regional strategic plans, and to continue support for various State initiatives. Regional Council priorities include: development of strategies and projects that focus on the growth of regional economic clusters; advancement of plans and projects that strengthen the Global NY agenda; implementing additional strategies in their strategic plan; maintaining a pipeline of projects; training the workforce for today and tomorrow; and measuring the performance and progress of the strategic plan and CFA projects.

By incentivizing implementation of the strategic plans, Regional Councils, businesses, educational institutions, local governments, not-for-profit groups and other stakeholders are further motivated to work together to accomplish the regional vision. While project funding was awarded in all ten Regional Councils through the 2015 CFA, the competition placed an emphasis on Regional Council performance and action to implement strategies.

The competition was focused on the following:

- 1) *Implementation of regional strategic economic development plans;*
- 2) *Performance in encouraging economic growth through job creation and investment;*
- 3) *Identification of regional industry clusters;*

In 2015, the Regional Councils competed against each other to be designated as a "Top Performer" and 7 upstate regions competed to be designated as one of the three "URI Best Plan Awardee".

The 2015 Strategic Implementation Assessment Team (SIAT) was led by Secretary of State Cesar Perales and included Tax and Finance Commissioner Jerry Boone, Office of General Services Commissioner RoAnn Destito, Department of Transportation Commissioner Matthew Driscoll, Environmental Facilities Corporation President and CEO Sabrina Ty, NYS Upstate Revitalization Director Richard Tobe, Brookings Institution's Metropolitan Policy Program Senior Fellow Robert Puentes, National Urban League President Marc Morial, and the United States Department of Commerce Northeast Regional Director James Cox. Due to the unprecedented commitment of state funds to economic development in the 2015 State Budget, the SIAT was expanded to include four additional members that were appointed by the Legislature. Those members include Hon. James Seward, State Senate District 51; Hon. Kenneth LaValle, State Senate District 1; Hon. Donna Lupardo, State Assembly District 123; and Hon. Herman Farrell,

State Assembly District 71. The SIAT reviewed each region's Progress Report and Upstate Revitalization Plans based on established criteria. Members of all REDC's traveled to Albany and presented a summary of their 2015 activities and priorities to the SIAT which included PowerPoint presentations, videos, and regional exhibit booths. The SIAT was also given time to ask questions of the REDC's about their progress reports and regional priority projects.

The SIAT provided an assessment of each plan and made recommendations to Howard Zemsky, President & CEO, Empire State Development Corporation of the six reports that most closely aligned with the criteria outlined in the guidebook. President Zemsky accepted the recommendations of the Committee and, pursuant to his statutory powers as head of the Urban Development Corporation, awarded three regions with the Best Plan Award of \$500 million and three regions with the top Progress Report up to \$45 million in funding consisting of \$30 million in capital grants and up to \$15 million in Excelsior tax credits for priority projects identified in their Strategic Plans. The balance of the incentives was awarded to projects identified by the Councils as in alignment with their strategies and priorities.

In addition, project sponsors applied for over \$500 million in economic development resources available from twelve state agencies through the Consolidated Funding Application (CFA). The CFA allows businesses and other entities to apply for multiple agency funding sources through a single, web-based application. Awards for CFA projects were made based on the endorsement of the local Regional Council and the technical program review of the agencies providing resources, subject to interagency review team analysis and agency discretion.

The 2015 REDC initiative was launched on April 29 and the CFA opened for applications on May 01 and closed on July 31. All details about CFA resources were made available online via the 2015 CFA Resources Available Document, the New York State Register and the Grants Gateway. When the portal closed on July 31, agencies immediately began marking project eligibility. All eligible projects were then made available to the Regional Councils for their scoring process and the agencies for their technical evaluation. On September 21, the REDCs submitted their final 2015 progress reports to the State. Final URI reports were submitted on October, 5. After the SIAT presentations concluded in October, the Inter-agency team met to review the projects and make final funding decisions.

