

MEMORANDUM

To: Eric Gertler, Acting Commissioner/President/CEO of the Empire State Development Corporation

From: Rossana Rosado, Secretary of State
Richard Ball, Commissioner, Department of Agriculture & Markets
Alicia Barton, President & CEO, NYS Energy Research and Development Authority
RoAnn Destito, Commissioner, Office of General Services
Matthew Driscoll, Executive Director, NYS Thruway Authority
Erik Kulleseid, Commissioner, Office of Parks, Recreation and Historic Preservation
Roberta Reardon, Commissioner, Department of Labor
Michael Schmidt, Commissioner, Department of Taxation & Finance
Brian Stratton, Director of Canals, NYS Canal Corporation
RuthAnne Visnauskas, Commissioner, Homes and Community Renewal
Senator Neil Breslin, 44th District
Senator Anna Kaplan, 7th District
Assemblywoman Donna Lupardo, 123rd District
Assemblywoman Helene Weinstein, 41st District

Subject: Review of Progress for the 2019 Regional Economic Development Council Initiative

Date: December 18, 2019

We are honored to serve as the Strategic Implementation Assessment Team (SIAT) for Governor Cuomo's Regional Economic Development Council (REDC) Initiative. In the past nine years, the REDC initiative has transformed how New York coordinates and invests in economic development. The REDC initiative has been enhanced with a fourth round of the \$100 million Downtown Revitalization Initiative.

In 2011, each Regional Council was charged with developing a Strategic Economic Development Plan that emphasized their region's unique assets and provided strategies to harness local resources, both human and capital, to stimulate regional economic development and create jobs statewide. The Strategic Economic Development Plans continue today with annual updates to address emerging state and regional challenges and opportunities, as well as updates that reflect priorities identified by many regions in Upstate Revitalization Initiative Plans, and in Western NY by the Buffalo Billion Plan.

In 2019, Regional Councils were asked to address state priorities that included working with local businesses and communities to identify childcare needs and develop potential solutions;

developing an economic and environmental justice strategy for the region; supporting the Workforce Development Initiative; tracking the progress of the strategic economic development plan and projects funded through the Consolidated Funding Application (CFA); and supporting community investment in placemaking and downtown revitalization.

Each region has a unique set of strategies to achieve greater economic prosperity and each has identified key regional industry clusters. Regional Councils were also asked to continue advancement of regional strategic economic development plans, and identification of projects that implement related strategies, including key industry clusters, regional business incubators, the regional Opportunity Agenda, veterans' participation in the workforce, and engagement of local government in the Regional Council process.

The Regional Councils again supported the Downtown Revitalization Initiative (DRI), a community planning process where one community in each region receives assistance to identify and develop the key ingredients needed for successful downtown revitalization. Regional Councils solicited interest in the program and chose one community each from among the many applicants. The ten DRI areas selected in 2019 include: Baldwin in the Town of Hempstead, Fulton, Hornell, Niagara Falls, Peekskill, Potsdam, Schenectady, Seneca Falls, Staten Island, and Utica. A local planning committee in each DRI will develop a vision, articulate a plan, and identify projects and other implementation steps with the help of \$10 million per DRI.

Annual reports were submitted by the Regional Councils and in November each presented its progress and plans to implement the region's economic development strategies. Each also reported on the status of DRI plans in the region. Regional Councils continue to build upon regional strengths, focusing on key and emerging industries as they seek new businesses and support incubators that can generate marketable ideas for the next generation of products. Regional Councils are also partnering with educational institutions, employers, and service providers to identify and train prospective employees and match them to jobs that are available in the region.

2019 Annual REDC Competition

Our task was to evaluate all ten regions based on the competition criteria and Regional Council priorities as described in the 2019 REDC Guidebook. Criteria used to evaluate the Annual Reports included but was not limited to:

Performance

- Impact on job creation and retention
- Business growth and leverage of private sector investments
- Economic activity as a result of regional strategies

Progress

- Implementation of regional strategies
- Execution of strategies addressing emerging state and regional challenges and opportunities
- Advancement of prior round priority projects

Planning

- Ability to take the next steps in growing the regional economy
- Collaboration with local governments

Projects

- Identification of projects to advance state and regional priorities
- Identification of projects in the region that would revitalize downtowns

Participation

- Engagement of the public and other stakeholders in the Regional Council process
- Regional unity and support of the progress report

Awards

All ten regions competed for up to \$150 million in capital funds and \$75 million in Excelsior Tax Credits for projects identified by the Regional Councils as priorities in their regions. In addition, each region will receive \$10 million to implement projects identified through the Downtown Revitalization Initiative, and projects from all ten regions submitted through the CFA were eligible for over \$525 million in other state agency funds.

