

NYS Energy Research & Development Authority (NYSERDA)

Energy Efficiency Programs

Q. What programs are included this year through the Consolidated Funding Application?

A. There are three programs available through the CFA from NYSERDA:

- 1) [Commercial New Construction](#)
- 2) [Flexible Technical Assistance](#)
- 3) [Industrial and Process Efficiency Program](#)

Q. Does the project have to demonstrate the energy impact on a regional basis or just the host facility?

A. The energy impact must only be demonstrated at the host facility.

Q. Are there REV Programs outside of the CFA Process?

A. Yes. For a full listing of programs available from NYSERDA, please visit [here](#). Additional programs funding energy efficiency may be available from your local utility company.

Q. Do you have incentives in regards to installation of lighting?

A. For existing commercial/industrial/institutional buildings, all lighting incentives are provided from your electric distribution company. Commercial/Industrial New Construction projects may be eligible for lighting incentives, depending on design. Please visit NYSERDA's [Commercial New Construction Program](#) for additional information.

Q. Would the commercial building portion of a mixed use building be eligible for funding?

A. Depending on the service being sought or measure being installed, it is possible the project may be eligible either by NYSERDA programs or utility programs. Please contact NYSERDA directly with the specifics of your project at info@nyserda.ny.gov or toll free at (866) NYSERDA.