The interagency team reviewed projects based on relevant factors including Regional Councils Implementation Agendas and designation of priority projects, project alignment with regional goals and objectives, funding availability and regional need. Priority projects are those specifically enumerated in the Regional Council Reports, receiving a score of 20 from the Regional Council, and identified as significant, regionally supported and capable of stimulating economic investment.

The interagency team once again consisted of professional staff from relevant agencies and authorities' with detailed knowledge of their respective CFA program funding. This group conducted an analytical assessment that provided the basis for project funding recommendations made by individual agencies for final approval by respective agency or authority head. As provided in the budget, the Regional Council Grant funds were awarded by ESD in its discretion.

This process resulted in funding of projects that aligned with a long term, regionally generated implementation agendas and are capable of stimulating economic growth and investment.

On Thursday, December 10, 2015, the Governor announced that 1062 projects totaling \$999.7 million had been awarded through Round Five of the Regional Economic Development Council initiative. URI Best Plan Awards were given to Central New York, Finger Lakes and Southern Tier. Top Performer awards were given to the Mohawk Valley, Long Island, and Capital District regions in adherence to the competition guidelines detailed above.

MEMORANDUM

To: Howard Zemsky, President and CEO of the Empire State Development Corporation

From: Cesar Perales, Secretary of State
Jerry Boone, Commissioner, New York State Department of Taxation and Finance
James Cox, Northeast Regional Director at the United States Department of Commerce
RoAnn Destito, Commissioner, Office of General Services
Matthew Driscoll, Commissioner, Department of Transportation
Marc Morial, President of the National Urban League
Robert Puentes, Senior Fellow and Director with the Brookings Institution
Richard Tobe, Director of Upstate Revitalization for New York State
Sabrina Ty, President and CEO of the Environmental Facilities Corporation
Assemblyman Herman “Denny” Farrell, of the 71st District
Assemblywoman Donna Lupardo, of the 123rd District
Senator Kenneth LaValle, of the 1st District
Senator James Seward, of the 51st District

Subject: Review of Progress for the 2015 Regional Economic Development Council Initiative and Review of Plans for the Upstate Revitalization Competition

Date: December 9, 2015

We are honored to serve as the Strategic Implementation Assessment Team (SIAT) for Governor Cuomo’s Regional Economic Development Council (REDC) and Upstate Revitalization Initiatives (URI). In the past five years, the REDC initiative has made serious progress in job creation and the growth of new industries across New York State. This year, after the success of the Buffalo Billion, Governor Cuomo launched the \$1.5 billion URI competition to transform the economy of upstate New York.

In 2011, each Regional Council was charged with developing a five-year Strategic Economic Development Plan that emphasized their region’s unique assets and provided strategies to harness local resources, both human and capital, to stimulate regional economic development, and create jobs statewide. Each year since, the plans have been updated to identify projects that support each region’s vision of its economic future.

The REDC program shifted the state's economic development approach from top-down mandates to a community-driven planning process. With this shift, the State has asked the REDCs to use their unique understanding of their regional economies to implement important State priorities. In year five (2015) of the REDC competition, Regional Councils were asked to address one major new State priority: the development of strategies and projects that focus on the growth of one regional economic cluster.

In 2015, in addition to updating their Strategic Economic Development Plans and focusing on a regional economic cluster, seven upstate regions also prepared a Revitalization Plan to explain how they would leverage \$500 million of state funding to stimulate public and private investment in the region. Each region was charged with engaging their community in drafting a data-driven plan that builds on evolving REDC strategies and looks comprehensively at the regional economy.

This October, the Regional Councils came to Albany to present their progress, and, where applicable, their URI proposals. Their oral presentations complemented the regional Progress Reports and Revitalization Plans submitted by the Regional Councils in September and early October. We listened to those presentations and have the responsibility of assessing the progress of the ten Regional Councils and the Revitalization plans submitted by the seven Regional Councils competing in the URI.

