

Proposed 2019 Priority Projects

Announcement from the New York City Regional Economic Development Council

ROUND IX PRIORITY PROJECT SELECTION CRITERIA

In an effort to identify potential priority projects for Round IX of the Regional Economic Development Council initiative, the NYC Regional Economic Development Council (“REDC”) will hold a public forum on Wednesday, July 24, immediately following the conclusion of a short REDC meeting, which begins at 9:00 a.m. at the Brewster Building (JetBlue sign) 41-21 27th Street Long Island City, Queens. Individuals representing companies and organizations with projects proposed for selection as a priority project by the council should plan to testify (three minutes maximum) at this public forum. To register, please click [here](#) with the subject line “NYC REDC Public Forum”.

As part of its five-year economic development plan for New York City in 2011, and its progress reports from 2012 to 2018, the REDC has identified several criteria for identifying priority projects. These include the following:

Workforce Development and REDC Opportunity Agenda: Workforce development projects are now supported by Governor Cuomo’s new \$175 million initiative, which the REDC strongly supports. Priority projects requiring capital grants available through the traditional consolidated funding application programs should focus on training individuals for the jobs that exist in New York City today, as well as skills training programs that are transferable across industries. Capital awards for workforce development programs that emphasize training in careers with clear career paths, particularly to mid-wage occupations, as well as those that focus on populations that face significant barriers to employment such as women and youth, will be prioritized. Public-private partnerships are particularly encouraged.

Job Creation: Only projects that directly or indirectly create, retain or prepare New Yorkers for jobs receive priority, with special consideration for the quality of jobs as measured by wage levels and benefits, permanence, and/or access to longer-term career advancement opportunities.

Relief of Conditions of Economic Distress: New York City is home to the majority of New York state residents who live below the poverty line. Since few decent employment solutions exist for people who lack education and basic workplace skills, priority will go to projects that provide opportunities for training and skills development for economically disadvantaged communities and individuals.

Leverage Investment: Projects that seek public funds must demonstrate the extent to which a state investment will leverage private investment and other public contributions, both directly to the project and indirectly through the project's multiplier effects in the city and state.

Social or Economic Transformation: Projects that will receive priority are: 1) most likely to provide a significant contribution to an industry cluster that is important for future growth of the city economy; and/or 2) contribute to the resurgence of an economically distressed community; and/or 3) meaningfully improve the quality of life or expand opportunities for economically disadvantaged people.

Feasibility: Priority projects for competitive funding must have conditional financing commitments, a clear time frame for implementation and a business plan that indicates long-term economic sustainability.

Measurable Impact: Project plans must include projections of what they will contribute to economic growth in terms of job creation, investment, business revenue generation, community benefits, cluster development or other indices that can be monitored and measured.

Innovation: New York City has a number of assets that position it for competitive advantage in the innovation economy. Projects that strengthen and build upon these assets (research universities, industry pioneers, early stage investors, entrepreneurial networks and technology training facilities) will receive priority.

Partnerships with Higher Education Institutions: Priority will go to projects that incorporate a role for higher education institutions, such as START-UP NY.

Strong Business Partnerships: Projects designated as "priority" by the REDC must include partnerships with private sector employers and/or investors.

Innovation Economy Focus: Priority will be given to projects that advance the innovation economy with a particular focus on projects that develop the life sciences sector by supporting life sciences companies and/or establishing a talent pipeline from training to employment in life sciences. Health IT, clean energy and big data are additional areas of focus.

Inter-regional Cooperation: Projects that incorporate initiatives with other regions of New York state will be prioritized.

Finally, the REDC will look for projects that best fulfill the objectives of programs that have been prioritized by New York state including projects that work to improve the accessibility and quality of child care, life sciences, Regional Economic Cluster plans, Global New York, business incubation, veterans' participation and local government engagement. In addition, projects that support community investment in placemaking and downtown revitalization will be prioritized.
