

2015 Regional Council Process & Consolidated Funding Applications

Background:

The Regional Economic Development Councils (REDCs) are a community driven, regional approach to economic development in New York State. Each Council consists of up to 30 business, academic and government leaders from throughout the Region.

In 2011, each of the ten Regional Councils were tasked with developing a five-year strategic plan that included a comprehensive vision for economic development for that region, regional strategies to achieve that vision, and specific priority projects that are significant, regionally supported and capable of stimulating economic investment. Empire State Development Corporation developed a competitive process in which Regional Council Strategic Plans containing recommendations for funding made by each Regional Council were reviewed by a Strategic Plan Review Committee consisting of two State Agency Commissioners and three economic development experts. Members of the 2011 Review Team included: Dall W. Forsythe, Senior Fellow at the Wagner School of Public Service at New York University and former Vice President for Finance and Operations at The Atlantic Philanthropies; Walter D. Broadnax, Professor of Public Administration at The Maxwell School of Syracuse University; Bruce J. Katz, Vice President at the Brookings Institution and founding Director of the Brookings Metropolitan Policy Program; Joan McDonald, Commissioner of the New York State Department of Transportation; and Cesar Perales, New York State Secretary of State. On December 8, 2011, the Governor and Legislative Leaders announced the winners of the first round of competition and one year later 97% of Round One projects were under contract and/or progressing.

In 2012, the Councils went a step further and produced Strategic Implementation Agendas that built upon the progress from the first round and further developed and refined their Regional Five Year Strategic Plans by undertaking four primary activities: Establishing a framework to advance the Regional Strategic Plan; Implementing the strategies laid out in the Strategic Plan; Creating a project pipeline; and providing a progress report documenting the success the Council has had in implementing its Strategic Plan.

In 2013, all ten of the Regional Councils competed against each other to be designated as a "Top Performer". The 2013 Council competition was designed with a similar framework as 2012 but added several new activities for the council to focus on that would continue to help develop and advance the original strategic plans. Regional Councils were asked to develop an Opportunity Agenda, identify Innovation Hot Spots, and advance regional Cleaner, Greener Community Sustainability Plans.

In 2014, the regional councils developed strategies for several new initiatives including a Global NY Plan to identify import/export and foreign direct investment (FDI) opportunities. Councils also created a Veteran's Work Group to address the unemployment of returning Veteran's in New York. The REDC's were asked to identify projects as part of NY Rising to assist in the rebuilding of areas devastated by natural disasters. The Councils also provided an update on their Opportunity Agenda, workforce development challenges, and their project pipeline.

This year, the REDCs launched the Regional Economic Cluster Program to ensure continued focus on the importance of industry cluster growth in statewide economic development efforts through partnerships between business, academia, and venture capital. As part of this year's competition, all the regional councils focused on initiatives that will drive implementation of their regional strategic plans, and to continue support for various State initiatives. Regional Council priorities include: development of strategies and projects that focus on the growth of regional economic clusters; advancement of plans and projects that strengthen the Global NY agenda; implementing additional strategies in their strategic plan; maintaining a pipeline of projects; training the workforce for today and tomorrow; and measuring the performance and progress of the strategic plan and CFA projects.

These actions were designed to encourage and accelerate implementation, performance, and collaboration within the regions. Priority projects that aligned with each region's plan were chosen by the Councils from the applications submitted to the Consolidated Funding Application portal. These projects were published in the regions' Progress Report, which are publically available online at www.regionalcouncils.ny.gov. Projects were scored by both the state agencies and the Regional Councils. The agencies scored their projects based on a technical evaluation in adherence with existing funding program guidelines and awarded a project up to 80%. The remaining 20% is awarded by the Regional Councils, and were based off the following endorsement standards:

Statewide Endorsement Standards

Regional Council members will determine the degree to which the application implements the regional strategic plan and assign the corresponding number of points as a score.

IMPLEMENTATION OF THE PLAN	DEGREE	POINTS
The proposal is identified as a priority project by the Regional Council.	Priority	20
The proposal is identified in the plan and has regional benefits.	Very Strong	15
The proposal advances the plan and has local benefits.	Strong	10
The proposal is consistent with the plan and has project level benefits.	Moderate	5
The proposal has limited relationship to the plan	Weak	0

2015 Competition:

To encourage the implementation of the Regional Economic Development Councils' strategic plans and to continue to motivate investment opportunities and job creation, the Regional Councils competed in 2015 for up to \$150 million in capital funds and \$70 million in Excelsior

Tax Credits for projects identified by the Regional Councils in their regions. Round 5 of the REDC initiative also includes the creation of the Upstate Revitalization Initiative, in which 7 regions will compete for \$1.5B. This new initiative requires each council to develop regional investment plans that identify existing assets, highlight needs, and recommend areas of opportunity. Seven regions will be eligible to compete for a \$500 million revitalization awards: Mid-Hudson, Capital Region, Mohawk Valley, Central New York, North Country, Southern Tier and Finger Lakes. This initiative will help to transform local economies by providing three regions \$500 million over the next five years to support projects and strategies that create jobs, strengthen and diversify economies, and generate economic opportunity within the region.

As part of this year's competition, all the regional councils focused on initiatives that will drive implementation of their regional strategic plans, and to continue support for various State initiatives. Regional Council priorities include: development of strategies and projects that focus on the growth of regional economic clusters; advancement of plans and projects that strengthen the Global NY agenda; implementing additional strategies in their strategic plan; maintaining a pipeline of projects; training the workforce for today and tomorrow; and measuring the performance and progress of the strategic plan and CFA projects.

By incentivizing implementation of the strategic plans, Regional Councils, businesses, educational institutions, local governments, not-for-profit groups and other stakeholders are further motivated to work together to accomplish the regional vision. While project funding was awarded in all ten Regional Councils through the 2015 CFA, the competition placed an emphasis on Regional Council performance and action to implement strategies.

The competition was focused on the following:

- 1) *Implementation of regional strategic economic development plans;*
- 2) *Performance in encouraging economic growth through job creation and investment;*
- 3) *Identification of regional industry clusters;*

In 2015, the Regional Councils competed against each other to be designated as a "Top Performer" and 7 upstate regions competed to be designated as one of the three "URI Best Plan Awardee".