2015 Annual REDC Competition

Our task was to evaluate all ten regions based on the competition and Regional Council priorities as described in the 2015 REDC Guidebook. We focused on these four areas:

- 1) Development of strategies and projects for a Regional Economic Cluster Plan
- 2) Implementation of regional strategic economic development plans, including the following 2015 priorities:
 - Advancement of projects and activities to strengthen the region's Global NY plan
 - Updating plans to address new regional priorities, conditions, and emerging opportunities
 - Maintaining a project pipeline
 - Workforce training to fill regional workforce development needs
 - Identification and reporting on indicators measuring regional progress and tracking key regional issues
- 3) Updates on ongoing initiatives:

- Identification of projects to implement the region's Opportunity Agenda and train hard-to-place workers
- Selection of an existing business incubator for additional funding
- Implementation of Cleaner, Greener Communities Sustainability Plans
- Promotion of veterans participation in the workforce
- Support to NY Rising Community Reconstruction Plan projects
- Collaboration with universities on NYSUNY 2020 and CUNY 2020 plans
- Engaging local government officials in the REDC process

4) Progress and performance in encouraging economic growth:

- Impact on job creation and retention
- Business growth and leverage of private sector investment
- Advancement of past priority projects
- Public engagement

URI Competition

In the URI competition, our task was to evaluate the seven competing regions based on their readiness to create and maintain new jobs, attract and retain private sector investment, and contribute to the growth of wealth in the region. In addressing those goals, the regions were asked to identify their challenges and weaknesses and incorporate key concepts identified by the state, as well as any additional elements relevant to the region. We focused on these areas to guide our evaluation:

1) Progress:

- The region's foundations for economic growth
- The use of data to support identified challenges and opportunities and position the region for success

2) Planning:

- Connectivity of the plan across industries and geographical barriers
- Targeting of innovative sectors and community investment that would lead to transformative change
- Strategies and actions to attract investment and support growth
- Sustainability of investments
- Workforce development and hard-to-place workers

- Implementation strategies and organizational structure

3) Projects:

- Development of projects ready for immediate implementation
- Conceptual projects developing in the pipeline

4) Participation:

- Community outreach and business engagement
- Engagement of local government leaders
- Collaboration and regional support for the plan

5) Performance:

- Ability to increase private sector jobs and generate significant private sector investment
- Readiness to create a widespread increase of wealth in the region

Awards

The seven regions participating in the URI competed for three awards of up to \$500 million each, to be distributed over five years, in addition to \$30 million in agency funds through the Consolidated Funding Application. The URI regions consisted of the Capital Region, Central New York, the Finger Lakes, the Mid-Hudson, Mohawk Valley, the North Country, and the Southern Tier.

The Strategic Implementation Assessment Team has identified three regions that deserve the highest awards for the URI: **Central NY, the Finger Lakes, and the Southern Tier**. This was a challenging undertaking, as every region devoted substantial energy to the process and presented impressive plans for transformation.

However, the regions we are recommending presented particularly promising Revitalization Plans and should receive up to \$130 million this year.

The **Central New York Regional Economic Development Council (CNYREDC)** presented a tenacious plan for the revitalization of the region. The plan focused on investing in key growth drivers, building an economy inclusive of all residents, and developing enablers of prosperity. One major growth driver is designed to establish the region's global competitiveness in precision sensing technologies and data analytics, which will build on

the region's interregional collaborations on unmanned aircraft systems and the Internet of Things. To strengthen the region's agribusiness sector, the CNYREDC presented plans for coordinated efforts that will extend the shelf life and safety of food products grown in the state. The CNYREDC had a thoughtful approach to public engagement, evidenced by their launch and promotion of a "Big Idea Competition" that converted over 200 public submissions into project proposals and long-term priorities for the region. This spirit of robust public engagement and inclusiveness was also reflected in the region's tactical approach to building an economy that provides opportunities for workers of different backgrounds, training, and educational levels. The plan identified several prosperity enablers that are necessary to sustain the region's growth, including strengthening innovation and providing targeted entrepreneurship opportunities in diverse communities of veterans, women, and minorities. The plan also identified a number of community investment opportunities, and collaborative models for cultural and tourism assets that will contribute to the attractiveness of the region and help retain talented graduates from the region's academic institution.

