

## **2017 Regional Council Process & Consolidated Funding Applications**

### Background:

The Regional Economic Development Councils (REDCs) are a community driven, regional approach to economic development in New York State. Each Council consists of over 20 business, academic and government leaders from throughout the Region.

In 2011, each of the ten Regional Councils were tasked with developing a five-year strategic plan that included a comprehensive vision for economic development for that region, regional strategies to achieve that vision, and specific priority projects that are significant, regionally supported and capable of stimulating economic investment. Empire State Development Corporation developed a competitive process in which Regional Council Strategic Plans containing recommendations for funding made by each Regional Council were reviewed by a Strategic Plan Review Committee consisting of two State Agency Commissioners and three economic development experts. Members of the 2011 Review Team included: Dall W. Forsythe, Senior Fellow at the Wagner School of Public Service at New York University and former Vice President for Finance and Operations at The Atlantic Philanthropies; Walter D. Broadnax, Professor of Public Administration at The Maxwell School of Syracuse University; Bruce J. Katz, Vice President at the Brookings Institution and founding Director of the Brookings Metropolitan Policy Program; Joan McDonald, Commissioner of the New York State Department of Transportation; and Cesar Perales, New York State Secretary of State. On December 8, 2011, the Governor and Legislative Leaders announced the winners of the first round of competition.

In 2012, the Councils went a step further and produced Strategic Implementation Agendas that built upon the progress from the first round and further developed and refined their Regional Five Year Strategic Plans by undertaking four primary activities: Establishing a framework to advance the Regional Strategic Plan; Implementing the strategies laid out in the Strategic Plan; Creating a project pipeline; and providing a progress report documenting the success the Council has had in implementing its Strategic Plan.

In 2013, all ten of the Regional Councils competed against each other to be designated as a "Top Performer". The 2013 Council competition was designed with a similar framework as 2012 but added several new activities for the council to focus on that would continue to help develop and advance the original strategic plans. Regional Councils were asked to develop an Opportunity Agenda, identify Innovation Hot Spots, and advance regional Cleaner, Greener Community Sustainability Plans.

In 2014, the regional councils developed strategies for several new initiatives including a Global NY Plan to identify import/export and foreign direct investment (FDI) opportunities. Councils also created a Veteran's Work Group to address the unemployment of returning veterans in New York. The REDC's were asked to identify projects as part of NY Rising to assist in the rebuilding of areas devastated by natural disasters. The Councils also provided an update on their Opportunity Agenda, workforce development challenges, and their project pipeline.

In 2015, the Regional Economic Cluster Program was launched to ensure continued focus on the importance of industry cluster growth in statewide economic development efforts through partnerships between business, academia, and venture capital. All the regional councils focused on initiatives that will drive implementation of their regional strategic plans, and to continue support for various State initiatives. Regional Council priorities include: development of strategies and projects that focus on the growth of regional economic clusters; advancement of plans and projects that strengthen the Global NY agenda; implementing additional strategies in their strategic plan; maintaining a pipeline of projects; training the workforce for today and tomorrow; and measuring the performance and progress of the strategic plan and CFA projects.

In 2016, all REDC's participated in the \$100 million Downtown Revitalization Initiative (DRI) which will invest \$10 million in one community in each region to develop a vision, articulate a plan, and identify projects and other implementation steps. Each Regional Council solicited interest in the program from communities in the region and considered how those communities met the criteria put forth from the State. The Council nominated one Downtown in each Region to receive the award.

In 2017, all REDC's once again participated in another round of the \$100 million Downtown Revitalization Initiative (DRI). In addition, the regions focused on closing the skills gap by working with industry leaders and education providers to develop workforce development strategies. The Councils also identified projects for the state's Life Science cluster and continued to implement their strategies through the project pipeline.

These actions were designed to encourage and accelerate implementation, performance, and collaboration within the regions. Priority projects that aligned with each region's plan were chosen by the Councils from the applications submitted to the Consolidated Funding Application portal. These projects were published in the regions' Progress Report, which are publically available online at [www.regionalcouncils.ny.gov](http://www.regionalcouncils.ny.gov). Projects were scored by both the state agencies and the Regional Councils. The agencies scored their projects based on a technical evaluation in adherence with existing funding program guidelines and awarded a project up to 80%. The remaining 20% is awarded by the Regional Councils, and were based off the following endorsement standards:

**Statewide Endorsement Standards**

Regional Council members will determine the degree to which the application implements the regional strategic plan and assign the corresponding number of points as a score.