The 2015 Strategic Implementation Assessment Team (SIAT) was led by Secretary of State Cesar Perales and included Tax and Finance Commissioner Jerry Boone, Office of General Services Commissioner RoAnn Destito, Department of Transportation Commissioner Matthew Driscoll, Environmental Facilities Corporation President and CEO Sabrina Ty, NYS Upstate Revitalization Director Richard Tobe, Brookings Institution's Metropolitan Policy Program Senior Fellow Robert Puentes, National Urban League President Marc Morial, and the United States Department of Commerce Northeast Regional Director James Cox. Due to the unprecedented commitment of state funds to economic development in the 2015 State Budget, the SIAT was expanded to include four additional members that were appointed by the Legislature. Those members include Hon. James Seward, State Senate District 51; Hon. Kenneth LaValle, State Senate District 1; Hon. Donna Lupardo, State Assembly District 123; and Hon. Herman Farrell,

State Assembly District 71. The SIAT reviewed each region's Progress Report and Upstate Revitalization Plans based on established criteria. Members of all REDC's traveled to Albany and presented a summary of their 2015 activities and priorities to the SIAT which included PowerPoint presentations, videos, and regional exhibit booths. The SIAT was also given time to ask questions of the REDC's about their progress reports and regional priority projects.

The SIAT provided an assessment of each plan and made recommendations to Howard Zemsky, President & CEO, Empire State Development Corporation of the six reports that most closely aligned with the criteria outlined in the guidebook. President Zemsky accepted the recommendations of the Committee and, pursuant to his statutory powers as head of the Urban Development Corporation, awarded three regions with the Best Plan Award of \$500 million and three regions with the top Progress Report up to \$45 million in funding consisting of \$30 million in capital grants and up to \$15 million in Excelsior tax credits for priority projects identified in their Strategic Plans. The balance of the incentives was awarded to projects identified by the Councils as in alignment with their strategies and priorities.

In addition, project sponsors applied for over \$500 million in economic development resources available from twelve state agencies through the Consolidated Funding Application (CFA). The CFA allows businesses and other entities to apply for multiple agency funding sources through a single, web-based application. Awards for CFA projects were made based on the endorsement of the local Regional Council and the technical program review of the agencies providing resources, subject to interagency review team analysis and agency discretion.

The 2015 REDC initiative was launched on April 29 and the CFA opened for applications on May 01 and closed on July 31. All details about CFA resources were made available online via the 2015 CFA Resources Available Document, the New York State Register and the Grants Gateway. When the portal closed on July 31, agencies immediately began marking project eligibility. All eligible projects were then made available to the Regional Councils for their scoring process and the agencies for their technical evaluation. On September 21, the REDCs submitted their final 2015 progress reports to the State. Final URI reports were submitted on October, 5. After the SIAT presentations concluded in October, the Inter-agency team met to review the projects and make final funding decisions.

The interagency team reviewed projects based on relevant factors including Regional Councils Implementation Agendas and designation of priority projects, project alignment with regional goals and objectives, funding availability and regional need. Priority projects are those specifically enumerated in the Regional Council Reports, receiving a score of 20 from the Regional Council, and identified as significant, regionally supported and capable of stimulating economic investment.

The interagency team once again consisted of professional staff from relevant agencies and authorities' with detailed knowledge of their respective CFA program funding. This group conducted an analytical assessment that provided the basis for project funding recommendations made by individual agencies for final approval by respective agency or authority head. As provided in the budget, the Regional Council Grant funds were awarded by ESD in its discretion.

This process resulted in funding of projects that aligned with a long term, regionally generated implementation agendas and are capable of stimulating economic growth and investment.

On Thursday, December 10, 2015, the Governor announced that 1062 projects totaling \$999.7 million had been awarded through Round Five of the Regional Economic Development Council initiative. URI Best Plan Awards were given to Central New York, Finger Lakes and Southern Tier. Top Performer awards were given to the Mohawk Valley, Long Island, and Capital District regions in adherence to the competition guidelines detailed above.

MEMORANDUM

To: Howard Zemsky, President and CEO of the Empire State Development Corporation

From: Cesar Perales, Secretary of State
Jerry Boone, Commissioner, New York State Department of Taxation and Finance
James Cox, Northeast Regional Director at the United States Department of Commerce
RoAnn Destito, Commissioner, Office of General Services
Matthew Driscoll, Commissioner, Department of Transportation
Marc Morial, President of the National Urban League
Robert Puentes, Senior Fellow and Director with the Brookings Institution
Richard Tobe, Director of Upstate Revitalization for New York State
Sabrina Ty, President and CEO of the Environmental Facilities Corporation
Assemblyman Herman “Denny” Farrell, of the 71st District
Assemblywoman Donna Lupardo, of the 123rd District
Senator Kenneth LaValle, of the 1st District
Senator James Seward, of the 51st District

Subject: Review of Progress for the 2015 Regional Economic Development Council Initiative and Review of Plans for the Upstate Revitalization Competition

Date: December 9, 2015

We are honored to serve as the Strategic Implementation Assessment Team (SIAT) for Governor Cuomo’s Regional Economic Development Council (REDC) and Upstate Revitalization Initiatives (URI). In the past five years, the REDC initiative has made serious progress in job creation and the growth of new industries across New York State. This year, after the success of the Buffalo Billion, Governor Cuomo launched the \$1.5 billion URI competition to transform the economy of upstate New York.

In 2011, each Regional Council was charged with developing a five-year Strategic Economic Development Plan that emphasized their region’s unique assets and provided strategies to harness local resources, both human and capital, to stimulate regional economic development, and create jobs statewide. Each year since, the plans have been updated to identify projects that support each region’s vision of its economic future.

The REDC program shifted the state's economic development approach from top-down mandates to a community-driven planning process. With this shift, the State has asked the REDCs to use their unique understanding of their regional economies to implement important State priorities. In year five (2015) of the REDC competition, Regional Councils were asked to address one major new State priority: the development of strategies and projects that focus on the growth of one regional economic cluster.

In 2015, in addition to updating their Strategic Economic Development Plans and focusing on a regional economic cluster, seven upstate regions also prepared a Revitalization Plan to explain how they would leverage \$500 million of state funding to stimulate public and private investment in the region. Each region was charged with engaging their community in drafting a data-driven plan that builds on evolving REDC strategies and looks comprehensively at the regional economy.