The Strategic Implementation Assessment Team has identified five regions that merit the designation as Top Performers and a share of \$100 million in ESD Capital Grants. Selection of the Top Performers continues to be a difficult challenge, as the regions are taking a variety of approaches to very different challenges and opportunities and are all making progress implementing their strategic plans. However, after careful consideration we selected as Top Performers the following regions: **Capital Region, Central NY, Long Island, Mohawk Valley, and Southern Tier.**

- The **Capital Region Regional Economic Development Council (CRREDC)** is taking a variety of actions to retain, build, and train a workforce that is prepared for jobs that match the region's focus on life sciences, manufacturing, and computer programming. The Talent strategy for the region continues to be a cradle-to-career approach to workforce development that connects job-seekers and employers with higher education institutions. For example, Hudson Valley Community College's new Haas Center for Advanced Manufacturing Skills and the Albany College of Pharmacology's new Center for Bio-Manufacturing Education and Training are contributing to the creation of training-to-industry pipeline and advancing both the Talent and Next Tech regional strategies. Recent data shows that jobs in the University R&D sector grew by over sixteen percent. Innovate 518, an Innovation Hot Spot, promotes the Lift-Off strategy and the key cluster of R&D to Commercialization by connecting startups with resources available in the Capital Region, including sourcing \$500,000 of funding in 2018. The Capital Region is one of 47 US metro areas that spent more than \$1 billion on R&D last year. Since its initial plan was adopted, placemaking has been the priority for the CRREDC as reflected in its "Metro" strategy. Projects are underway in the Downtown Revitalization Initiative (DRI) communities of Glens Falls, Hudson, and Albany and investments in the Saratoga Performing Arts Center

will benefit Saratoga Springs and nearby communities. Schenectady was chosen as the DRI community for 2019.

- The **Central New York Regional Economic Development Council (CNYREDC)** continues to adhere to winning strategies from its Upstate Revitalization Initiative plan, as well as its original strategic economic investment plan. The region continues to support entrepreneurs in the tech sector and agriculture through programs and incubators including Genius NY, the Grow-NY Food Innovation and Agriculture Technology Business Challenge, and Syracuse Center of Excellence for Environmental and Energy Systems. Over the past year, investments in SyracuseCoE have allowed collaborators to secure more than \$17 million in additional funding to support industry-university collaborations. Career exploration programs starting no later than middle school are being advocated to encourage youth to consider agriculture as well as other career paths. CNYREDC continues to support projects and programs that are enablers of prosperity, such as scholarships and job training for underserved youth provided by anti-poverty initiatives like the Alliance For Economic Inclusion and Say Yes Syracuse, and pre-apprenticeship programs in agriculture and film. The region, in partnership with the Mohawk Valley, has demonstrated significant progress towards its goal of becoming a global hub for unmanned systems. Syracuse University also established an unmanned system policy institute. Central NY is positioning itself as a logistics hub, particularly for agribusiness, with upgrades to ports, airport, and a new USDA export office. The DRI strategic investment plan was completed for the City of Auburn and Fulton was selected as the DRI community for 2019.
- The **Long Island Regional Economic Development Council (LIREDC)** has a diverse approach to workforce development, with strong academic partnerships that support its focus on the commercialization of discovery. An artificial intelligence (AI) cluster has emerged, and Stony Brook University's new AI Institute for Discovery and Innovation will become a regional HUB. Long Island's workforce grew by nearly 12,000 jobs in the past year, with the region investing in training workers to fill jobs in biotech industries. To help maintain the workforce and combat the outmigration of young workers, the LIREDC supports place-making and is encouraging mixed-use development near transportation hubs and the transformation of former big box stores/malls to mixed-use places. The LIREDC is supporting mixed-use and affordable housing with funds for improved sewers in the 2018 DRI community of Central Islip and other downtown areas. Potential revitalization projects in Baldwin in the Town of Hempstead will be identified in Round Four of the DRI. The LIREDC recognizes the need to address a range of job opportunities, such as agritourism and jobs associated with offshore wind power. A new work group will seek opportunities to develop a supply chain to support the construction, installation and operation of offshore wind projects, while other regional leaders will work with labor to prepare the workforce for wind industry-related careers.
- The **Mohawk Valley Regional Economic Development Council (MVREDC)** is encouraging placemaking investments and daycare centers in downtowns to attract and retain a young and growing workforce. Providing transportation alternatives for the