The **Finger Lakes Regional Economic Development Council (FLREDC)** provided a convincing argument that the region is well poised to take advantage of the URI investment. The region focused on three key growth pillars that are essential to its future growth. The first is optics, photonics and imaging (OPI). Innovation in this longstanding regional cluster continues to grow, as seen by the recent award to the American Institute of Manufacturing Integrated Photonics from the Department of Defense. The second growth pillar is agriculture and food production, where the region plans to build a food ecosystem across the region that will maintain the region's status as the leading food producer in the state. The third growth pillar is next generation manufacturing and technology, where the region has taken a comprehensive approach to ensuring the vitality of the Eastman Business Park as well as the Western New York Science and Technology Advanced Manufacturing Park (STAMP) in Genesee County. The FLREDC identified three enablers that are necessary to sustain and stimulate growth: pathways to prosperity, which created strong connections to the Rochester-Monroe Anti-Poverty Initiative (RMAPI); entrepreneurship and development; and higher education and research. Overall, the region is prepared to build on their strengths and take serious steps to address various workforce and community needs.

The **Southern Tier Regional Economic Development Council (STREDC)** presented a strong plan for the transformation of their region. The Revitalization Plan focused on growing the advanced economy through the development of the Greater Binghamton Innovation Ecosystem, strategic investments in advanced manufacturing, transformation of the food and agriculture industry, and promotion of the Southern

Tier's innovative culture. Each of these initiatives builds regional connectivity and ensures lasting bonds between the public sector, private sector, and educational institutions. Proposed innovation districts in Binghamton, Endicott, and Johnson City will benefit from local higher education institutions and innovation cultivators, such as the Southern Tier Startup Alliance, a state-designated Innovation Hot Spot. The STREDC clearly laid out underlying actions needed to support its growth, including the enhancement of regional supply chains of existing advanced manufacturers and the attraction and training of skilled STEM workers. To improve agricultural output, the region proposes leveraging its longstanding partnerships with Cornell University and Corning Inc. to test and eventually apply new agricultural and clean energy technologies. These technologies will extend growing seasons and expand controlled environment agriculture (CEA), bringing the region to the forefront of CEA. With the understanding that industry growth must be complemented by community development in order to attract talent, the STREDC prioritized investments that will improve community assets and attract young talent.

The Strategic Implementation Assessment Team has identified three regions that were Top Performers in the annual REDC competition: **the Capital Region, the Mohawk Valley, and Long Island**. The substantial progress that each region accomplished made this a difficult decision; however, the achievements of these regions merit the designation of Top Performer and awards of up to \$105 million.

The **Capital Region Regional Economic Development Council (CREDC)** continued its substantial commitment to the branding and development of the region as the Tech Valley. The CREDC focused its cluster plan on research, development, and commercialization. The region structured its approach to leverage pioneering academic institutions, a highly educated workforce, and competitive private sector partners. Past investments in research institutions have successfully built investments with interregional benefits and far-reaching impact. The CREDC refined its Global NY strategies and identified multiple projects that advance the Global NY agenda. The region presented metrics that illuminate challenges for employment among many minorities and reinforce the direction of the region's Opportunity Agenda. Significant efforts are being undertaken to increase access to employment in areas of distress, particularly through the Kindl Workforce Development Building in Schenectady and the Tech Valley Center of Gravity in Troy. The inclusiveness of the region's efforts are further supported by the enthusiastic backing of the CREDC by local governments, not-for-profits, educational institutions, and private partners.

