

Finger Lakes Regional Economic Development Council

2018 Annual Report Assessment

I. Performance

a. Impact on job creation and retention

Strengths

- From 2011 – 2017, CFA Projects (including Priority Projects) are projected to have retained 10,984 jobs and created 5,232 jobs.
- As of July 2018, the regional unemployment rate was approximately 4.2 percent, equal to the statewide unemployment rate. For comparison, the unemployment rate in the Finger Lakes was approximately 7.6 percent in 2011.
- Average annual wages have increased by approximately \$5,000 a year from 2011 to 2017 to a total of approximately \$47,750; however, wage increases have not kept pace with the state.
- The population of the region grew by 11 percent, as compared to 8 percent for both upstate and the state as a whole. Much of this growth was in the younger age groups indicating that younger generations see a positive economic future in the region.
- Monroe County reduced the public assistance recidivism rate from 15.8 percent in 2017 to 13.9 percent in the first six months of 2018.

Weaknesses

- None noted.

b. Business growth and leverage of private sector investments

Strengths

- From 2011 to 2017, the ratio of total project costs to all CFA projects was 8:1. In 2017 the lower than normal ratio of 5:1 was attributed to a higher percentage of projects focused on social services. The Finger Lakes Region has consistently had one of the better public/private leverage ratios.
- The FLREDC reported that just over \$400M of the \$500M of URI funds has been awarded, leveraging \$1.65B of private investment and creating or retaining over 7,000 jobs.
- Exports are up approximately \$100M from 2016, after experiencing a recent dip. The sectors comprising exports are more diversified than they used to be, making the Finger Lakes Region more resilient to economic changes in any individual sector.
- Operations are now up and running at the American Packaging Corporation's new facility in the Town of Chili. The company has already hired 70 new employees and is on its way to creating 260 new positions over the next five years

Weaknesses

- The number of private sector establishments in the region increased by 5 percent from 2011 to 2017, as compared to approximately 10 percent statewide.

II. Progress

a. Implementation of regional strategies described in a previous REDC plan and plan updates

Strengths

- Last year the focus was on social services-based Priority Projects, with many projects now in development. There is a general theme of success in employing hard-to-place workers throughout the report. Many of the descriptions of past projects capture how the region's efforts to place hard-to-place workers and address needed skills are having a positive effect on unemployment, public assistance recidivism rates, and wage growth.
- The Finger Lakes Region is taking a comprehensive approach to addressing poverty, led by the Rochester-Monroe Anti-Poverty Initiative (RMAPI). This approach, known as a Collective Impact model, engages institutions large and small to work together on multiple issues, including education, healthcare, transit, child care and more.
- The region is continuing development of the Sibley building, bringing in NextCorps which runs several programs supporting business growth, including Luminare NY, the world's largest accelerator for photonics, optics, and imaging companies. This building is central to revitalization of downtown Rochester.

Weaknesses

- None noted.

b. Execution of strategies that address state priorities or emerging state challenges and opportunities

Strengths

- The FLREDC participated in 13 international trade missions.
- Over \$159M in National Institute of Health (NIH) funding was invested in the Finger Lakes Region in SF'17, making it the largest recipient in Upstate NY. There is also a multi-region collaboration between University of Rochester and the University at Buffalo to create the Empire Discover Institute.
- Wages in the food manufacturing sector have grown significantly more than other sectors of the Finger Lakes Region, increasing by over 15%, and total jobs are up approximately 20% in this sector.
- The state is investing additional funds in Rochester in the "ROC the River" program that incorporates more than 24 projects along the Genesee River that will complete trails and upgrade public facilities to attract new jobs and young workers.
- With funding from the Upstate Revitalization Initiative, a company (Datto) hosted by RIT in a START UP NY space was able to expand to the Downtown Innovation Zone.

Weaknesses

- None noted.

c. Success in workforce development initiatives, including engagement of hard-to-place workers

Strengths

- Foodlink launched a Career Fellowship program in July of 2018. Following completion of the 12-month program, participants in the first cohort will have over 1,500 hours of training.

- Many of the programs advanced as part of the region’s Opportunity Agenda are now showing results. The slow start up period has given way to growing participation by students and job placements.
- The FLREDC has supported Tyrone Reaves, a local business owner of Truform Manufacturing, who developed Pathstone – a not-for-profit community development and human services organization providing services to low-income families. The Center, combined with the Young Adults Manufacturing & Training Employment Program (YAMTEP), has run 13 cohorts of training totaling 159 students, 74 percent of which completed the training and 90 of which are now employed by 22 companies.
- The Young Adult Manufacturing Training Employment Program (mentioned above), sought and recently received funding under the Empire State Poverty Reduction Initiative and the Rochester Monroe Anti-Poverty Initiative that will be used to expand the program.

Weaknesses

- None noted.

d. Advancement of projects that revitalize downtowns

Strengths

- Outside of Downtown Revitalization Initiative (DRI) areas, a clear focus on downtown revitalization has been established for Rochester with the ROC the River initiative.
- Several projects recommended for CFA funding are likely to promote downtown revitalization, including DRI projects in Geneva, and other activities are helping to advance the city’s strategic plan. For example, Hobart and William Smith College completed renovations this summer of a historic building on Castle Street that provides students work and gathering space. The FLREDC supported an ESD grant to help fund improvements.