workforce is on the front burner, including efforts to bring jobs closer to where people live, provide a more walkable environment with pedestrian trails and bike paths, develop sites on bus routes, invest in Centro stations, and invest in downtown centers. More than 500 market rate and affordable housing units are planned or under construction in community centers. The 2019 DRI community of Utica also proposed a people-centric placemaking approach to leverage DRI investments. The region is taking a holistic approach to economic development and workforce development. For example, to develop a workforce for food systems MVREDC stressed creating a network of colleges serving rural areas to identify pathways to age-related jobs and working with middle schools using mobile classrooms. The MVREDC is relating STEM to agriculture, has the only PTECH agriculture program in the state, and is working with local schools to realign local curricula to prepare students for future jobs, including those in agriculture. To address a recurring concern over the lack of workers appropriate for open jobs, colleges are providing credit for apprenticeship programs and offering micro credentials that support middle-skills jobs in advanced manufacturing. In 2017 more than 100 advanced manufacturing jobs were added with wages 28% higher than the regional average wage.

- The **Southern Tier Regional Economic Development Council (STREDC)** is clearly committed to the strategies in its winning Upstate Revitalization Initiative plan, making large investments into high profile anchor projects in Binghamton, Johnson City and Endicott and using the CFA process to support jobs in manufacturing and agriculture, the region's downtowns, and drivers of innovation. \$1.5 billion in private funds have been leveraged for projects throughout the region for a total investment of over \$1.8 billion and the creation/retention of more than 25,000 jobs. The STREDC seeks to make greater Binghamton a destination for talent and has broken a long trend of work force decline with an increase in both the numbers of people in the labor force and the number employed in 2018. It continues to strengthen its entrepreneurial ecosystem through innovation hot spots and business incubators. The region has experienced great growth in attracting venture capital funding, and it continues to have positive job growth in key sectors such as advanced manufacturing, transportation equipment manufacturing, food processing, and healthcare. In the past year, construction began on the new Lake Erie College of Osteopathic Medicine in Elmira. STREDC is working to increase its market share of the food and agriculture industry by addressing workforce and growing season challenges. This year it joined with two other regions to launch Grow-NY, a food and agricultural business competition to advance tech and innovation, receiving nearly 200 applications for prizes for new businesses. Hornell was selected as the region's fourth round DRI community.

Five regions should receive a share of \$50 million in ESD Capital Grants to help attract and grow business in their regions. The following regions are designated as Regional Awardees: **Finger Lakes, Mid-Hudson, New York City, North Country, and Western NY.**

- The **Finger Lakes Regional Economic Development Council (FLREDC)** is maintaining its momentum with its clear focus on reducing poverty, growing jobs, increasing regional

wealth, and driving private sector investment. The region also established new priority areas based on its current strengths and opportunities, such as growing incumbent firms, proactive outreach to targeted clusters, development of a regional brand, focusing on immediate and long-term talent needs, and investment in the urban core. Two new key industries were identified - Healthcare & Life Sciences and Software & Internet Technology - and support continues for the key cluster of Optics/Photonics/Imaging through industry attraction and the \$10 million Luminare NY accelerator program. Investments from the Upstate Revitalization Initiative like AIM Photonics and ROC the Riverway are facilitating an ecosystem of economic development and public-private partnerships, and Eastman Business Park is gaining vibrancy as a place to work, live, learn, and play. Through the DRI, the FLREDC is supporting placemaking efforts outside of Rochester, such as in the DRI community of Seneca Falls. Efforts to attract and retain young people to the region have been successful, in part due to the attraction of vital, dense, and culture-and entertainment-rich urban areas. The challenges of poverty and environmental justice are being addressed through a comprehensive approach led by the Rochester-Monroe Anti-Poverty Initiative which engages institutions large and small to work together on multiple issues, including education, healthcare, transit, child care and more.