IMPLEMENTATION OF THE PLAN	DEGREE	POINTS
The proposal is identified as a priority project by the Regional Council.	Priority	20
The proposal is identified in the plan and has regional benefits.	Very Strong	15

The proposal advances the plan and has local benefits.	Strong	10
The proposal is consistent with the plan and has project level benefits.	Moderate	5
The proposal has limited relationship to the plan	Weak	0

Since the inception of the REDCs in 2011, members have been required to sign a Code of Conduct, Conflict of Interest documents, and have undergone training from legal counsel. Both documents are updated annually and new members are required to complete these documents upon appointment. Members with conflicts of interest must recuse themselves from reviewing or discussing identified projects.

### **2017 Competition:**

To encourage the implementation of the Regional Economic Development Councils' strategic plans and to continue to motivate investment opportunities and job creation, the Regional Councils competed in 2017 for up to \$150 million in capital funds and \$75 million in Excelsior Tax Credits for projects identified by the Regional Councils in their regions.

As part of this year's competition, all the regional councils focused on initiatives that will drive implementation of their regional strategic plans, and to continue support for various State initiatives. Regional Council priorities include: supporting the Downtown Revitalization Plan and beginning to identify projects to implement it; implementing strategies through the project pipeline; closing the skills gap; identifying projects for the State's life science cluster; and measuring the performance and progress of the strategic plan and CFA projects.

By incentivizing implementation of the strategic plans, Regional Councils, businesses, educational institutions, local governments, not-for-profit groups and other stakeholders are further motivated to work together to accomplish the regional vision. While project funding was awarded in all ten Regional Councils through the 2017 CFA, the competition placed an emphasis on Regional Council performance and action to implement strategies.

The competition was focused on the following:

- 1) Implementation of regional strategic economic development plans;*
- 2) Performance in encouraging economic growth through job creation and investment;*
- 3) Support for the Downtown Revitalization Initiative.*
- 4) Identifying projects for the State's Life Science cluster*
- 5) Working with industry and education leaders to close the skills gap*

In 2017, the Regional Councils competed against each other to be designated as a "Top Performer".

The 2017 Strategic Implementation Assessment Team (SIAT) was led by Secretary of State Rosanna Rosado and included Office of General Services Commissioner RoAnn Destito, Department of Transportation Commissioner Matthew Driscoll, Environmental Facilities Corporation President and CEO Sabrina Ty, Department of Labor Commissioner Roberta Reardon, Homes and Community Renewal Commissioner Ruth Ann Visnaskus, Agriculture and Markets Commissioner Richard Ball, and Canals' Director Brian Stratton. The SIAT also included members appointed by the Legislature including Hon. Donna Lupardo, State Assembly District 123, Hon. Helene Weinstein, State Assembly District 41, Hon. James Seward, State Senate District 51 and Hon. Kenneth LaValle, State Senate District 1. The SIAT reviewed each region's Progress Report based on established criteria. In 2017, the SIAT traveled to each region and received a summary of the REDCs' 2017 activities and priorities, which included PowerPoint presentations, videos, and tours of project sites. The SIAT was also given time to ask questions of the REDC's about their progress reports and regional priority projects.

The SIAT provided an assessment of each plan and made recommendations to Howard Zemsky, President & CEO, Empire State Development Corporation of the five reports that most closely aligned with the criteria outlined in the guidebook. President Zemsky accepted the recommendations of the Committee and, pursuant to his statutory powers as head of the Urban Development Corporation, awarded five regions with the Top Performer up to \$35 million in funding consisting of \$20 million in capital grants and up to \$15 million in Excelsior tax credits for priority projects identified in their Strategic Plans. The balance of the incentives was awarded to projects identified by the Councils as in alignment with their strategies and priorities.

In addition, project sponsors applied for over \$575 million in economic development resources available from twelve state agencies through the Consolidated Funding Application (CFA). The CFA allows businesses and other entities to apply for multiple agency funding sources through a single, web-based application. Awards for CFA projects were made based on the endorsement of the local Regional Council and the technical program review of the agencies providing resources, subject to interagency review team analysis and agency discretion.

The 2017 REDC initiative was launched on April 24 and the CFA opened for applications on May 1 and closed on July 28. All details about CFA resources were made available online via the 2017 CFA Resources Available Document, the New York State Register and the Grants Gateway. When the portal closed on July 28, agencies immediately began marking project eligibility. All eligible projects were then made available to the Regional Councils for their scoring process and the agencies for their technical evaluation. On October 2, the REDCs submitted their final 2017 progress reports to the State. After the SIAT presentations concluded in November, the Inter-agency team met to review the projects and make final funding decisions.

The interagency team reviewed projects based on relevant factors including Regional Councils Implementation Agendas and designation of priority projects, project alignment with regional goals and objectives, funding availability and regional need. Priority projects are those specifically enumerated in the Regional Council Reports, receiving a score of 20 from the

Regional Council, and identified as significant, regionally supported and capable of stimulating economic investment.