This October, the Regional Councils came to Albany to present their progress, and, where applicable, their URI proposals. Their oral presentations complemented the regional Progress Reports and Revitalization Plans submitted by the Regional Councils in September and early October. We listened to those presentations and have the responsibility of assessing the progress of the ten Regional Councils and the Revitalization plans submitted by the seven Regional Councils competing in the URI.

2015 Annual REDC Competition

Our task was to evaluate all ten regions based on the competition and Regional Council priorities as described in the 2015 REDC Guidebook. We focused on these four areas:

- 1) Development of strategies and projects for a Regional Economic Cluster Plan
- 2) Implementation of regional strategic economic development plans, including the following 2015 priorities:
 - Advancement of projects and activities to strengthen the region's Global NY plan
 - Updating plans to address new regional priorities, conditions, and emerging opportunities
 - Maintaining a project pipeline
 - Workforce training to fill regional workforce development needs
 - Identification and reporting on indicators measuring regional progress and tracking key regional issues
- 3) Updates on ongoing initiatives:

- Identification of projects to implement the region's Opportunity Agenda and train hard-to-place workers
- Selection of an existing business incubator for additional funding
- Implementation of Cleaner, Greener Communities Sustainability Plans
- Promotion of veterans participation in the workforce
- Support to NY Rising Community Reconstruction Plan projects
- Collaboration with universities on NYSUNY 2020 and CUNY 2020 plans
- Engaging local government officials in the REDC process

4) Progress and performance in encouraging economic growth:

- Impact on job creation and retention
- Business growth and leverage of private sector investment
- Advancement of past priority projects
- Public engagement

URI Competition

In the URI competition, our task was to evaluate the seven competing regions based on their readiness to create and maintain new jobs, attract and retain private sector investment, and contribute to the growth of wealth in the region. In addressing those goals, the regions were asked to identify their challenges and weaknesses and incorporate key concepts identified by the state, as well as any additional elements relevant to the region. We focused on these areas to guide our evaluation:

1) Progress:

- The region's foundations for economic growth
- The use of data to support identified challenges and opportunities and position the region for success

2) Planning:

- Connectivity of the plan across industries and geographical barriers
- Targeting of innovative sectors and community investment that would lead to transformative change
- Strategies and actions to attract investment and support growth
- Sustainability of investments
- Workforce development and hard-to-place workers

- Implementation strategies and organizational structure

3) Projects:

- Development of projects ready for immediate implementation
- Conceptual projects developing in the pipeline

4) Participation:

- Community outreach and business engagement
- Engagement of local government leaders
- Collaboration and regional support for the plan

5) Performance:

- Ability to increase private sector jobs and generate significant private sector investment
- Readiness to create a widespread increase of wealth in the region

Awards

The seven regions participating in the URI competed for three awards of up to \$500 million each, to be distributed over five years, in addition to \$30 million in agency funds through the Consolidated Funding Application. The URI regions consisted of the Capital Region, Central New York, the Finger Lakes, the Mid-Hudson, Mohawk Valley, the North Country, and the Southern Tier.

The Strategic Implementation Assessment Team has identified three regions that deserve the highest awards for the URI: **Central NY, the Finger Lakes, and the Southern Tier**. This was a challenging undertaking, as every region devoted substantial energy to the process and presented impressive plans for transformation.

However, the regions we are recommending presented particularly promising Revitalization Plans and should receive up to \$130 million this year.

The **Central New York Regional Economic Development Council (CNYREDC)** presented a tenacious plan for the revitalization of the region. The plan focused on investing in key growth drivers, building an economy inclusive of all residents, and developing enablers of prosperity. One major growth driver is designed to establish the region's global competitiveness in precision sensing technologies and data analytics, which will build on

the region's interregional collaborations on unmanned aircraft systems and the Internet of Things. To strengthen the region's agribusiness sector, the CNYREDC presented plans for coordinated efforts that will extend the shelf life and safety of food products grown in the state. The CNYREDC had a thoughtful approach to public engagement, evidenced by their launch and promotion of a "Big Idea Competition" that converted over 200 public submissions into project proposals and long-term priorities for the region. This spirit of robust public engagement and inclusiveness was also reflected in the region's tactical approach to building an economy that provides opportunities for workers of different backgrounds, training, and educational levels. The plan identified several prosperity enablers that are necessary to sustain the region's growth, including strengthening innovation and providing targeted entrepreneurship opportunities in diverse communities of veterans, women, and minorities. The plan also identified a number of community investment opportunities, and collaborative models for cultural and tourism assets that will contribute to the attractiveness of the region and help retain talented graduates from the region's academic institution.

The **Finger Lakes Regional Economic Development Council (FLREDC)** provided a convincing argument that the region is well poised to take advantage of the URI investment. The region focused on three key growth pillars that are essential to its future growth. The first is optics, photonics and imaging (OPI). Innovation in this longstanding regional cluster continues to grow, as seen by the recent award to the American Institute of Manufacturing Integrated Photonics from the Department of Defense. The second growth pillar is agriculture and food production, where the region plans to build a food ecosystem across the region that will maintain the region's status as the leading food producer in the state. The third growth pillar is next generation manufacturing and technology, where the region has taken a comprehensive approach to ensuring the vitality of the Eastman Business Park as well as the Western New York Science and Technology Advanced Manufacturing Park (STAMP) in Genesee County. The FLREDC identified three enablers that are necessary to sustain and stimulate growth: pathways to prosperity, which created strong connections to the Rochester-Monroe Anti-Poverty Initiative (RMAPI); entrepreneurship and development; and higher education and research. Overall, the region is prepared to build on their strengths and take serious steps to address various workforce and community needs.

The **Southern Tier Regional Economic Development Council (STREDC)** presented a strong plan for the transformation of their region. The Revitalization Plan focused on growing the advanced economy through the development of the Greater Binghamton Innovation Ecosystem, strategic investments in advanced manufacturing, transformation of the food and agriculture industry, and promotion of the Southern

Tier's innovative culture. Each of these initiatives builds regional connectivity and ensures lasting bonds between the public sector, private sector, and educational institutions. Proposed innovation districts in Binghamton, Endicott, and Johnson City will benefit from local higher education institutions and innovation cultivators, such as the Southern Tier Startup Alliance, a state-designated Innovation Hot Spot. The STREDC clearly laid out underlying actions needed to support its growth, including the enhancement of regional supply chains of existing advanced manufacturers and the attraction and training of skilled STEM workers. To improve agricultural output, the region proposes leveraging its longstanding partnerships with Cornell University and Corning Inc. to test and eventually apply new agricultural and clean energy technologies. These technologies will extend growing seasons and expand controlled environment agriculture (CEA), bringing the region to the forefront of CEA. With the understanding that industry growth must be complemented by community development in order to attract talent, the STREDC prioritized investments that will improve community assets and attract young talent.