- The **Mid-Hudson Regional Economic Development Council (MHREDC)** is building on its success by encouraging existing businesses to grow creating new jobs and an environment that brings in new businesses to the region. Several incubation programs are contributing to the future pipeline of talent as evidenced through the growth of regional cluster jobs which support the region's broader strategy of WORK and PLAY. MHREDC has adjusted its LIVE initiative to include retaining and attracting residents to the region, which is complemented by efforts to strengthen the region's identity as a premier tourist destination. Efforts have focused on increasing visitor spending and stimulating growth across related industries (food/beverage, accommodations, arts and recreation). Peekskill's selection as a DRI community will allow the city to link existing community assets and increase offerings in tourism, the arts, media, and light manufacturing. Regional strategies have evolved to include support for the manufacture of local products like grape juice and cider, and the expansion of the film and television production industry. MHREDC has developed strategies to address long-term unemployed in the healthcare field, recruiting people to re-enter the workforce through basic skills training. MHREDC also identified childcare projects targeted around extended hours for the hospitality industry and is currently working with corporate park owners and other major employers to identify locations for childcare facilities convenient to multiple employers.
- The **New York City Regional Economic Development Council (NYCREDC)** is focused on long-term planning to retain young people and support the economic growth of underserved populations and all neighborhoods across New York City. Priority projects receiving NYCREDC support must indicate long-term economic sustainability and projections for economic growth in terms of job creation, investment, and community benefits. Unemployment is at an all-time low of 4.2%, but it does not account for people

who stopped looking for jobs or who are underemployed. Multiple efforts target inclusion of various special populations in the workforce, such as high-risk court-involved youth, veterans, underemployed women, and low-income girls and women. City-wide pre-K for all 4-year-olds and care for 3-year-olds in high-need school districts helps parents return to the workforce, but gaps remain that the NYCREDC recommends for further study. There has been an influx of pharmaceutical, healthcare, and bio-IT companies to the region, and NYCREDC supports both new projects in its key cluster of Life Sciences, as well as upgrades and expansion of previously supported life sciences projects like the BioLabs@NYU Langone incubator which provides startups with collaborative space, research equipment, and business support. Support is also provided for small and mid-size local manufacturers and artisans at the Greenpoint Manufacturing and Design Center where average salaries are \$51,000. To connect youth to tech jobs, the NYCREDC described an approach that would begin preparing students early in the education process, train teachers to overcome their own technology skill gaps, and expand use of community colleges.

- The **North Country Regional Economic Development Council (NCREDC)** identified several priorities for 2019, including building a regional identity, encouraging wise use of outdoor recreational assets, addressing the impacts of extreme weather on the tourism and agriculture industry, unlocking the economic potential of Fort Drum soldiers transitioning out of the Army, and seeking reliable cellular service. It is working successfully to implement a 2018 goal of hosting international sporting events, supported by investments in lodging and tourism facilities, such as the \$17 million Saranac Lake Resort, a children's museum in Potsdam, the region's 2019 DRI community. The NCREDC continues support for the Transportation Equipment cluster, working with Canadian and Norwegian industries that have invested in projects like a second Norsk Titanium facility that will open early in 2020. Fostering relationships with Canadian industries have bolstered job growth, exports, and diversified the types of manufacturing in the region. Agriculture is an important sector of the regional economy and is being supported by investment in high-tech year-round food production, such as expanded greenhouse space and robotic technology at Agbotics. The region's young adult population remained steady, but labor force numbers are dropped 3.6 percent from 2016-2017. To tackle that issue the NCREDC is taking multi-faceted approaches which include co-working facilities and business incubators to aid small businesses and attract entrepreneurs to the region, job training for low-income residents, new programs at regional colleges, and identification of solutions to childcare issues.
- The **Western NY Regional Economic Development Council (WNYREDC)** continues its focus on creating job opportunities and building the quality of life that will attract and retain young adults. With unemployment at the lowest since 1990, the region is faced with the challenge of ensuring employers have access to talent to fill job openings and grow businesses. Programs that showcase training in the region include the Alfred State College Burgard Advanced Manufacturing Program that prepares high school students for a career in advanced manufacturing, Gerard Place on Buffalo's East Side where students receive both vocational and life skills training, and Buffalo Manufacturing Works in the Northland

Corridor which has secured more than \$1 million in federal funding through global partnership models with NASA, MTC of the UK, NAMIC in Singapore, and others. REDC has made the East Side Corridor a priority to improve quality of life in Buffalo. WNYREDC has invested both CFA projects and Buffalo Billion funds in multiple projects to help provide housing, infrastructure, and assets to help build the community. Investments in smart growth have resulted in brownfield remediation, preservation of agricultural land and expansion of cropland; and protection of waterfront. WNYREDC is implementing a strategy to increase tourism and extend visitor stays, supporting tourism projects like the Aquarium of Niagara and the National Comedy Center in Jamestown. DRI funds for 2019 invested in the Niagara Fall's Bridge District will build on recent state investments in the aquarium and train station, as well as commitments to remove the parkway along the along the Niagara Gorge Corridor.