The interagency team once again consisted of professional staff from relevant agencies and authorities' with detailed knowledge of their respective CFA program funding. This group conducted an analytical assessment that provided the basis for project funding recommendations made by individual agencies for final approval by respective agency or authority head. As provided in the budget, the Regional Council Grant funds were awarded by ESD in its discretion.

This process resulted in funding of projects that aligned with a long term, regionally generated implementation agendas and are capable of stimulating economic growth and investment.

On Wednesday, December 13, 2017, the Governor announced that 1,041 projects totaling \$755.6 million had been awarded through Round Seven of the Regional Economic Development Council initiative. Top Performer awards were given to the Mid-Hudson, Capital Region, Mohawk Valley, Central New York and Long Island regions in adherence to the competition guidelines detailed above.

## MEMORANDUM

**To:** Howard Zemsky, President and CEO of the Empire State Development Corporation

**From:** Rossana Rosado, Secretary of State  
Richard Ball, Commissioner, Department of Agriculture & Markets  
RoAnn Destito, Commissioner, Office of General Services  
Matthew Driscoll, Commissioner, Department of Transportation  
Roberta Reardon, Commissioner, Department of Labor  
Brian Stratton, Director of Canals, NYS Canal Corporation  
RuthAnne Visnauskas, Commissioner, Homes and Community Renewal  
Sabrina Ty, President and CEO of the Environmental Facilities Corporation  
Assemblywoman Donna Lupardo, 123<sup>rd</sup> District  
Senator James Seward, 51<sup>st</sup> District  
Senator Kenneth LaValle, 1<sup>st</sup> District  
Assemblywoman Helene Weinstein, 41<sup>st</sup> District

**Subject:** Review of Progress for the 2017 Regional Economic Development Council Initiative

**Date:** December 12, 2017

---

We are honored to serve as the Strategic Implementation Assessment Team (SIAT) for Governor Cuomo's Regional Economic Development Council (REDC). In the past seven years, the REDC initiative has made serious progress in job creation and the growth of new industries across New York State. For a second year, the REDC initiative has been enhanced by a \$100 million Downtown Revitalization Initiative.

In 2011, each Regional Council was charged with developing a five-year Strategic Economic Development Plan that emphasized their region's unique assets and provided strategies to harness local resources, both human and capital, to stimulate regional economic development, and create jobs statewide. The Strategic Economic Development Plans continue today with annual updates to address emerging state and regional challenges and opportunities. Each region has a unique set of strategies to achieve greater economic prosperity. Each Regional Council was also asked to develop strategies and identify projects related to key regional industry clusters; the State life sciences cluster; downtown revitalization; workforce development and shrinking the skills gap through collaboration with industry and educational institutions; help people in distressed Opportunity Areas to overcome barriers to entry into the workforce; promote veterans' participation in the workforce; regional Hot Spots; and local government engagement. In many of the regions, strategies developed in response to the Upstate Revitalization Initiative continue to be embraced; and in Western NY REDC strategies are complemented by the Buffalo Billion Plan.

The REDC program shifted the state's economic development approach from top-down mandates to a community-driven planning process involving state government, businesses, and academia to stimulate regional economic development and create jobs. With this shift, the State asked the REDCs to use their unique understanding of their regional economies to implement important State priorities.

In 2017, the Downtown Revitalization Initiative again supported a community planning process where each community develops the key ingredients needed for successful downtown revitalization. Each Regional Council solicited interest in the program and chose from among the many applicants the community it considered most ripe for development into vibrant communities where tomorrow's workforce will want to live, work and raise families. The \$100 million Downtown Revitalization Initiative (DRI) is investing \$10 million in one community in each region to develop a vision, articulate a plan, and identify projects and other implementation steps.

In October and November, we had the privilege and responsibility of assessing the progress of the Regional Councils, through their written annual reports, oral presentations, and regional site visits. The Regional Councils presented their progress, talked about plans to implement their economic development strategies, and reported on the status of the DRI plans. We are impressed and encouraged by the continuing results of the collaborative strategic plan implementation process.

### **2017 Annual REDC Competition**

Our task was to evaluate all ten regions based on the competition and Regional Council priorities as described in the 2017 REDC Guidebook. We focused on the following areas:

- Support for downtown revitalization
- Workforce development and identification of strategies to shrink the skills gap
- Implementation of regional strategic economic development plans and strategies through the project pipeline
- Continued advancement of state priorities and identification of projects that implement related strategies, including:
  - The Regional Economic Cluster Plans
  - The State Life Sciences Cluster
  - The regional Opportunity Agenda
  - Regional hot spots
  - Veterans' participation in the workforce
- Measuring the performance and progress of the strategic plan and consolidated funding application (CFA) projects

### **Awards**

All ten regions competed for up to \$150 million in capital funds and \$75 million in Excelsior Tax Credits for projects identified by the Regional Councils as priorities in their regions. In addition, each region was awarded \$10 million to plan and implement projects identified through the Downtown Revitalization Initiative, and projects from all ten regions submitted through the CFA were eligible for over \$575 million in other state agency funds.