The Strategic Implementation Assessment Team has identified three regions that were Top Performers in the annual REDC competition: **the Capital Region, the Mohawk Valley, and Long Island**. The substantial progress that each region accomplished made this a difficult decision; however, the achievements of these regions merit the designation of Top Performer and awards of up to \$105 million.

The **Capital Region Regional Economic Development Council (CREDC)** continued its substantial commitment to the branding and development of the region as the Tech Valley. The CREDC focused its cluster plan on research, development, and commercialization. The region structured its approach to leverage pioneering academic institutions, a highly educated workforce, and competitive private sector partners. Past investments in research institutions have successfully built investments with interregional benefits and far-reaching impact. The CREDC refined its Global NY strategies and identified multiple projects that advance the Global NY agenda. The region presented metrics that illuminate challenges for employment among many minorities and reinforce the direction of the region's Opportunity Agenda. Significant efforts are being undertaken to increase access to employment in areas of distress, particularly through the Kindl Workforce Development Building in Schenectady and the Tech Valley Center of Gravity in Troy. The inclusiveness of the region's efforts are further supported by the enthusiastic backing of the CREDC by local governments, not-for-profits, educational institutions, and private partners.

The **Mohawk Valley Regional Economic Development Council (MVREDC)** excelled in its pursuit of high-impact STEM intensive industries. The region selected cybersecurity as its regional cluster, identified key public institutions and private businesses that are active in this industry, and described actions needed to maximize the potential for new relationships among these stakeholders. The progress report laid out a cradle-to-career action plan to fill the need for more STEM-trained workers in this growing field as well as the infrastructure improvements necessary to guarantee the region's competitive advantage. Detailed performance metrics were introduced that provided context for strategies and supports the direction of ongoing initiatives, including the region's Opportunity Agenda. The progress report aptly conveyed the renewed excitement in the region, especially with the realization of past ambitions and investments in the Marcy Nanocenter and Quad-C. Although the MV500 regional strategy team was created to help draft the URI plan, it also served to enhance the region's active engagement of the public and private sectors, government, and educational stakeholders.

The **Long Island Regional Economic Development Council (LIREDC)** maintained its focus on key initiatives, most strongly addressing its innovation and industry clusters, with a focus on supporting potential sites for biotech space, as well as supporting leading centers of bio-innovation, such as Cold Spring Harbor and Stony Brook. The LIREDC recognizes that top talent and an educated workforce will help move the biotech industry forward on Long Island, and has identified steps needed to increase the supply of trained employees and foster collaboration between higher education institutions and research companies. Through its Opportunity Agenda, the LIREDC continues to support a variety of initiatives to support the entry of hard-to-place workers into the Long Island economy, including the creation of affordable housing and extension of primary healthcare to high need communities. The region's project pipeline is robust, strengthened by redevelopment opportunities at the Nassau Hub, including a planned cancer treatment and research center.

Four regions should receive up to \$90 million to help attract and grow business in their regions: **the Mid-Hudson, New York City, the North Country, and Western NY.**

The **Mid-Hudson Regional Economic Development Council (MHREDC)** continued to concentrate on its four core strategies for technology, mature Industries, natural resources, and infrastructure. This continuity contributes to the strong brand identity of the region, which was refined this year as a part of the URI and well integrated into the Progress Report. The selection of the food and beverage manufacturing supply chain as the MHREDC key industry cluster was based on an evaluation of existing regional strengths and an analysis of industry trend data. This cluster is a fast-growing industry in

the region and thematically aligned with the region's original 2011 plan. In workforce development, the MVREDC engaged local community colleges as part of the Hudson Valley Educational Consortium to host regional job fairs and create a network of information for potential entrepreneurs. Other implementation activities include the formation of an International Trade and Investment Advisory Committee under the region's Global NY agenda.

The **North Country Regional Economic Development Council (NCREDC)** focused on the transportation equipment and materials industry cluster, where the region has seen a dramatic rise in employment with higher than average regional wages. This cluster merges the manufacturing of transportation equipment with the need to develop and manufacture advanced materials that companies can use in next-generation transit systems. Significant implementation activities include the strengthening of the NCREDC's Opportunity Agenda with the development of new economic development strategies and the refinement of strategies under the Global NY agenda. Progress in prior investments has been encouraging, with projects around Fort Drum helping to prevent large-scale layoffs and the Wild Walk at the Wild Center in Tupper Lake breaking attendance records this summer. The NCREDC informed its approach to new investments through outreach activities that included events with local farmers and presentations at local government conferences.

The **Western NY Regional Economic Development Council (WNYREDC)** continues to embrace its three core strategies of workforce enhancement, entrepreneurship, and smart growth to provide a regional foundation by which its seven strategic industries can grow and prosper. This year it focused on materials processing and machinery manufacturing for its cluster industry action plan and identified detailed actions to support the cluster. Successful implementation of workforce initiatives and other actions in the region is bearing fruit through increased employment in advanced manufacturing and a rise in the young adult population by 5.4% over four years. The region's commitment to meeting the educational and workforce needs of area veterans – access to employment counselors, helping develop educational plans, and promoting veteran employment to potential employers – is evidenced in its support for expanding the coverage area of the Veterans One-Stop Center of Western New York.

The **New York City Regional Economic Development Council (NYCREDC)** turned its focus this year to the development of an industry cluster called "Smart Cities," which includes technology to help manage and deliver government services and public infrastructure. NYCREDC has already taken multiple steps to implement the Smart Cities cluster, such as securing a commitment of resources from NYC, and identifying future

infrastructure initiatives to promote and expedite. Multiple priority projects are proposed within the advanced manufacturing, biomedical, tourism, food processing, media, and IT industries. Workforce development continues to be a top priority for the NYCREDC. To address this gap, its strategy is to build extensive partnerships; to target funding that leads to gainful employment and the upward mobility of residents; and to build a workforce development system that is focused on demand-driven strategies. The expansion of successful employer-partnership workforce training models will help bridge pervasive skill gaps and address workforce readiness issues.