Conclusion

In each of the regions, the Assessment Team was impressed by the continued dedication of the Regional Council members and their selection of strategic and realistic projects. We were also impressed by the work group volunteers, and staff of the Regional Empire State Development offices who serve the Regional Councils. We continue to believe that the REDC process is a recipe for success, bringing together the key ingredients of economic development, academic advancement of new ideas and products, and development of a workforce across all age groups and socioeconomic strata. While we may only recommend five regions as top performers, we believe all of the regions are winners. We extend our thanks and our congratulations to all Region Council members for the outstanding work they are doing to strengthen New York's economy.

Mohawk Valley Regional Economic Development Council

2019 Annual Report Assessment

I. Performance

a. Impact on job creation and retention

Strengths

- Since 2015, the professional, scientific and technical sector has grown 25 percent; this sector includes the region's cluster of cybersecurity.
- The MVREDC reports that 2,521 jobs have been created since 2011 and 7,347 jobs have been retained.
- From 2010-18, total wages in the Mohawk Valley grew from \$6.87 billion to nearly \$8.13 billion, amounting to over 18 percent growth.

Weaknesses

- None noted.

b. Business growth and leverage of private sector investments

Strengths

- The Air Force Research Laboratory (AFRL) is growing and diversifying. It has attracted global firms like BAE Systems and Booz Allen Hamilton, and enabled the growth of new home-grown cyber and internet technology companies.
- To create an unclassified environment related to work at AFRL, Griffiss Business and Technology Park will add an Open Innovation campus to foster collaboration in computer hardware and software, data protection, cybersecurity, and artificial intelligence.
- Griffiss is also the home of the Unmanned Aerial System (UAS) test site. In partnership with NASA, the UAS test site is focusing research related to urban air mobility.
- The Nexus Center in downtown Utica, has broken ground. The center will leverage \$22 million in Upstate Revitalization funds with another \$22 million in funding to create a sports complex that will host ice hockey, and other sports and draw competitive youth teams from across US and Canada.
- Improvements at the Masonic Medical Research Institute are being leveraged with other funding to bring in additional 60 research scientists. The research is used to develop and commercialize new technologies.

Weaknesses

- None noted.

c. Economic activity as a result of regional strategies

Strengths

- Regional exports have increased by 34% since 2010, fueled by growth in the manufacturing and agribusiness sectors.

- Manufacturing in the region has grown 20% between 2015 and 2018, with primary and fabricated metals as the two largest sectors.
- Regional support for the manufacturing industry has resulted in recent investment in a new wafer fabrication facility by Cree, Inc., the global leader in silicon carbide technology. The facility will be a new, state-of-the-art, automated wafer fabrication facility at Marcy Nanocenter on the SUNY Polytechnic Institute campus.
- Visitor spending topped \$2 billion in 2018 and the region is home to nearly 5,000 tourism industry employees. This will be further enhanced by an expansion at Enchanted Forest Water Safari.

Weaknesses

- None noted.

II. Progress

a. Implementation of regional strategies

Strengths

- Ongoing success in the Cybersecurity/IT sector is evidenced by the attraction of global firms to the area – such as Booz Allen Hamilton and BAE Systems.
- The MVREDC continues to place importance in creating vibrant communities and expanding housing options. In the past year, nearly two million square feet of vacant and blighted structures have been repurposed, rehabilitated, or demolished.
- One strategy is increasing the region’s identity as an international tourism destination. The MVREDC directed an Upstate Revitalization Initiative (URI) award to preserve and modernize Historic Doubleday Field in Cooperstown.
- The MVREDC recognizes workforce preparation as the limiting factor to growth in the region and proposed several projects to facilitate preparation, such as the Employment Center in the Mohawk Valley Resource Center for Refugees and incubator space in downtown Gloversville.

Weaknesses

- None noted.

b. Execution of strategies that address emerging state and regional challenges and opportunities

Strengths

- MVREDC is working with Cornell Cooperative Extension to systematically assess the needs of the region regarding childcare.
- The MVREDC is addressing child care needs throughout the region with multiple priority projects proposed for this round. In 2018, the MVREDC recognized the importance of childcare and supported a project to create a 24-hour daycare.
- Upstate Revitalization Initiative (URI) funds were invested in expansion and enhancement of the proven tourist attractions: Enchanted Forest Water Safari and Doubleday Field in Cooperstown.