Weaknesses

- None noted.

e. Advancement of prior round Priority Projects

Strengths

- 93 percent of Priority Projects and over 90% of other projects are completed or on time. Only 3 percent of the 163 projects have been cancelled or declined.

Weaknesses

- None noted.

III. Planning

a. Quality of the Annual Report

Strengths

- The annual report was clearly written and included information about projects and the timeframe in which progress was made.
- There was a significant description in the report of services available to veterans and other hard-to-place workers.

Weaknesses

- No meaningful description of the requested Regional Priority Projects was provided.

b. Ability to take the next steps in growing the regional economy

Strengths

- The Finger Lakes Region has had clear success in the Agriculture and Food Processing Sector. The four hubs that have developed in this cluster are growing at faster rates than other sectors of the economy.
- The Optics, Photonics and Imaging Cluster is engaged in significant construction at this time and the region remains the established national hot spot for this technology.
- The region's poverty rate is at record lows, and the region is now focused on combatting chronically high unemployment in the City of Rochester and training hard to place workers.
- The region's exports are based on a significantly expanded number of products and services, making it more resilient to any one industry's ups and downs. The high level of activity of trade delegations should result in additional foreign investment in the future.

Weaknesses

- None noted.

c. Coordination with institutions of higher learning to address regional workforce development needs

Strengths

- The region's 19 colleges and universities play a key role in every section of the report and are one of the Region's largest employers. The report provides the status of over 25 Priority Projects connected to the region's community colleges and other institutions. For example, the opening of the new MAGIC Spell Studios at RIT is anticipated this fall and enables the college to increase enrollment in programs that combine film & animation and interactive gaming technologies.
- MCC was awarded \$6 million from a NYSUNY2020 grant and \$5.4 million through the FLREDC URI to establish the Finger Lakes Workforce Development Center at Eastman Business Park. The Center is designed to connect residents to accelerated workforce education programs.

Weaknesses

- None noted.

d. Collaboration with local governments in advancing opportunities for improved efficiency

Strengths

- The FLREDC supported numerous government efficiency projects, such as a cooperative highway services project proposed by three towns in Livingston County.

Weaknesses

- None noted.

IV. Proposed Projects

a. Solicitation and development of proposed projects that advance the regional economic cluster

Regional Economic Cluster

The primary regional cluster is Optics, Photonics and Imaging. Additional clusters identified by the Region include Agriculture and Food Processing, and Next Generation Manufacturing.

Strengths

- The FLREDC supported Priority Projects in the area of agriculture and food processing, such as the expansion of cheese production at Yancey’s Fancy, equipment to increase production at the Special Touch Bakery, and the addition of a commercial scale facility for Bostrom Farms.

Weaknesses

- The lack of project descriptions in the annual report made it challenging to understand which State and regional priorities the proposed projects would address, although this was somewhat mitigated by the oral presentation of the FLREDC.

b. Identification of proposed projects for 2018 to advance State and regional priorities

Strengths

- The Genomics Research Lab Cluster project at RIT appears to support the Life Sciences Cluster.
- Several projects will strengthen tourism, such as expansion of the Strong National Museum of Play, the installation of a sculpture garden in Centennial Park, and upgrades to Frontier Field.

Weaknesses

- None noted.

c. Advancement of proposed projects for 2018 to meet workforce development needs

Strengths

- Several projects appear related to education and workforce training, such as Nazareth College’s Golisano Training Center, Reliant Staffing Systems’ expansion of its Career Start program, and the PTECH Advanced Manufacturing Equipment for the Wayne-Finger Lakes BOCES.
- The “ladder up” approach to better salaries was described by the FLREDC in its presentation. An example of this in practice is a medical assistance program whereby changing class times to match the schedules of working mothers resulted in 100 % of participants completing the program to move up in their careers. Several projects were advanced that supported this concept for healthcare workers
- The FLREDC has a strong focus on workforce development, including building soft skills to improve employment chances. ESD Capital Funding was recommended for an international trade center on the former Kodak Hawkeye Campus. In addition to space for international business, medical offices, and commercial offices, space will be provided for a job training center.

Weaknesses

- None noted.

V. Participation

a. Engagement of the community, public, and other stakeholders in the Regional Council process

Strengths

- The Finger Lakes Region continued and expanded its community engagement. This year's efforts included a new meeting series on the Roc the Riverway initiative. There were 32 public engagement meetings this year that were attended by several thousand participants.
- The FLREDC has 11 work groups, all of which now use a dashboard to track progress.

Weaknesses

- None noted.

b. Regional unity and support of the Annual Report

Strengths

- The FLREDC has a stable membership and broad support for its plans and initiatives. Many sections of the report, including discussion of the Opportunity Agenda and Downtown Revitalization Initiative, describe efforts to make public engagement a priority in the planning and implementation processes.

Weaknesses

- None noted.