Conclusion

The Strategic Implementation Assessment Team was impressed by the dedication of Regional Council members, work group volunteers, and staff of the Regional Empire State Development offices who serve the Regional Councils. We believe that the continuation of this bottom-up process, which included this year's Upstate Revitalization Initiative, is taking New York down a path of great success, driven by the informed perspective of REDC members, spurred on by the advancement of new ideas and products by business leaders and educational institutions, and fueled by the development of a workforce across all age groups and socioeconomic strata. Please extend our congratulations to all members of the Regional Councils for the outstanding work they are doing to strengthen New York's economy.

Mid-Hudson Regional Economic Development Council

2015 Progress Report Assessment

Section I. Planning

a. Quality of the Progress Report

Strengths

- Continued to focus on four core strategies (Technology, Mature Industry, Natural Resources, and Infrastructure) and four supporting strategies.
- Overall, a good update on the progress of various initiatives including the action taken, progress to date, next steps, and associated timelines for implementation.

Weaknesses

- None noted.

b. Development of regional metrics to measure success

Strengths

- Metrics are broken down in a variety of ways, which allows the MHREDC to track the impact of projects within the region, including future proposed priority projects and actions.
- Five of the seven economic indicators demonstrate regional growth from previous 2013 indicator.

Weaknesses

- Quality of life indicators have remained stagnant, but were well presented.

c. Identification of regional workforce development needs for key sectors

Strengths

- MHREDC seems committed to supporting CFA applications increasing employment opportunities for veterans, and is working to build relationships with government and organizations to address the employment needs of veterans.
- The Council of Industry, Hudson Valley Economic Development Corporation, and private sector partners have crafted a Science Technology Engineering Art and Math (STEAM) pipeline (PIPE) project that would target STEAM career marketing to the K-12 community. This project grows out of interviews with dozens of teachers, parents, students, and manufacturers.
- Ironworkers Local 417 will significantly expand and improve their apprenticeship training facilities, a priority project for the MHREDC.
- Assessed and responded to each county's workforce development needs through the development of the Hudson Valley Manufacturing Resource Map.

Weaknesses

- Despite high levels of education for Mid-Hudson adults, it is not clear whether the type of education fits the needs of high-paying industries necessary to be competitive in the global economy.
- Lack of clarity in MHREDC plans to address the work readiness of incoming employees, gap of skilled labor, and the misalignment of training to the needs of the private sector.
- The previously lauded internship program for CFA Priority Projects seems to have been reduced to apply only to project recipients of \$1 million in funding, and the intern must be “hard-to-place.”

d. Readiness of the region

Strengths

- Clear focus and commitment to strengthening partnerships within the Food and Beverage Manufacturing Supply Chain Cluster.
- Projects are anticipated to create and/or retain a significant number of jobs within the region, attracting a younger workforce and preventing youth flight, and increasing available jobs in STEAM industries.

Weaknesses

- The region has seen vital growth in some areas such as biotech and digital services but lacks a workforce development pipeline to facilitate full success.

Section II. Performance

a. Impact on job creation and retention

Strengths

- MHREDC reports that since 2011, CFA projects have created or retained 7,982 permanent jobs. In 2014, the 113 CFA projects created 1,680 jobs, retained 2,893 jobs, and created 2,463 construction jobs.
- The average unemployment rate in the Mid-Hudson Region declined to 5.3%, representing an improvement of 1.2% over the previous year, compared to a statewide 6.3% unemployment rate.
- The natural resources related industry sectors experienced job growth of 3.54% in 2014.

Weaknesses

- Job creation or retention data specific to Priority Projects was not provided.
- The number of establishments and wages are increasing in both the biotech and medical industries, but employment is down.

b. Success in job training and engagement of hard-to-place workers

Strengths

- Successfully engaged community colleges; supported job fairs hosted by community colleges; and created a comprehensive list of entrepreneurship programs in the region.

- *FITT to Grow* addresses various workforce development needs for Brewster and Peekskill, regions experiencing an influx of Latino immigrants. This entrepreneurship model could be replicated.
- A new Hudson Valley Manufacturing Resource Map improves access to resources for job seekers.

Weaknesses

- Workforce development training opportunities seem to be limited in terms of impact and/or career advancement opportunities.

c. Business growth and leverage of private sector investments

Strengths

- The ratio of project cost to ESD capital fund investment from 2011-2014 was 11.6:1 for all Priority Projects, and 7.7:1 for 2014 Priority Projects.
- The ratio of total project cost of all CFA projects to total CFA awards from 2011 to 2014 was 6.4:1, and 8:1 for all 2014 projects.
- MHREDC reports nearly a 5% increase in the past two years in regional exports.
- The number of establishments increased 1.82% from 2013 to 2014, including: 3.23% increase in establishments in the Employment in the Food and Beverage Cluster; and 1.35% in the number of technology industry establishments.
- The Mature Industries Cluster had nearly 13,000 establishments, and paid nearly \$90,000 as the average annual wage, the highest average wage among all clusters.

Weaknesses

- The High Tech Manufacturing Cluster, identified as a cluster expected to grow in the 2014 progress report, saw decreases in establishments (-1%), employment (-7.6%), and wages (-4.4%) since 2013.

Section III. Progress

a. Advancement of the Region's 2014-15 Implementation Agenda

Strengths

- Joined with LIREDC and NYC REDC global work groups to form an International Trade and Investment Advisory Committee to work toward enhanced project development, coordination, and foreign direct investment.
- USAI LLC, an international industry leader in manufacturing LED lighting fixtures, began a \$6.5M expansion (CFA 2014).

Weaknesses

- No specific progress updates related to NY Rising projects were provided, unlike in the 2014 report.
- Implementation steps for the promising veterans' initiative don't include specific goal-oriented results.

b. Advancement and completion of prior round Priority Projects

Strengths

- Of the 52 Priority Projects from 2011-2014, 87% are either complete or progressing; 16 (76%) of 21 priority projects from 2014 are on-schedule.
- Of the 351 CFA projects from 2011-2014, 93% are either complete or progressing; 75% of the 113 CFA projects from 2014 are complete or on-schedule and 5% had funding canceled or declined.
- The NYS Cloud Computing and Analytics Center at Marist College (2012 CFA) has trained more than 1,000 individuals since its inception, including 279 in the past six months.