The **Mohawk Valley Regional Economic Development Council (MVREDC)** excelled in its pursuit of high-impact STEM intensive industries. The region selected cybersecurity as its regional cluster, identified key public institutions and private businesses that are active in this industry, and described actions needed to maximize the potential for new relationships among these stakeholders. The progress report laid out a cradle-to-career action plan to fill the need for more STEM-trained workers in this growing field as well as the infrastructure improvements necessary to guarantee the region's competitive advantage. Detailed performance metrics were introduced that provided context for strategies and supports the direction of ongoing initiatives, including the region's Opportunity Agenda. The progress report aptly conveyed the renewed excitement in the region, especially with the realization of past ambitions and investments in the Marcy Nanocenter and Quad-C. Although the MV500 regional strategy team was created to help draft the URI plan, it also served to enhance the region's active engagement of the public and private sectors, government, and educational stakeholders.

The **Long Island Regional Economic Development Council (LIREDC)** maintained its focus on key initiatives, most strongly addressing its innovation and industry clusters, with a focus on supporting potential sites for biotech space, as well as supporting leading centers of bio-innovation, such as Cold Spring Harbor and Stony Brook. The LIREDC recognizes that top talent and an educated workforce will help move the biotech industry forward on Long Island, and has identified steps needed to increase the supply of trained employees and foster collaboration between higher education institutions and research companies. Through its Opportunity Agenda, the LIREDC continues to support a variety of initiatives to support the entry of hard-to-place workers into the Long Island economy, including the creation of affordable housing and extension of primary healthcare to high need communities. The region's project pipeline is robust, strengthened by redevelopment opportunities at the Nassau Hub, including a planned cancer treatment and research center.

Four regions should receive up to \$90 million to help attract and grow business in their regions: **the Mid-Hudson, New York City, the North Country, and Western NY.**

The **Mid-Hudson Regional Economic Development Council (MHREDC)** continued to concentrate on its four core strategies for technology, mature Industries, natural resources, and infrastructure. This continuity contributes to the strong brand identity of the region, which was refined this year as a part of the URI and well integrated into the Progress Report. The selection of the food and beverage manufacturing supply chain as the MHREDC key industry cluster was based on an evaluation of existing regional strengths and an analysis of industry trend data. This cluster is a fast-growing industry in

the region and thematically aligned with the region's original 2011 plan. In workforce development, the MVREDC engaged local community colleges as part of the Hudson Valley Educational Consortium to host regional job fairs and create a network of information for potential entrepreneurs. Other implementation activities include the formation of an International Trade and Investment Advisory Committee under the region's Global NY agenda.

The **North Country Regional Economic Development Council (NCREDC)** focused on the transportation equipment and materials industry cluster, where the region has seen a dramatic rise in employment with higher than average regional wages. This cluster merges the manufacturing of transportation equipment with the need to develop and manufacture advanced materials that companies can use in next-generation transit systems. Significant implementation activities include the strengthening of the NCREDC's Opportunity Agenda with the development of new economic development strategies and the refinement of strategies under the Global NY agenda. Progress in prior investments has been encouraging, with projects around Fort Drum helping to prevent large-scale layoffs and the Wild Walk at the Wild Center in Tupper Lake breaking attendance records this summer. The NCREDC informed its approach to new investments through outreach activities that included events with local farmers and presentations at local government conferences.

The **Western NY Regional Economic Development Council (WNYREDC)** continues to embrace its three core strategies of workforce enhancement, entrepreneurship, and smart growth to provide a regional foundation by which its seven strategic industries can grow and prosper. This year it focused on materials processing and machinery manufacturing for its cluster industry action plan and identified detailed actions to support the cluster. Successful implementation of workforce initiatives and other actions in the region is bearing fruit through increased employment in advanced manufacturing and a rise in the young adult population by 5.4% over four years. The region's commitment to meeting the educational and workforce needs of area veterans – access to employment counselors, helping develop educational plans, and promoting veteran employment to potential employers – is evidenced in its support for expanding the coverage area of the Veterans One-Stop Center of Western New York.