Weaknesses

- None noted.

c. Advancement of prior round priority projects

Strengths

- 78 percent of all priority projects and 83 percent of all CFA projects are completed or on schedule.
- The report highlights successful past projects in agribusiness (the Farm & Food Business Incubator and the SUNY Cobleskill Dairy Processing Center), opportunities for all (CABVI and the Mohawk Valley Resource Center for Refugees) and entrepreneurship (Griffiss Academy).
- In 2019 Briggs & Stratton moved into a modernized space on a former brownfield in Sherrill with the assistance of ESD Grants and tax credits.

Weaknesses

- None noted.

III. Planning

a. Ability to take the next steps in growing the regional economy

Strengths

- The region has been successful in growing its key cluster of cybersecurity/IT both through direct state investment and industry momentum feeding further growth.
- The Council views the State Brownfield Opportunity Area Program as a means of engaging the community and furthering environmental justice in the region.
- With funding from the URI, Utica will be able to finish its Harbor Point bulkhead and attract private sector development.

Weaknesses

- The region lacks workers with the skills needed to fill open jobs.
- While the challenge of transportation access for the workforce in the region is mentioned in the report, potential ways to address that challenge are not offered.

b. Collaboration with local governments

Strengths

- The report highlights partnerships with local governments like the formation of the Schoharie Economic Enterprise Corporation spearheaded by Schoharie County.
- A partnership between Oneida County, SUNY Poly, Griffiss Business and Technology Park, and the AFRL will use a \$12 million investment to create the Open Innovation Campus to enable easier collaboration among the partners on information security.

Weaknesses

- None noted.

IV. Projects

a. Identification of projects to advance state and regional priorities

Strengths

- The MVREDC supported 5 priority projects related to childcare, including Whispering Pines Preschool in Amsterdam, the Foltbrook Center in Herkimer, and Eastern Gardens Head Start which is connected to a 50-unit workforce housing development in Herkimer.
- Thirteen priority projects supported by the MVREDC have an Environmental Justice component.
- Project Charger will double the footprint of the Griffiss Business and Technology Park, allowing for the addition of more STEM jobs, new infrastructure to further innovation, and the ability to take on more national defense contracts.
- To support agribusiness and its entry into the global market, MVREDC supported projects like Sovena USA’s expansion to meet market demand for olive oil, and establishment of a USDA certified Halal and Kosher meat processing facility.
- To promote modernization of the manufacturing industry the MVREDC supported applications to modernize the Collins Aerospace facility and purchase of new equipment for Metal Solutions in Utica.
- Support for refugees and the work of the Mohawk Valley Resource Center for Refugees (MVRCR) continues in this round. MVCR submitted a priority project to establish an employment center within the MVRCR.

Weaknesses

- None noted.

b. Identification of projects in the region that would revitalize downtowns needs

Strengths

- MVREDC supported projects focused on vibrant communities, historic preservation, elimination of blight, and safe walkable environments. Examples include the Parrot House in Schoharie, Main Street in Jefferson, the Ford Block Revival in Oneonta, and additional funding for the Amsterdam Community Center (#90478) which recently received Downtown Revitalization Initiative funding.
- To address the need for market rate and affordable housing units, the MVREDC supported a CFA application from Silver City Lofts (#93544) in Sherrill that will create commercial space and apartments in a repurposed building on an industrial park campus.

Weakness

- None noted.

V. Participation

a. Engagement of the public and other stakeholders in the Regional Council process

Strengths

- With support of the MVREDC, two counties led efforts to engage business leaders and community stakeholder in planning for economic development. Schoharie County formed the

Schoharie Economic Enterprise Corporation, and Montgomery County created a Community Redevelopment Vision.

- MVREDC partnered with the Mohawk Valley Association of Realtors to win a grant from the National Association of Realtors to host an Opportunity Zone workshop where experts from across the nation will educate the public and work with potential investors to stimulate investment in low-income neighborhoods in the region.
- Three workgroups were formed to focus on state priorities in 2019: Access to Childcare, Economic and Environmental Justice, and the Workforce Committee.

Weaknesses

- None noted.

b. Regional unity and support of the progress report

Strengths

- All the counties in the region have proposed priority projects located within them.

Weaknesses

- None noted.