Weaknesses

- None noted.

c. Ability to take the next steps in growing the regional economy

Strengths

- Established partnerships with NYCREDC and LIREDC to collaborate and grow the Inter-Region Export Pipeline.
- Live, Work, Play Initiative is strategically and thematically aligned with the 2011 strategic plan.
- Enhancements made to the Stewart International Airport to increase capacity.

Weaknesses

- Projected job growth increases in high tech and tourism sector have not met initial expectations.

Section IV. Projects

a. Solicitation and development of projects for regional economic growth, including transformational projects with large scale targeted job growth

Strengths

- The Food and Beverage Manufacturing Supply Chain was chosen as the key industry cluster after evaluating existing regional strengths, analyzing industry trend data, and reviewing the established framework of the 2011 regional plan. It is a fast-growing industry in a relatively well-paid sector.
- Twelve CFA projects support the key industry cluster, including a food and beverage manufacturing center in Kingston; and four craft brewers and eight food and beverage manufacturing-related projects.

Weaknesses

- Only one Priority Project impacts all counties in the region (USAI Expansion).
- Proposed Priority Projects are not well distributed throughout the region.

b. Identification of projects to advance State and regional priorities

Strengths

- Business NexGen (for veteran entrepreneurships and startups) plans to launch veteran owned businesses, and more than 1,000 veterans will be connected to employers/business services.
- MHREDC indicates that four projects support NY Rising community reconstruction goals.
- MHREDC indicates that 50% of priority projects support both Global NY Strategies and the Opportunity Agenda.

Weaknesses

- In general, not enough information is provided to demonstrate how some projects relate to the state priorities they are indicated as supporting.

c. Building and maintaining a project pipeline for future funding opportunities

Strengths

- Received the highest number of Consolidated Funding Applications in the State (over 410). Priority project applications made up 158 of the total.
- Implementation of several priority projects that are broad in scope will result in projects needing additional funding in the coming years.
- The Food and Beverage Manufacturing Supply Chain cluster appears poised for growth and wage increases.

Weaknesses

- Insufficient focus on the progression of workforce development training to meet the future business needs of the region.

Section V. Participation

a. Engagement of the community, public, and other stakeholders in the Regional Council process

Strengths

- Engaged all seven counties in the region through community and local outreach efforts.
- Community colleges are engaged as part of the Hudson Valley Educational Consortium to host regional job fairs and inform potential entrepreneurs of opportunities and available programs.
- The Youth STEAM Task Group engaged teachers, educators, community members, and others.

Weaknesses

- Although overall attendance was given (1200 stakeholders), it is unknown how well attended the 20 information sessions/workshops/public meetings were in different parts of the region.

b. Collaboration with local government to transform the regional business climate

Strengths

- The Workforce Development Taskforce now includes all of the area’s Workforce Investment Board (WIB) directors, which helps the MHREDC align resources and goals.
- Regional Council members worked with local governments to leverage state investment opportunities for farmland protection grants.
- The Land Use Law Center of Pace Law School, on behalf of the MHREDC, supported a Mayors’ Redevelopment Roundtable where twelve urban municipalities can collaborate on strategies for revitalization and sustainable growth.

Weaknesses

- Limited efforts to engage local governments on transforming the regional business climate.

c. Regional unity and support of the Progress Report

Strengths

- Hundreds of stakeholders from government, workforce development, businesses and community colleges participated on MHREDC work groups.

Weaknesses

- None noted.

Mid-Hudson Regional Economic Development Council

2015 Revitalization Plan Assessment

Section I. Progress

Foundations for Growth

a. Regional performance clearly reported

Strengths

- The revitalization plan demonstrates clear use of economic, demographic and quality of life indicators provided by the University at Buffalo Regional Institute (UBRI) and multiple other resources to support the three primary efforts of the region's revitalization plan – Live, Work, and Play.

Weaknesses

- While the report does indicate some instances of progress achieved through REDC funding, additional information could be provided to better highlight progress and the impact on the local economy, including more specific outcome measures.
- The revitalization plan demonstrates strong understanding of diversity in the region. For example, the region has a total workforce of 1,130,500 and an average salary of \$56,611. However the plan does not compare these figures with the state or the nation to provide context.

b. Identification of challenges and opportunities was supported by data

Strengths

- The plan demonstrates a strong understanding of the diverse challenges facing the region. For example, the region has wealthy Westchester communities as well some of the poorest census tracts in the nation with high job vacancies, high unemployment and low-wage job structures.
- Unlike the rest of Upstate New York, the region has experienced population growth. The region has 6 out of 10 of the fastest growing cities and 16 out of 20 fastest growing large villages in the state.

Weaknesses

- Detailed analysis on income disparity and other disparities could have been beneficial.

c. Positioning of region for success

Strengths

- The region has an overarching and cohesive vision manifested in the Live, Work, Play efforts that connects and intertwines multiple proposed projects.
- MHREDC plans to build on the assets of the food and beverage manufacturing industry in the region by connecting the craft beverage industry with tourism.

- The computer and electronic product manufacturing industry seems poised for growth and expansion. The region has demonstrated success exporting computer and electronic products and the region has the talent and capacity in the workforce to support such industry.

Weaknesses

- The region may be dependent on both the growth and decline of the neighboring regions and States. For example, attraction of tourists relies in part on tourism to NYC. Should challenges arise to supporting industries/regions, the Mid-Hudson could find it difficult to maintain and sustain growth.

Investment in the Region

d. Connectivity will lead to transformative change

Strengths

- Proposed initiatives center on three primary efforts, Live, Work, Play, and would connect various sectors into a cohesive regional planning effort. For example, Innovation Districts, Catalyzing Creative Networks, Building Connectivity and Co-working and Incubation Spaces developed through the Work effort and Revitalizing Urban Centers, Capital Funds for High-Tech, under the Live effort, will all help to achieve the ultimate goal of attracting or retaining entrepreneurs and young adults to the area.
- On-going workforce development initiatives show connectivity that has the potential to create transformative change. Examples include Science Technology Engineering Art and Math (STEAM) pipeline project, P-Tech school expansion and leveraging of the Hudson Valley Educational Consortium with multiple education partners and the REDC.

Weaknesses

- Although the region does focus on a narrow scope of investment, connectivity and the impact of the plan does not seem to extend to Sullivan and Putnam counties in a substantial way.

e. Targeting of innovative sectors

Strengths

- The plan proposes investment in high tech projects such as cognitive techniques for cyber security research and commercialization, high-speed networks for analytics and business incubation, and glass production compatible with night vision image systems.