The Strategic Implementation Assessment Team has identified five regions that merit the designation as Top Performers and awards of up to \$20 million each in ESD Capital Grants. As it is every year, it was a difficult challenge to evaluate the variety of approaches to very different challenges and opportunities, and the progress which was made by the regions in implementing their strategic plans. However, after careful consideration we selected as Top Performers the following regions: **Capital Region, Central New York, Long Island, Mid-Hudson, and Mohawk Valley.**

- The **Capital Region Regional Economic Development Council (CRREDC)** continues support for past strategies, and introduces a new strategy focused on *Gaming/Software*; where colleges and universities contribute to an ecosystem that supports development of games that may also serve therapeutic purposes by countering cognitive decline or adding a gaming component to respiratory therapy. The region's *Talent* strategy seeks a cradle-to-career approach to workforce development that connects job-seekers and employers with higher education institutions. Many of the projects supported for funding by the CRREDC address workforce development, including the proposed Global Foundries Manufacturing Tech Education Center that will be built in partnership with SUNY Albany, Clarkson University, and the Northeast Advanced Technology Education Center. The spirit of collaboration can also be found in the region's support for its priority cluster, research and development to commercialization, known as its *Lift-Off* strategy. For example, healthcare providers, health maintenance organizations, and insurance carriers will develop a shared database to assist with population health data analytics. Royalties, primarily associated with the region's intellectual property, were responsible for \$500 million in exports in 2016. Investments that promote smart growth and drive job creation in urban areas are part of the region's *Metro* strategy that addresses concentrated urban poverty in support of the Opportunity Agenda. DRI investment in the Hudson Bridge District will drive the continued success of existing private and public ventures; emphasize job growth and the attractiveness of the area; and set the stage for economic and civic expansion in Hudson.
- The **Central New York Regional Economic Development Council (CNYREDC)** continued to follow regional strategies from its winning Upstate Revitalization Initiative plan. The CNYREDC developed a Talent Task Force that included private, public, and nonprofit representatives to identify jobs in demand and establish strategies to address demand. The life sciences cluster is a significant portion of the region's economy, and several new initiatives would address biological threats, medical device innovation, and personalized medicine. The Unmanned Aerial Systems training corridor between Griffiss International Airport and Syracuse is advancing in a cluster category that blends life sciences and advanced manufacturing technology into a Data to Decisions (D2D) cluster. The D2D target cluster saw average wages increase 14 percent since 2010. The agriculture and agribusiness cluster also turned around, and is on the fifth year of growth in establishments (25 percent) with many more projects supported for funding this year. Investing in key growth drivers includes support for projects like a commercial food processing, packaging, and distribution center in Cayuga County. Like the state's Opportunity Agenda, CNYREDC is supporting projects to develop enablers of prosperity, such as conversion of underutilized properties in three distressed neighborhoods of Syracuse, or supporting veteran training and services. The City of Cortland,

a magnet for tourism, was selected as the DRI community. Cortland envisions new space for community activities and additional housing to accommodate an expanding residential and tourism population.

- The **Long Island Regional Economic Development Council (LIREDC)** is focusing workforce development efforts on preparing students for the jobs in key biotech sectors like pharmaceuticals and high-demand STEM fields like engineering. It is backing a proposal by the Center for Science, Teaching, and Learning, a not-for-profit based in Rockville Center, to create nine community STEM centers in high need communities. Support for STEM and biotech projects at many regional institutions continues to strengthen the region's framework for its identified regional economic cluster, biotechnology, which overlaps with the State focus on life sciences. For example, LIREDC is recommending projects such as the Computational Genomics Center at Feinstein Institute for Medical Research; expansion of the chemistry laboratory at Hofstra; a structural biology shared screening facility at Cold Spring Harbor Laboratory; expansion of a life science and technology lab at Adelphi University; and a research and technology innovation bioengineering laboratory at New York Institute of Technology. Creating diverse, transit-linked neighborhoods where people can live, work and play remains a priority as downtowns are crucial to economic vitality. Walkable, exciting places with affordable apartments appeal to Millennials and will help retain baby-boomers. The LIREDC continues its support for Wyandanch Rising and downtown projects in the Village of Hempstead and Riverhead. The region's 2017 DRI community of Hicksville, a transit-rich and diverse community, will plan how to capitalize on improvements to the Long Island Rail Road and provide safer space for downtown pedestrians.
- The **Mid-Hudson Regional Economic Development Council (MHREDC)** continued its momentum, refining its economic development strategies to best leverage the region's key assets: its proximity to New York City; highly educated workforce; diverse urban centers; and scenic beauty. The region's strategies of WORK and PLAY are supported by its focus on priority projects in the cluster representing the food and beverage manufacturing supply chain, such as the proposed food exchange in Kingston that will be a food hall, food manufacturing facility, and grocery with an emphasis on locally sourced food. The State Life Sciences cluster fits neatly into the region's emphasis on biomedical and healthcare, shown by its continued support for core institutions; willingness to partner with other regions to create a research corridor; and support for biotechnology business incubator at NY Medical College. Stakeholders in the region are working together to identify ways to close the skills gaps identified. Commitment to downtown revitalization, part of its LIVE strategy, is evident in MHREDC funding recommendations, including support for a project in its round one DRI community of Middletown. Chosen by the MHREDC as the DRI community, additional investments in the Kingston Stockade Business District will continue the area's economic revitalization and create new opportunities for the surrounding neighborhoods, towns and counties.
- The **Mohawk Valley Regional Economic Development Council (MVREDC)** identified placemaking and tourism as an important component to creating a strong and desirable