The **New York City Regional Economic Development Council (NYCREDC)** turned its focus this year to the development of an industry cluster called "Smart Cities," which includes technology to help manage and deliver government services and public infrastructure. NYCREDC has already taken multiple steps to implement the Smart Cities cluster, such as securing a commitment of resources from NYC, and identifying future

infrastructure initiatives to promote and expedite. Multiple priority projects are proposed within the advanced manufacturing, biomedical, tourism, food processing, media, and IT industries. Workforce development continues to be a top priority for the NYCREDC. To address this gap, its strategy is to build extensive partnerships; to target funding that leads to gainful employment and the upward mobility of residents; and to build a workforce development system that is focused on demand-driven strategies. The expansion of successful employer-partnership workforce training models will help bridge pervasive skill gaps and address workforce readiness issues.

Conclusion

The Strategic Implementation Assessment Team was impressed by the dedication of Regional Council members, work group volunteers, and staff of the Regional Empire State Development offices who serve the Regional Councils. We believe that the continuation of this bottom-up process, which included this year's Upstate Revitalization Initiative, is taking New York down a path of great success, driven by the informed perspective of REDC members, spurred on by the advancement of new ideas and products by business leaders and educational institutions, and fueled by the development of a workforce across all age groups and socioeconomic strata. Please extend our congratulations to all members of the Regional Councils for the outstanding work they are doing to strengthen New York's economy.

Long Island Regional Economic Development Council

2015 Progress Report Assessment

Section I. Planning

a. Quality of the Progress Report

Strengths

- Lays out a plan to move the region forward, identifies an industry cluster to focus on, and gives updates on how previous projects are progressing.
- Provides personal accounts of how the work done over the last four years has helped improve the lives of individuals and families in the region.
- Provides a narrative and status for all priority projects.

Weaknesses

- Analysis of LIREDC progress thus far could be more straightforward.

b. Development of regional metrics to measure success

Strengths

- Regional metrics and their comparison to NYS were presented well.
- For their priority cluster, the LIREDC provided a chart comparing the number of jobs their target industry hosts in Long Island compared to the other regions in the state.
- Pockets of poverty are recognized, and the report describes how the Opportunity Agenda is addressing poverty in Wyandanch. The poverty rate on Long Island is nine points lower than the statewide average.
- The percentage of the Long Island workforce that does not both live and work in the region is 77%. The LIREDC proposes to address issues that contribute do these commuting patterns (high cost of living, lack of affordable housing and aging workforce) with projects that create affordable housing.

Weaknesses

- None noted.

c. Identification of regional workforce development needs for key sectors

Strengths

- LIREDC describes how they plan to increase the supply of trained biotech employees and foster collaboration between higher education institutions and research companies.
- The Long Island Biotech Education Consortium would revamp the K-12 curriculum to train overlooked and underserved students for jobs in the biotech field.
- The proposed Community Education Workforce and Leadership Training at Hofstra University will create high-tech classrooms, offices and conference spaces to provide small business owners, municipal officials, residents and students with job training, professional development and enrichment opportunities.

- The proposed construction of a Hofstra University Entrepreneurial and Educational Ecosystem incubator is intended to encourage collaboration among the Hofstra Business school faculty, students and start-ups to promote the development of the innovation economy.
- LIREDC supported the creation of a public-private research campus, Brookhaven National Lab Discovery Park, which will include STEM education in the Town of Brookhaven.

Weaknesses

- No implementation agenda or timeline was given for workforce development, although this was done for other priorities.

d. Readiness of the region

Strengths

- LIREDC's strategic plan identified potential growth in biotech, and the LIREDC has directed investments towards related projects. Academic institutions in the region help develop a trained workforce.
- The location quotient for biotechnology in Long Island has been growing and in 2014 was 2.12 – meaning the economic value of biotech initiatives in Long Island is twice the national average.
- Two expansion projects funded in Round IV support future growth in the biotech sector (i.e. Certerra, a pharmaceutical spin-off from Cold Springs Harbor Lab; and Molloy College's Center for Environmental Research and Coastal Oceans Monitoring research facility).
- LIREDC continues to work to improve the infrastructure of the region and prepare sites for business expansion/relocation.
- The site of the former Nassau Coliseum is identified as a prime location for redevelopment, and the commitment of Sloan Kettering to open a new \$140 million cancer treatment and research center on the site will be an attraction for additional tenants.