Weaknesses

- Multiple industry clusters are addressed with no primary concentration on a specific industry cluster.

f. Unique regional strengths will overcome barriers to growth

Strengths

- The region has multiple distressed locations and plans to build from the Governor’s Community, Opportunity, Reinvestment (CORe) initiative to strengthen these locations through place-based services.

- The branding, marketing, packaging and development of an app to promote tourism and development of urban centers, and revitalization of distressed urban areas will help overcome some of the barriers to expanding tourism, such as lack of high quality lodging and visitor centers, and improvements in infrastructure needed to accommodate larger vessels and tour busses.

Weaknesses

- The plan could have better leveraged the expertise of non-profit agencies in serving high needs communities and assess the needs of hard-to-place workers.

g. Choice of areas for physical and community investment

Strengths

- The plan has a strong focus on the development and revitalization of urban centers to strengthen distressed communities in the region and to attract skilled young adults and businesses.
- Multiple strategic investments are proposed in urban centers with partners - Regional Land Bank, Innovation Districts, and Live/Work Incubation Spaces and Urban Center Investment Fund for municipalities - for revitalizing communities into mixed-use and transit orientated developments are noteworthy.
- The growth of the tourism industry is dependent on improving infrastructure, so the areas of physical and community investment seem positioned to work well with each other.

Weaknesses

- The region could improve its plan for linking advanced industries and academic institutions to the physical fabric of the region. For example, it is unclear how alignment of STEM training with high school education will address “youth flight” and the gap in the workforce’s skill set.

Section II. Planning

Strategies and Actions

a. Strategies to attract investment

Strengths

- The region plans to leverage its already existing transportation system. This will be accomplished by adding Stewart Airport as a tax-free zone through Start-Up NY and construction of the New NY Bridge.
- The region plans on developing a regional land bank that would include communities with the greatest amount of vacant or abandoned properties. Benefits would include neighborhood stabilization and increased property tax revenue, which would in turn further attract development. The regional land bank may build upon the success of the Newburgh Community Land Bank, which since 2012 has put 7 properties back into productive use.

Weaknesses

- Improvements and upgrades are necessary to leverage the existing transportation system and could be tied to additional private , however, with the exception of the plan for Stewart International Airport and the New NY Bridge, information is not provided on how the existing transportation system will be improved.

b. Identification of actions required to support growth

Strengths

- The revitalization plan outlines three primary efforts – Live, Work, Play.
 - Live – Revitalization of urban centers is a key element of the Live element. Plans to develop a regional land bank to address neighborhood blight and abandoned properties, workforce development programs directed at the most distressed neighborhoods including better integration of a growing Latino/Hispanic population, and expansion of the Greyston model are included.
 - Work – The Work effort is to be accomplished through the development of Innovation Districts, Live/work innovation spaces that cultivate entrepreneurship, improved connectivity networks and development of the STEAM Pipeline for K-12 students, parents, and guidance counselors.
 - Play – Branding of the region; creation of premier destinations, lodging, and visitor centers to attract and capitalize on tourists from the NYC and Mid-Atlantic regions.

Weaknesses

- A fourth element, “Regional Tools and Resources”, is intended to enable all three initiatives to succeed by addressing common land use, workforce development and small business support assistance. This element would be stronger if better incorporated within the three primary elements.

c. Use of other state initiatives

Strengths

- Two and four year colleges broadly adopted the START-UP NY initiative. Going forward, the START-UP NY initiative will be leveraged through designation of space at campuses to support various initiatives.
- Multiple state initiatives are leveraged, for example: START-UP NY, I Love NY, Path through History, CORE Initiative, Connect NY and Pathways in Technology Early College High Schools (P-TECH).

Weaknesses

- None noted.

d. Sustainability of investments

Strengths

- The high number of patents produced in the region assures that allocating funding to create and support a culture of innovation and creativity will build on a local strength. However, the challenge will be to commercialize the patents within the region.

- The P-TECH school expansion project includes funding for a two-person team that will develop a sustainability plan for outside funding.

Weaknesses

- The Hudson Valley Educational Consortium could duplicate existing collaborative efforts within the region. Instead, it could leverage existing efforts at a lower cost.

e. Workforce development

Strengths

- The region has one of the highest concentrations of higher education institutions in the United States. Colleges such as SUNY New Paltz and Marist, among others, have added programs better geared towards the workforce needs in the Region.
- Expanding the tourism season year-round and the creation of additional transportation and tourism supports has the potential to create an increasing number of job opportunities for hard-to-place workers, including in rural areas where employment can be scarce.
- The Hudson Valley Educational Consortium (HVEC), a collaboration of SUNY community colleges, will develop a regional model for data-driven workforce development and education (\$5M). In addition, a pilot program and revolving loan fund are proposed, as is the development of an alumni network. The project is intended to create a highly replicable model to align workforce development and education efforts with industry demand as well as lay the foundation to coordinate these efforts.

Weaknesses

- Only 10% of degrees issued in the region are related to STEM, which has forced businesses to recruit STEM employees from other parts of the state. The plan identifies a disconnect between the training and education and the actual needs of local private sector businesses, but does not strategically and cohesively address ways to better train the region's workforce.

f. Hard-to-place workers

Strengths

- The region outlines several initiatives, such as the WPA Project, that target hard-to-place workers, and attempt to address skills gaps and reduce long-term unemployment.
- The proposed expansion of the Greyston Bakery model (which is recognized nationally as a model for hard-to-place workers) to other local businesses represents meaningful job opportunities for hard-to-place individuals.
- NY Hire, a signature project supporting "hard to serve" workers, will provide direct workforce hiring and better poverty agency coordination within urban centers. As part of the NY Hire initiative, the MHREDC plans to require each recipient of URI and CFA funds exceeding \$1 million to have at least one hard-to-place worker as a project intern.

Weaknesses

- The revitalization plan contains initiatives to fill entry-level tourism jobs in rural areas with hard-to-place workers. However, these jobs may be temporary and dependent on consistent growth of the tourism industry.