workforce. This was complemented by workforce development in high-paying, in-demand STEM sectors, with a mechatronics/robotics BOCES program sponsored by manufacturers and the Otsego County Chamber of Commerce as an example. The MVREDC continued to advance the cyber and internet technology cluster, leveraging both the Marcy Nanocenter and the region's designation as an FAA Test Site to create a strong concentration of cyber and unmanned aerial systems (UAS) research and development companies. The MVREDC is continuing its strategy of supporting agribusiness, and the craft food and beverage industry is growing through small and mid-sized breweries, farms and other producers. Rome, the DRI community, has been making targeted investments to provide an ecosystem necessary to attract and retain young professionals and their families, and will further that transformation with DRI funding. The region continues to open doors for refugees, with support for the One World Welcome & Opportunity Center for the Mohawk Valley Resource Center for Refugees. The Center will work to support community engagement, workforce development for refugees, and ultimately develop inclusiveness in the region. A proposed re-purposing of the Herkimer County nursing home will target a challenged population, people with chronic addiction issues seeking recovery, by providing a space for rehabilitation and life skills training.

Five regions should receive awards of up to \$10 million each in ESD Capital Grants to help attract and grow business in their regions. The following regions are designated as Regional Awardees: **Finger Lakes, New York City, North Country, Southern Tier, and Western New York.**

- The **Finger Lakes Regional Economic Development Council's** (FLREDC) momentum is being fueled by a region united around a plan to grow jobs, increase regional wealth, drive private sector investment, and reduce poverty. The FLREDC requires that all projects identify a link to workforce development, including projects supporting the Opportunity Agenda and veterans. For example, Foodlink links together agriculture, food processing, the Opportunity Agenda, and the DRI in Batavia, to foster a creative class of workers who will spur continued job growth. The region may use its Upstate Revitalization Initiative (URI) award to create a "Workforce Development Fund" to address job skills that would specifically support the clusters of optics, photonics and imaging (OPI); agriculture and food processing; and next generation manufacturing. Monroe Community College (MCC) led an analysis of the "middle skills gap," which investigates the set of workers who have more than a high school degree, but do not have a four-year degree. By effectively understanding these areas, the region has successfully created jobs in tooling and machining and optics technicians. It has made significant progress in achieving many of its original overarching goals, including expanding the Eastman Business Park; leveraging the region's colleges and universities for direct employment and preparing workers for the new economy; and expanding and linking agricultural producers and food producers and exporters. The agriculture and food processing cluster has had significant growth since 2010, with total wages increasing by 40 percent, average wages by 17 percent, and the number of jobs by 20 percent (nearly 2,000 jobs).
- The **New York City Regional Economic Development Council** (NYCREDC) continues to focus on its "Opportunity Zones," 15 areas of New York City which have been historically distressed but are primed for investment and growth. It concentrates investment in these areas to ensure an inclusive approach to community revitalization and job creation. The South Bronx

is one of the opportunity areas, and includes the Bronx Civic Center, which was selected as the DRI community. The region is hoping to extend the already booming economic activity to lower-income residents of the community. Employment in New York City is at an all-time high, and competition for jobs is fierce, especially for jobs requiring less formal education. At the same time, high current and future demand exists for skilled applicants in the financial, technology, life sciences and healthcare sectors. The region is taking a sector-based approach to engaging businesses, educational institutions, and nonprofits to help direct state funding to job training and educational programs in high growth sectors. For example, the nonprofit Per Scholas in the South Bronx is partnering with the Fortune 500 company Cognizant to provide no-cost technology skills training and career development resources to create a talent pool for the company. NYREDC now counts the life sciences sector as its regional economic cluster, and has a plan for advancing the cluster that involved other New York regions. The NY Genome Center research consortium will leverage investments in basic research and incubator facilities in a sector primed for growth.