Weaknesses

- Long Island faces obstacles to growth, including some of the nation's highest property taxes and energy costs, and low rates of venture capital investment.

Section II. Performance

a. Impact on job creation and retention

Strengths

- Since the beginning of the REDC competition, the number of jobs in the region has grown 3.6%.
- Priority Projects retained over 4,250 "at-risk" jobs and created more than 5,784 jobs.
- Other CFA projects retained 4,597 "at risk" jobs and created 556 jobs.
- The unemployment rate in Long Island in 2014 was 5.1%, lower than state rate of 5.6%.

Weaknesses

- Biotechnology jobs on Long Island rank toward the bottom in average salary compared to other regions, however, the salary for these jobs is still relatively high.

b. Success in job training and engagement of hard-to-place workers

Strengths

- LIREDC focused on how to bridge the gap between employers' needs and workers' skills.
- LIREDC work groups met with Wyandanch School District representatives to identify district needs. As a result, LIREDC secured pledges from institutions to launch a robotics club at the high school.
- NYIT opened a renovated Entrepreneurship and Technology Innovation Center with the help of 2011 CFA funds, which provided research space for health analytics and bioengineering, IT and cybersecurity, and energy and green technologies.
- The Wyandanch Rising project, the centerpiece of the region's Opportunity Agenda, continues to move forward, supported by various worker development programs that are a part of the larger initiative.
- The Long Island Center for Nursing Excellence St. Josephs College (2014 CFA) is currently under construction and will educate nurses to meet the growing labor need in the healthcare sector.

Weaknesses

- None noted.

c. Business growth and leverage of private sector investments

Strengths

- The total project cost to ESD Capital award ratio of the 100 Priority Projects (2011-2014) is estimated in the report to be 18.8:1. The 2014 ratio was 25.6:1.
- The total project cost to CFA award ratio of all 365 projects (2011-2014) funded through the CFA is estimated in the report to be 14.2:1. The 2014 ratio was 17.2:1.
- In 2014 there were 103,934 establishments on Long Island, an increase of 3.1% since 2011.

Weaknesses

- None noted.

Section III. Progress

a. Advancement of the Region's 2014-15 Implementation Agenda

Strengths

- LIREDC provided tables with an implementation agenda and timeline for three state and regional priorities - Global NY, the Opportunity Agenda, and the biotechnology cluster.
- LIREDC strongly addressed its innovation and industry clusters, supporting both potential sites for biotech space and leading centers of bio-innovation like Cold Spring Harbor and Stony Brook.

Weaknesses

- The involvement of the LIREDC in many actions taken in the past year related to CFA projects or implementation items was difficult to ascertain.
- A draft export survey developed in furtherance of the LIREDC Global NY strategy still needs further action before it can be completed.

b. Advancement and completion of prior round Priority Projects

Strengths

- Of the 110 past Priority Projects, 25% are completed and 54% are on schedule.
- Seventy-seven percent of the 2014 Priority Projects are complete or on schedule.
- Over the past four years, 10 projects have been cancelled or the funding declined.

Weaknesses

- Plans to expand the Wyandanch model to Huntington Station, part of the region's Opportunity Agenda, do not appear to have moved beyond a preliminary stage.
- Little new information was provided on actions taken by the LIREDC to advance its sustainability plan.

c. Ability to take the next steps in growing the regional economy

Strengths

- LIREDC provided an overall economic outlook for the region in 2016, prepared by the Long Island Association, and stated that some positive performance points to a healthy 2016.
- Continued development of research and development facilities, both private and academic, could be beneficial if the region is able to commercialize research discoveries.