Plan Implementation

g. Organizational structure identified

Strengths

- Implementation Committees, with members drawn from groups who developed the initiatives, will serve as the guiding force for the initiatives.
- The region proposed to leverage existing collaborative regional planning partners (Pace University, Patterns for Progress, Hudson Valley Economic Development Corporation, and Hudson Valley Agribusiness Development Corporation) for long-term implementation of the revitalization plan.

Weaknesses

- The plan would be strengthened by greater public participation or the inclusion of work group members in the organizational structure.

h. Implementation plan and desired outcomes

Strengths

- MHREDC proposes that a project coordinator will be retained to convene the implementation committees and ensure implementation of the revitalization plan.
- The plan provides a detailed outline of initiatives to revitalize urban centers, job creation, and tourism.
 - Under the Live effort, expected outcomes include population growth or retention in urban centers, vibrant downtowns and waterfronts, walk-able neighborhoods and access to high quality public spaces all to better attract millennials.
 - The Work effort, with a primary goal of job creation, focuses on innovation to foster mature industries through workforce development skills alignment and to create a culture of innovation that allows small businesses that may be the next IBM to thrive.
 - Desired outcomes for Play include a branding of the region, expanding the tourism season to close to year-round, and increased tourism.

Weaknesses

- The success of each initiative may depend on the success or failure of the others. The region should ensure that if one area is not successful, the other two areas might still accomplish their goals.

i. Performance metrics tailored to goals

Strengths

- The plan recognizes the need for metrics and demonstrates general alignment of the proposed metrics with its overall strategy for the three initiatives, as indicated by metrics for increased R&D investments, tourism revenue, establishment of new digital firms, and patents filed.

Weaknesses

- Proposed metrics lacks detail and specificity to reflect significant change and progress.
- Employment numbers in STEM are not well defined and it is unclear how this metric will be calculated.

Section III. Projects

a. Projects for immediate implementation appear ready

Strengths

- Planning is already underway for premier tourist destinations in Ulster County. This will begin the push to develop premier resorts in the region, which are currently lacking. MHREDC believes higher-end lodging will bring more tourists to the area.
- Collaborative regional organizations such as Hudson Valley Economic Development Corporation and Hudson Valley Pattern for Progress are planned to establish long-term implementation of the revitalization plan.

Weaknesses

- The descriptions of Year One signature projects do not clearly specify project readiness. Many projects do not seem ready for implementation and will require additional planning and preparation.

b. Conceptual projects have next steps identified

Strengths

- None noted.

Weaknesses

- In some instances, the revitalization plan cites things the MHREDC would like to do, but does not state next steps to implement those projects.

c. Project pipeline

Strengths

- Proposed projects include multiple layers, creating the pipeline necessary to ensure sustained success. This is demonstrated in each of the URI's three main initiatives.

- The Hudson Valley Educational Consortium and Preservation, Leveraging of Regional Partners, Streamlining of Land Use Development, Expansion of CORe and P-Tech schools, Agribusiness Technical Assistance and Hudson River Tour Boat are examples of projects that may lead to future projects.
- The region proposes the creation of a Tourism Transportation Team (“T3”) to provide and promote optimal transportation offerings for visitors to the region. The MHREDC would like to explore ticket options or enhanced rail passes, Uber-like services, and ride-share, bike-share, etc. programs.

Weaknesses

- The descriptions of all projects do not clearly state whether they will lead to creation of future projects and clear project pipeline development would be helpful.

Section IV. Participation

a. Community outreach

Strengths

- Diverse projects that address the Live, Work, Play efforts are the result of strong community outreach to solicit projects.
- MHREDC hosted 20 information sessions, workshops and public meetings with 1,200 participants. Over 410 applications were received for the CFA and URI funding.

Weaknesses

- The plan does not detail the use of creative avenues, such as social media, to seek input from residents.

b. Business engagement

Strengths

- The STEAM pipeline project was developed with dozens of interviews of teachers, parents, students and manufacturers who would benefit from the pipeline.
- A high tech focused working group session discovered that manufacturers have difficulties connecting with local coders, leading to development of the Catalyzing Creative Networks project.

Weaknesses

- The agribusiness technical assistance project notes that the agricultural businesses may require additional support. Engagement of agricultural and tourism businesses was not extensive.

c. Engagement of local government leaders

Strengths

- The Local Workforce Development Boards and MHREDC together plan to implement the 21st Century WPA project to find employment for hard-to-place workers.

Weaknesses

- The involvement of local government leaders in developing project proposals is not fully clear.
- Other quasi-governmental local entities could be helpful for developing workforce related plan aspects.

d. Collaboration and regional support

Strengths

- Implementation committees will serve as the guiding force for each effort, with existing MHREDC subcommittees, industry organizations, regional service agencies, and private sector individuals.

Weaknesses

- The revitalization plan seems to be focused on urban centers and engagement of the rural areas in the plan could be better demonstrated.

Section V. Performance

a. Significant increase in private sector jobs projected

Strengths

- Projects highlighted in the report show a projection of 15,004 direct jobs.
- The high-tech projects are projected to create 3,500 jobs, some of which will be high paying. Similarly, revitalization of urban centers projects is projected to develop 3,035 jobs.

Weaknesses

- Regional companies may not be creating sufficient jobs for hard-to-place workers, leaving some workers unprepared for employment and in need of additional supportive services.

b. Increase of regional wealth likely

Strengths

- IBM's new line of zSeries machines for cyber security shows promise for job creation and revenue growth. Their manufacturing operation anchors thousands of high tech jobs in the region and attracts related businesses who supply IBM with parts and materials, creating additional employment.
- The manufacturing sector (biotech, information tech, etc.) has strengths in several areas, rather than a focus around a single geographic destination. This helps to shield the region from declines in manufacturing employment despite major restructurings. The revitalization plan anticipates continued growth through small businesses and entrepreneurial endeavors.

Weaknesses

- The most rapidly growing industries in this region (2009-2014) were also those in lower wage industries (ambulatory health care/food services and drinking places). Due to these industries typically paying lower wages, it is not clear what industries would significantly increase regional wealth.

c. Private sector investment expected to meet 5:1 ratio (private to public funding)

Strengths

- Of the 23 major projects listed, 3 show a ratio of at least 5:1 total cost to URI funding.

Weaknesses

- Many projects have a 1:1 ratio and rely on URI/CFA funding for the total project cost. Of the three efforts, Work, Live, and Play, it is not possible to determine whether or not other public funds (other than URI/REDC) are involved, nor to what degree.