- The **North Country Regional Economic Development Council** (NCREDC) introduced a new strategy this year to attract international sporting events to stimulate private investment and job growth and spark the refurbishment of sports and hospitality facilities. A new Lodging Task Force is creating a model for lodging development that can be replicated to drive sustainable private sector investment. Several projects recommended for funding would improve tourism accommodations. Not only is tourism an important industry for the North Country, it also serves to provide entry level employment and training in soft skills, a need identified most frequently by employers in a regional skills-gap survey. This fall, Clinton Community College offered classes through a new Institute for Advanced Manufacturing, which provides flexible funding to support manufacturing in the transportation equipment and aerospace sector. NCREDC considers TE&A its key industry cluster. Average wages in that sector are nearly 66 percent higher than the total average for the region, and employment has grown by 67% since 2016, with more jobs to come as Norsk Titanium continues its expansion. Employment increased by double digits in the information technology sector (35 percent) and back office sector (24 percent). The region's Opportunity Agenda to support employment of hard-to-place workers is focused this year on projects in St. Lawrence County. Located in Jefferson County, the City of Watertown was selected as the DRI community for 2017. It will use DRI funds to strengthen its position as the primary hub of commerce and culture for Jefferson and neighboring counties.
- The **Southern Tier Regional Economic Development Council** (STREDC) has been consistent in its support for its regional strategies: Build the Greater Binghamton Innovation Ecosystem; Invest in the Advanced Manufacturing Industry; Transform the Food and Agriculture Industry; and Promote the Southern Tier's Innovative Culture. State funds are being used to support mixed-use and mixed-income developments in the region's three "iDistricts" to attract and retain college graduates and skilled workers. A recommended priority project will continue development of the Health Sciences Campus in Johnson City which will house the SUNY Binghamton School of Pharmacy and Pharmaceutical Sciences. Support for downtown revitalization extends beyond those core cities in include places like Watkins Glen,

the region's DRI community. The region has been highly effective at supporting projects that either create or retain new jobs, such as using URI funds to support a major expansion of Alstom for train manufacturing which will create nearly 200 jobs and retain an existing workforce of 1,000. Several projects support growth in the food and agriculture industry, such as industrial hemp, and the number of food processing firms increased from 2016 to 2017. There is extensive cooperation between the public, non-profit, and private sectors to address hard-to-place workers. For example, the Broome County Calice Advanced Manufacturing Center links together social services, academia, industry, and workforce development systems to provide relevant workforce training and upskilling to both traditional and hard-to-place workers.

- The **Western NY Regional Economic Development Council** (WNYREDC) continues its focus on creating job opportunities and building the quality of life that will attract young adults to settle in the region. It is using the smart growth strategy of placemaking to focus investment near existing infrastructure and connecting people with jobs. Nearly all recommended priority projects relate to downtown revitalization, and several projects would help implement the region's first DRI Plan in Jamestown. Support for projects in Olean, the 2017 DRI community, would add to the assets being leveraged in its downtown. Many projects support workforce development, such as phase II of the Gerald Place Community Center to provide space for community needs and training related to health care research and education. WNYREDC demonstrated understanding of the labor market and how to provide training for the middle skills market. WNYREDC works with many different colleges and trade skill schools, such as the Buffalo Center for Art and Technology, the Finishing Trade Institute of Western and Central New York, and the Southern Tier Business Center at Alfred University. The region's key economic cluster is the materials and machinery advanced manufacturing cluster. This year, Alfred University dedicated the Center for High-Temperature Materials Characterization, which is helping to increase the development and analysis of materials crucial to renewable energy systems; and Jamestown Community College opened and expanded Manufacturing Technology Institute.

## **Conclusion**

The Strategic Implementation Assessment Team was impressed by the continued dedication of Regional Council members, work group volunteers, and staff of the Regional Empire State Development offices who serve the Regional Councils. We continue to believe that the continuation of this bottom-up process is taking New York down a path of great success, driven by the informed perspective of REDC members, spurred on by the advancement of new ideas and products by business leaders and educational institutions, and fueled by the development of a workforce across all age groups and socioeconomic strata.

While we may only recommend five regions as top performers, we believe all the regions are winners and extend our thanks and our congratulations to all Region Council members for the outstanding work they are doing to strengthen New York's economy.

# Mid-Hudson REDC

## 2017 Annual Report Assessment

### I. Performance

#### a. Impact on job creation and retention

##### Strengths

- From 2012 – 2016, priority projects retained 10,393 jobs and created 2,363 jobs. In 2016, 2000 jobs were created.
- From 2012 – 2016, all CFA projects retained 14,786 jobs and created 5,871 jobs. In 2016, 360 jobs were created.
- Average annual employment increased 1.2 percent from 2015 – 2016.
- From 2015 – 2016, the Food and Beverage cluster had an increase in average annual employment of 5.66 percent.