Weaknesses

- One downside provided in the 2016 economic outlook is stagnancy in wage growth and inconsistent consumer spending. This could impact REDC projects relying on consumer spending for success.

Section IV. Projects

a. Solicitation and development of projects for regional economic growth, including transformational projects with large scale targeted job growth

Strengths

- LIREDC selected biotechnology their key industry cluster. Long Island has more jobs in the biotech industry than any other region in the state. In 2014 they had over 21,000 jobs in this field, almost 11,000 more than the next closest region (Capital Region).
- LIREDC proposed 9 Priority Projects related to its industry cluster, Biotech.
- LIREDC supported 47 Priority Projects projected to create 353 direct jobs, 1,325 indirect jobs and 1,150 construction jobs

- Using the redevelopment of the Nassau Hub as a place to create a biotech hub makes good use of land that they have been working to revitalize for some time. Nassau Hub site improvements through past CFAs and projects proposed this year could eventually result in 3 million sq. ft. of development and 8,500 jobs.
- The proposed Discovery Park will repurpose the Brookhaven National Lab to attract over 4,000 visitors to use the facility and promote STEM education programs.

Weaknesses

- The largest proposed job creating biotech project is only projected to create 34 direct jobs, although 116 construction jobs are projected. Most other biotech projects projected fewer than 15 total jobs each.

b. Identification of projects to advance State and regional priorities

Strengths

- LIREDC is supporting applications for CFA awards related to NY Rising for street planning and design work in Copiague, Baldwin, and a comprehensive plan for Mastic Beach.
- A proposed Global NY project to build a Federal Inspection Services Facility at MacArthur Airport would allow international flights to fly directly into the airport, creating 1,200 indirect jobs.
- Other proposed Global NY projects include Stewart Airport renovations; a fish farm; and expansion of manufacturing capacity at luggage, aerospace, military parts, and musical instrument accessory plants.
- Several proposed Opportunity Agenda projects relate to affordable housing (e.g., Wyandanch Rising, Wincoram Commons, Meadows at Yaphank). Expansion of a health and wellness center would increase capacity to extend primary healthcare to surrounding high need communities.

Weaknesses

- It is unclear whether several proposed projects identified as providing veterans support (e.g., education centers and new laboratory space at three colleges) will conduct specific outreach to veterans.
- Few projects are presented as supporting the sustainability plan, which was touted as having very high regional support in the 2014 report.

c. Building and maintaining a project pipeline for future funding opportunities

Strengths

- Many LIREDC proposed projects are new or continuing multi-year projects that will generate new projects as earlier ones are completed (e.g., Nassau Hub).
- LIREDC identifies 47 Priority Projects projected to create 353 direct jobs, 1,325 indirect jobs and 1,150 construction jobs. The total project cost for all 47 projects is almost \$350 million.

Weaknesses

- Little information is provided about the region's method of attracting applicants or how its support is gained for applications.

Section V. Participation

a. Engagement of the community, public, and other stakeholders in the Regional Council process

Strengths

- LIREDC has eight work groups with over one hundred volunteers, and outreach to key industry stakeholders seems robust.
- Strong partnerships with local higher education institutions and biotech companies create projects that will help foster and advance the biotech industry.
- The Global NY work group supports export events and helps promote trade missions.

Weaknesses

- Outreach to the general public seems limited.

b. Collaboration with local government to transform the regional business climate

Strengths

- LIREDC has teamed up with local government officials to support infrastructure projects that help revitalize communities or continue to help them recover from Superstorm Sandy.
- Many elected officials describe in the report how projects have helped their communities.

Weaknesses

- Local government engagement seems limited.

c. Regional unity and support of the Progress Report

Strengths

- The report is filled with first-person accounts of how the LIREDC projects have touched the lives of individuals across the community.

Weaknesses

- It does not appear that LIREDC used any formal methods to gather public input on continuing implementation of the strategic plan.