##### Weaknesses

- Despite the region's gains in various metrics, the regional economy still lags statewide improvements from 2011 to 2016.
- The number of biotech and biomedical establishments decreased by 6.43 percent from 2015-16, and wages decreased by 20.09%

#### b. Business growth and leverage of private sector investments

##### Strengths

- From 2011 – 2016, the ratio of total project cost to total ESD Capital Fund awards for all Priority Projects was 11:1.
- From 2011 – 2016, the ratio of total project cost to all CFA projects was 6.1:1.
- The number of establishments in the region increased by 4.58 percent since 2011.
- From 2015 -2016, Gross Regional Product increased 1.4 percent as compared to a statewide increase of 0.2 percent.

##### Weaknesses

- None noted.

### II. Projects

#### a. Solicitation and development of projects that advance the regional economic cluster

##### Regional Cluster

- The regional cluster is the Food and Beverage Manufacturing Supply Chain, which supports the region's broader strategies of WORK & PLAY.

##### Strengths

- Nearly half of the priority projects support the regional cluster, such as construction of CA Warehouse for locally grown fruit; increasing the capacity of EFCO to make bakery products; and

transformation of a vacant building at the former Mid-Orange Correctional Facility in Warwick into the New York Brewing Company brew house with dining spaces.

- Many other CFAs are being supported for food & beverage related projects, such as a program to grown participation in the Hudson Valley Grown Certified Program.
- The MHREDC supported funding for the Garner Craft Beer & Immersive Arts Fest, which will combine agritourism, craft beverage, and art to increase tourism and visitation to the area.

#### Weaknesses

- The report could have provided more information about some priority projects the Regional Council supported for funding through ESD capital grants.

### **b. Identification of projects to advance State and regional priorities**

#### Strengths

- The MHREDC linked many of its favored projects to its core strategies of LIVE, WORK, and PLAY. Together, they have the potential to generate nearly \$300 million in economic activity, and to create or retain more than 4,000 jobs, leveraging private investment at a ratio of nearly 14:1.
- The Mid-Hudson is partnering with NYC and Long Island to create a powerful Life Sciences research corridor by harnessing regional leadership, research institutions and life science companies. A key proposed project is a linear accelerator at the Radiological Research Accelerator Facility in Irvington that will help in understanding impact of heavy-ion radiation on tumors.
- The region continued support for funding of the New York Medical College BioInc Innovation Hot Spot. Ten entrepreneur client-firms lease space at BioInc@NYMC, providing a nexus for consultation between researchers that is vital to innovation.
- The region has identified eleven communities as economically distressed, and have identified projects to revitalize those communities and move impoverished people into jobs. Several of the projects highlighted in the report support the Opportunity Agenda, such as water and sewer upgrades in Brewster; construction documents for pier improvements to support economic development in Newburgh; and an effort to create anchor projects and an innovation district in Poughkeepsie.

#### Weaknesses

- The MHREDC indicated support for several CFA applications to promote Veterans' participation in the workforce, though it is difficult to determine how many of the projects relate to veterans.

### **c. Advancement of projects to meet workforce development needs**

#### Strengths

- Four projects that applied for NYS Department of Labor funding under the Existing Employee Training Program were supported by the MHREDC, as was one project applying for the Unemployed Worker Training Program.

#### Weaknesses

- Several priority projects list workforce development as a strategy which is being addressed by the project, but none include workforce development/training in project descriptions.

#### **d. Identification of projects in the region that would revitalize downtowns**

##### Strengths

- Several proposed priority projects were listed as having a downtown revitalization component, such as the Hyde Park wastewater infrastructure project which will replace individual septic systems in the downtown to allow for economic growth leading to a mixed-use walkable area.
- One priority project is in the Kingston DRI area. 2017 Stockade Works is a media, arts, and technology center that will connect media-makers and technologists.
- Other priority projects promise to help revitalize Kingston, such as the Kingstonian, a \$48 million mixed-use development on the site of the Kingstonian Hotel that will include a public plaza and parking for city use and market rate residential units.

##### Weaknesses

- No projects were identified that would help implement the DRI plan for the round one DRI community, the City of Middletown.

### **III. Progress**

#### **a. Implementation of strategies in the 5-year regional strategic economic development plan and plan updates**

##### Strengths

- 46 out of 66 projects from the 2011 Strategic Plan have been completed.
- The LIVE strategy focuses on downtown revitalization and livable communities with a goal of stimulating job growth. There have been 30 LIVE projects in 6 rounds.
- The WORK strategy is an industry based initiative that seeks to attract and retain quality jobs in the Region. There has been some job growth, with more success in retention of jobs that might have left the region.
- The region continues success with the PLAY strategy which seeks to position the region as a premier tourist location. There has been growth in tourism and the food and beverage industry, and projects are advancing, such as LEGOLAND.

##### Weaknesses

- None noted.

#### **b. Execution of strategies that address emerging state and regional challenges and opportunities**

##### Strengths

- Interest in capitalizing on the craft food and beverage trend remains strong and there is a growing interest by farmers to plant hops and grains.
- Training the agriculture workforce remains important. The Hudson Valley Agricultural Development Corporation's Farm and Food Business Accelerator provides a mentoring and training program for the region's farmers and food entrepreneurs seeking to build sales and gain access to capital.
- Seven of the region's Opportunity Areas received an assessment of key infrastructure issues and recommendations which showed that-all areas require significant investment. Although funding issues remain, the MHREDC is aware and working on this revitalization-related issue.

- The MHREDC is working to collaborate with the New York City and Long Island regions to establish a Life Science Cluster that spans the state. They are identifying additional institutional and intellectual assets and identifying real estate in the Region that is suitable for life sciences companies.

#### Weaknesses

- None noted.

### **c. Success in job training and engagement of hard-to-place workers**

#### Strengths

- The region has a low job growth rate but high job retention. Many small manufacturing businesses are adding trained employees.
- MHREDC Workforce Development Work Group streamlined their efforts, folding a focus on veterans into its efforts, adopting a holistic approach to training, and providing employers access to all available workers.
- The Hudson Valley Educational Consortium (HVEC) prepared a study which outlined the economy of the region and provided a gap analysis highlighting workforce trends. The only recommendation was for community colleges to assess how well their offerings align with the regional labor market.
- Two classes about entrepreneurship and basic jobs skills were taught in English and Spanish in the opportunity cities of Peekskill and Brewster.
- In collaboration with the Council of Industry, the MHREDC is supporting an employer-led public-private pilot program for registered apprentices in manufacturing occupations, and a manufacturing careers platform (Go Make It) designed to help students, parents, and teachers explore the world of advanced manufacturing.

#### Weaknesses

- While great ideas are being developed by the HVEC and the workforce development stakeholders, action items and projects are limited.
- Progress on veterans' initiatives appears to be very slow.

### **d. Advancement and completion of prior round Priority Projects**

#### Strengths

- 87 percent of all priority projects are completed or on schedule. Only 13 percent have been cancelled/terminated/declined in the past six years.
- 90 percent of all CFA projects are complete or on schedule. Less than 10 percent have been cancelled/terminated/declined in the past six years.

#### Weaknesses

- The report would be improved with the inclusion of additional data on the completed projects.

## **IV. Planning**

### **a. Quality of the Annual Report**

### Strengths

- The region has well-developed core strategies of LIVE, WORK, and PLAY.
- The report emphasizes the region's strong focus on regional food cluster.

### Weaknesses

- None noted.

## **b. Ability to take the next steps in growing the regional economy**

### Strengths

- Supports the implementation of Hudson Valley Technology.
- The MHREDC is working with Valley Table and Taste NY on promotion of Mid-Hudson products.
- An increase in visitor spending in the region that is outpacing statewide increases bodes well for further development of the region's tourism industry.

### Weaknesses

- Limited geographic distribution of priority projects does not facilitate growth in more remote areas.

## **c. Coordination with institutions of higher learning to address regional workforce development needs**

### Strengths

- The Workforce Work Group is working with industry and educational partners across the region to implement a comprehensive strategy for workforce training and closing the skills gaps identified in the region.

### Weaknesses

- Discussion of how to address skill gaps was very high level in the report.

## **d. Collaboration with local governments in advancing opportunities for improved efficiency**

### Strengths

- Continues affiliation with the Pace Land Use Law Center, which conducts mayor's roundtables to discuss issues of common importance.

### Weaknesses

- None noted.

## **e. Development of regional metrics to monitor performance**

### Strengths

- Metrics in the report measure progress in all identified clusters within the LIVE WORK PLAY strategies.

### Weaknesses

- None noted.

## V. Participation

### a. Engagement of the community, public, and other stakeholders in the Regional Council process

#### Strengths

- The region's 8 work groups and committees were wide-ranging and inclusive, holding 22 public meetings with approximately 1,484 people from all seven counties participating. There were meetings held in each Mid-Hudson county.
- In 2017 the MHREDC received more CFA applications than any other region (306) and the largest number of Downtown Revitalization Initiative applications (29) statewide.
- To identify its proposed Mid-Hudson DRI Community, the council undertook an extensive outreach process, first sending the DRI application to all 192 municipalities in the Region. The DRI was explained at all the CFA workshop meetings.

#### Weaknesses

- None noted.

### b. Regional unity and support of the Annual Report

#### Strengths

- None noted.

#### Weaknesses

- None noted.
